Social Expenditure 1960-1990 Problems Of Growth And Control:

Aging and Social Expenditure in the Major Industrial Countries, 1980-2025 Ziba Farhadian, Mr. Bernard Nivollet, Mr. Robert Alan Feldman, Mr. Peter S. Heller, Mr. Richard Hemming, Mr. Menachem Katz, Ahsan S. Mansur, Mr. Donogh McDonald, Mr. Edgardo Ruggiero, Mr. Peter Kohnert, 1986-09-15 Most of the seven major industrial countries are now experiencing significant changes in their demographic structure. A persistent pattern of declining fertility and improving life expectancy has created major segments of the population that are already relatively aged or will become so in the near future. This paper examines the impact of prospective demographic trends on the level and structure of social expenditure by the governments of the seven major industrial countries: the Group of Seven through the year 2025. **Social Expenditure 1960-1990** Organisation de coopération et de développement économiques, 1985 **The Control and Management of Government Expenditure** OECD, 2009-05-18 Public expenditure control has become a central element of economic policy in many countries. This report analyses budget practices and some recent innovations from the point of view of senior public servants in the central budget offices of *Managing Mixed Economies* Rudolf Wildenmann, 1986 No detailed description available for *Managing Mixed Economies*. **A Disease-based Comparison of Health Systems: What is Best and at what Cost?** OECD, 2003-05-14 This book combines a collection of essays by leading experts from several OECD countries with papers discussing the results of the OECD Ageing Related Diseases study. **International Analysis: Poverty** Peter Townsend, 2014-06-06 First published in 1993. The scientific and political debate about poverty has been changing fast with dramatic implications for intellectual interpretation and action by governments. The intention in publishing this volume is to contribute to that debate. Scientists concerned to analyse poverty have been thrust by events into greater international service. But there are sinister forces at work which are seeking to divert them into petty issues to blame the victims of poverty or to cut them off from the resources or opportunities to investigate and report freely. This book is born of that frustration and represents the changing debate during the late 1980s and early 1990s. *The Associative Economy* Franco Archibugi, 2000-03-08 Are Welfare States in crisis? Forty years after Gunnar Myrdal's seminal *Beyond the Welfare State* it is still little grasped in the reform debate that the whole structure and economies of our societies are being transformed. This book reasserts the importance of a new employment and productive model: that of the associative economy which integrates social solidarity with economic planning. *The Welfare State Reader* Christopher Pierson, Francis G. Castles, 2006 Includes 20 selections reflecting the thinking and research in welfare state studies; these readings are organized around a series of debates on welfare regimes, globalization, Europeanization, demographic change and political challenges. *The OECD* Peter Carroll, Aynsley Kellow, 2011-01-01 The book reveals for the first time the origins, growth and complex role of the OECD as it celebrates its fiftieth anniversary, showing how it has adapted for the most part successfully to the changing needs of its members, both large and small. Peter Carroll and Aynsley Kellow provide a comprehensive account and analysis of the origins

development and most intriguingly the recent reforms that characterise the OECD They argue that this increasingly complex organisation has fulfilled its design to be an adaptive learning organisation and explore how the OECD has spread its wings beyond its European and North American roots to become an increasingly influential body in global governance Topical chapters include the OECD s work on health and the environment relations with international intergovernmental organisations the OECD s structure and also the key processes This fascinating book will be warmly welcomed by academics researchers and postgraduate students in a wide range of fields including international relations international business political science public policy and public administration Public servants in national departments and agencies particularly those with significant international activities will also find the book to be of great interest as will professionals within international organisations such as IMF World Bank EU UN and of course the OECD itself

Health Insurance Reforms in Asia Sabrina Luk, 2014-03-26 This book empirically examines health care financing reforms and popular responses in three major cities in East Asia Shanghai Singapore and Hong Kong It adopts a new revised version of the theory of historical institutionalism to compare and explain the divergent reform paths in these three places over the past three decades It also examines forces that propel institutional change The book provides three detailed case studies on the development of health care financing reforms and the politics of implementing them It shows that health care systems in Shanghai Singapore and Hong Kong were the products of Western presence in the nineteenth century It illustrates how greater attention is paid to the roles played by ideas actors and environmental triggers without abandoning the core assumptions that political institutions and policy feedback remain central to impact health care financing reforms It shows that health care financing reform is shaped by a complex interplay of forces over time It also provides the most updated material about health care financing reforms in Shanghai Singapore and Hong Kong The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests It shows that institutional changes in health care financing system can be incremental but transformative in nature It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change

Globalization and Egalitarian Redistribution Pranab Bardhan, Samuel Bowles, Michael Wallerstein, 2020-10-06 Can the welfare state survive in an economically integrated world Many have argued that globalization has undermined national policies to raise the living standards and enhance the economic opportunities of the poor This book by sixteen of the world s leading authorities in international economics and the welfare state suggests a surprisingly different set of consequences Globalization does not preclude social insurance and egalitarian redistribution but it does change the mix of policies that can accomplish these ends Globalization and Egalitarian Redistribution demonstrates that the free flow of goods capital and labor has increased the

inequality or volatility of labor earnings in advanced industrial societies while constraining governments ability to tax the winners from globalization to compensate workers for their loss This flow has meanwhile created opportunities for enhancing the welfare of the less well off in poor and middle income countries Comprising eleven essays framed by the editors introduction and conclusion this book represents the first systematic look at how globalization affects policies aimed at reducing inequalities The contributors are Keith Banting Pranab Bardhan Carles Boix Samuel Bowles Minsik Choi Richard Johnston Covadonga Meseguer Yebra Karl Ove Moene Layna Mosley Claus Offe Ugo Pagano Adam Przeworski Kenneth Scheve Matthew J Slaughter Stuart Soroka and Michael Wallerstein **The Vertical Mosaic Revisited** Rick

Helmes-Hayes, James Curtis, 1998-12-15 When The Vertical Mosaic first appeared in 1965 it became an instant classic Its key message was that Canada was not the classless democracy it fancied itself to be In fact Canada was a highly inegalitarian society comprising a vertical mosaic of distinct classes and ethnic groups This collection of papers by five of Canada s top sociologists subjects John Porter s landmark study to renewed scrutiny and traces the dramatic changes since Porter s time both in Canadian society and in the agenda of Canadian sociology Based on papers written for a conference held in commemoration of the thirtieth anniversary of The Vertical Mosaic s publication the five essays revisit the central themes of the original work including gender and race inequality citizenship and social justice and class power and ethnicity from the viewpoint of political economy An introduction by the editors provides a historical biography of Porter and discusses his influence on Canadian sociology European Integration and Health Policy Panos Minogiannis, 2018-02-06 The impact of European integration on diverse national social policies is still largely unknown While policy decision making remains at the country level there is a strong possibility that indirectly as a result of ideological imperatives and financial constraints policies will change National health policy is a case in point This important volume explores the current and probable effect of European integration on health care protection Will it tend to encourage all European member states to provide equitable and universal access to quality care Or is the European integration process likely to lead to social exclusion of some The high degree of social welfare as a health expectancy holds great significance for decisions in countries like the United States facing similiar pressures for expanded coverage In answering these questions Panos Minogiannis examines policies in Greece France Germany and the Netherlands Minogiannis frames his argument through an exploration of the history of the institutionalization of health care Chapter 1 explores the nature of challenges that health care faces in an era of integration and the ways in which these challenges have emerged Chapter 2 discusses centralization of governance in Brussels describing the structure and relations of different European Union institutions and their interactions with member states The final portions of the book through case studies of the Dutch French German and Greek health reforms explore the history of the political development of health care institutions with a particular interest in reform proposals in the last fifteen years Chapter 7 brings together lessons from previous chapters and discusses the dynamics of health policy making in the

European Union Minogiannis concludes that health insurance will most likely remain at the member state level as far as politics are concerned at least for the present although policy makers will most likely have to deal with the issue of cross border health more comprehensively than in the past Those interested in comparative policy and in particular health care policy will find this volume highly informative reading Those interested in the impact of European integration will find it provocative Panos Minogiannis is with the Mailman School of Public Health at Columbia University and is a research associate at the Eisenhower Center

Canada-Japan Institute for Research on Public Policy, Sōgō Kenkyū Kaihatsu Kikō (Japan), 1989 The papers in this volume were developed for an informal symposium held in Vancouver in April 1988 The papers range from descriptions of possible realigned world political orders to questions of international trade and domestic economic priorities and from the greying of the population of the industrial world and associated social policy issues such as health care and pensions to the imperative of implementing sustainable economic development worldwide

IMF Staff papers International Monetary Fund. Research Dept., 1987-01-01 In the middle of 1985 Argentina and Israel launched frontal attacks on inflation which succeeded in reducing it drastically during the first year without very significant costs in employment and output Despite basic differences in the countries structures the programs were similar in their design and their effects This paper covers some of these similarities in the implementation and the results of the two stabilization programs and analyzes the rationale of the underlying conception of the plans The focus is on the strategy for the transitional period and the ability of the programs to sustain price stability

Wages, Employment, Distribution and Growth E. Hein, A. Heise, A. Truger, 2006-02-07 This volume challenges the view that unemployment is exclusively determined by structural characteristics of the labour market and the social benefit system Macroeconomic policies and investment in capital stock are included in the analysis and are shown to have a major role to play

Government versus Markets Vito Tanzi, 2011-05-16 Vito Tanzi offers a truly comprehensive treatment of the economic role of the state in the twentieth and twenty first centuries from a historical and world perspective The book addresses the fundamental question of what governments should do or have attempted to do in economic activities in past and recent periods It also speculates on what they are likely or may be forced to do in future years The investigation assembles a large set of statistical information that should prove useful to policy makers and scholars in the perennial discussion of government's optimal economic roles It will become an essential reference work on the analytical borders between the market and the state and on what a reasonable exit strategy from the current fiscal crises should be

The Peter Townsend Reader Peter Townsend, 2010-01-25 This reader brings together for the first time a collection of Peter Townsend's most distinctive work allowing readers to review the changes that have taken place over the past six decades and reflect on issues that have returned to the fore today

The East Asian Welfare Model Roger Goodman, Huck-Ju Kwon, Gordon White, 2006-12-05 For many politicians and observers in the West East Asia has provided a broad range of positive images of the state's intervention in society Neoliberals grew excited

by popular welfare systems that cost little in expenditure and bureaucracy Social democrats thought they had found a model for social cohesion and equality In fact the reality in East Asia is rather different from these stereotypes In this book six specialists of six different societies in East Asia Japan South Korea Taiwan China Singapore and Hong Kong examine the role of the state in their welfare systems There are detailed case studies on pensions health insurance housing and personal social services They provide an up to date detailed account of how these systems have developed as well as an examination of the question of whether these welfare regimes are the natural outgrowth of cultural traditions or the result of economic and political conditions This broad ranging and detailed study will be welcomed by both students and policy makers as the first proper academic study in English to have such a wide coverage of this topic Its clarity and authority should come as a welcome alternative to the more common misconceptions about Asian society

The Survival of the European Welfare State Stein Kuhnle, 2003-09-02 Crisis Breakdown Dismantlement These are common catchphrases used in analyses of the condition of the welfare states in Europe This book takes a more optimistic view and will increase understanding of recent welfare reforms
