pursuit of sociological knowledge The volume is a valuable addition to the history of sociology in India Students of sociology and other social sciences will find it useful as a book of substantive readings on social dynamics those researching the social world will find in it a useful guide to issues in designing and execution of social research projects *Non-natural Social Science* Neil De Marchi, 1993 Published in 1989 Philip Mirowski's *More Heat Than Light* Economics as Social Physics Physics as Nature's Economics offered a challenge to historians of economics that could not be ignored Neo classical economics he said adopted certain analytical tools of mid nineteenth century physics simply substituting utility for energy and in so doing chose a natural world model which denied that economic knowledge might be essentially social and cultural The essays in this collection represent the first collective effort to respond to Mirowski's challenge by examining and assessing the Mirowski enterprise In addition to questioning the veracity of the connection between physics and economics the contributors consider the far reaching implications of Mirowski's thesis for the history of economics Mirowski shows that economic texts must be viewed in their relation to texts outside the field of economics and offers an alternative reading of economic texts as social and cultural inscriptions As historians of economics respond to Mirowski's challenge the style and direction of their work will be changed Ultimately a careful assessment of *More Heat Than Light* may introduce historians of economics to recognize that the discipline of economics may not be the most appropriate category from which to proceed Contributors Jack Birner Marcel Boumans A W Coats Avi J Cohen I Bernard Cohen Neil de Marchi Steve Fuller Clifford G Gaddy Wade Hands Albert Jolink Arjo Klammer Robert Leonard Philip Mirowski Theodore M Porter Margaret Schabas E Roy Weintraub **Social Accounting Systems** M. Yanovsky, Social accounting grew up as a result of the desire to bring together in a meaningful and comprehensive manner all the available observed facts on the economic and financial activity of a nation Three social accounting systems of flow have been developed during the last three decades Each of these systems has been constructed separately and independently The framework of each system is constructed to tackle specific aspects of the national economy It is also designed in a manner which helps in framing policies for future activity The aim of this book is mainly to describe the anatomy of these three social accounting systems and compare their structures Some attention is also given to a comparison of the systems in actual use by some industrially developed countries including the centralized economies The problem of integrating the three systems is also cursorily treated The student of economics and the economist in the service of industry private or public will obtain from this book a picture of the concepts and definitions used in social accounting the book also describes how each system is constructed and which economic study or analysis it can best serve Another valuable feature is the comparison the author makes of the national accounts system with the Russian Nationalny Dokhod In this far reaching and complex work the author has brought together the fruits of his very extensive studies into the social accounting methods of many nations and he goes beyond the analysis of existing systems to suggest ways of tackling the problems of integrating the three main systems into one Dr Yanovsky is at present senior economist in the State
