particular economy Rousseau goes on to explain that two senses of the word economy differ too much in extent to be regulated in the same manner On Political Economy is often required reading for courses in economics philosophy political economy politics government and politics social sciences      *The Social Contract* Jean Jacques Rousseau,2006-12-01 This volume brings together three of Rousseau s most important political writings The Social Contract and The First Discourse Discourse on the Sciences and Arts and The Second Discourse Discourse on the Origin and Foundations of Inequality and presents essays by major scholars that shed light on these texts      *The Social Contract Discourses* Jean-Jacques Rousseau,2015-04-26 long journey which was to lead on at last to the theory of the Social Contract In 1755 appeared the Discourse on the Origin and Foundation of Inequality among Men which is the second of the works given in this volume With this essay Rousseau had unsuccessfully competed in 1753 for a second prize offered by the Academy of Dijon and he now issued it prefaced by a long Dedication to the Republic of Geneva In this work which Voltaire in thanking him for a presentation copy termed his second book against the human race his style and his ideas have made a great advance he is no longer content merely to push a single idea to extremes while preserving the broad opposition between the state of nature and the state of society which runs through all his work he is concerned to present a rational justification of his views and to admit that a little      **The Social Contract** Jean Jacques Rousseau,2018-10-05 For the study of the great writers and thinkers of the past historical imagination is the first necessity Without mentally referring to the environment in which they lived we cannot hope to penetrate below the inessential and temporary to the absolute and permanent value of their thought Theory no less than action is subject to these necessities the form in which men cast their speculations no less than the ways in which they behave are the result of the habits of thought and action which they find around them Great men make indeed individual contributions to the knowledge of their times but they can never transcend the age in which they live The questions they try to answer will always be those their contemporaries are asking their statement of fundamental problems will always be relative to the traditional statements that have been handed down to them When they are stating what is most startlingly new they will be most likely to put it in an old fashioned form and to use the inadequate ideas and formulae of tradition to express the deeper truths towards which they are feeling their way They will be most the children of their age when they are rising most above it      **The Social Contract and Discourses** Jean-Jacques Rousseau,1913
