The concepts of social psychology

To improve social dynamics and overall wellbeing, social psychology works to examine the behaviours of an individual and the group around them.

The Processes Involved

The goal is to encourage individuals to act on their own merit and when analysing behavioural changes, the following concepts are first explored.

01. Social Influence

In order to seek acceptance, the opinions of a group can influence a person's behaviour and thoughts.

- **Conformity**
  Change of opinion or behaviour based on perceived pressure
- **Compliance**
  Openly agreeing to a group but privately disagreeing
- **Obedience**
  Behaviour is influenced by social power and authority
- **Minority performance**
  The minority influences the majority for acceptance

02. Group Behaviour

A person's decision making and actions can be influenced within a large or small group. Group dynamics can be factored into the following areas of behaviour

- **Group think**
  Making a decision in a group dynamic
- **Group shift**
  Change in opinion when surrounded by like-minded people
- **Deindividualisation**
  When a person solely goes along with the group's opinion

03. Social Cognition

Within a social context, individuals tend to put importance on what others think and how they behave. Social cognition explores the processes involved in the perception of social stimuli to predict behaviours.

- **Processing**
  Making sense of their environment through observation
- **Storing**
  Remembering and interpreting social behaviours
- **Applying**
  Forming an impression of another and responding
