## **Social Science Research For Agricultural Technology Development:**

**Social Science Perspectives on Managing Agricultural Technology ,      Proceedings of the Workshop on Social Science Research and the CRSP's ,1993      Social Sciences And Farming Systems Research** Jeffrey R Jones,Ben J Wallace,Robert Booth,Robert E Rhoades,2019-07-11 The publication of this book has required the cooperation of many people along the way From its very conception the project of bringing together experiences from ongoing Farming Systems Research projects has faced a problem of communication due to the dispersal of the participants Dr William Partridge and Lynne Goldstein were instrumental in the initial presentation of the symposium on Social Science participation in Farming Systems Research at the 83rd Annual Meeting of the American Anthropological Association Ben Wallace has done an admirable job not only as editor but as a linchpin in an throughout the process of organizing the conference and preparing the manuscript He deserves credit for expediting countless activities that could never have otherwise been accomplished because of the vagaries of international mails and telecommunications      *Publications of the International Agricultural Research and Development Centers ,1989      Agricultural R and D in the Developing World* Philip G. Pardey,Julian M. Alston,Roley Piggott,2006 The world's agricultural economy was transformed remarkably during the 20th century The agricultural productivity growth that fueled this change was generated primarily by agricultural R D financed and conducted by a small group of rich countries especially the United States but also Japan Germany and France In an increasingly interdependent world both rich and poor countries have depended on agricultural research conducted in the private and public laboratories of these few countries even if they have not contributed to financing the activity But now the rich country research agendas are shifting In particular they are no longer as interested in simple productivity enhancement Dietary patterns and other priorities change as incomes increase Food security concerns are still pervasive among poor people predominantly in poor countries In rich countries we see a declining emphasis on enhancing the production of staple foods and an increasing emphasis on enhancing certain attributes of food such as growing demand for processed and so called functional foods and on food production systems such as organic farming humane livestock production systems localized food sources and fair trade coffee In addition to growing differences between rich and poor countries in consumer demand for innovation research agendas may diverge because of differences in producer and processor demands Farmers in rich countries are demanding high technology inputs that often are not as relevant for subsistence agriculture such as precision farming technology or other capital intensive methods As well as differences in value adding processes to serve consumer demands differences in farm production technologies are emerging to serve the evolving agribusiness demands for farm products with specific attributes for particular food feed energy medical or industrial applications The purpose of this volume is to document the changing institutions and investments in agricultural R D in less developed countries in part to form a companion volume to *Paying for Agricultural Productivity* by providing a more complete global picture of the issues      *Farming Systems Research*
