**Confronting American Labor** Jeffrey W. Coker,2002 Confronting American Labor traces the development of the American left from the Depression era through the Cold War by examining four representative intellectuals who grappled with the difficult question of labor's role in society Since the time of Marx leftists have raised over and over the question of how an intelligentsia might participate in a movement carried out by the working class Their modus operandi was to champion those who suffered injustice at the hands of the powerful From the late nineteenth through much of the twentieth century this meant a focus on the industrial worker The Great Depression was a time of remarkable consensus among leftist intellectuals who often interpreted worker militancy as the harbinger of impending radical change While most Americans waited out the crisis listening to the assurances of President Franklin D Roosevelt the Marxian left was convinced that the crisis was systemic Intellectuals who came of age during the Depression developed the view that the labor movement in America was to be the organizing base for a proletariat Moreover many came from working class backgrounds that contributed to their support of labor

*Gendered Fields* Diane Bell,Pat Caplan,Wazir Jahan Karim,2013-07-23 Virtually all anthropologists undertaking fieldwork experience emotional difficulties in relating their own personal culture to the field culture The issue of gender arises because ethnographers do fieldwork by establishing relationships and this is done as a person of a particular age sexual orientation belief educational background ethnic identity and class In particular it is done as men and women Gendered Fields examines and explores the progress of feminist anthropology the gendered nature of fieldwork itself and the articulation of gender with other aspects of the self of the ethnographer

*Getting the Most Out of the Research Experience* Brian Roberts,2007-04-06 Brian Roberts takes the researcher through the research process answering the practical and subjective questions anyone will face on issues like entering the field and emotional aspects of research types of research and associated experiences writing and research blocks and research confessions

Quantity and Quality in Social Research Alan Bryman,2003-09-01 This book focuses upon the debate about quantitative and qualitative research which took root in the 1960s although many of the central themes go back centuries The basic terms of the debate have been felt in many of the disciplines which make up the social sciences especially sociology social psychology education research organization studies and evaluation research

Beyond the Happening Catherine Spencer,2020-06-01 Beyond the Happening uncovers the heterogeneous uniquely interdisciplinary performance based works that emerged in the aftermath of the early Happenings By the mid 1960s Happenings were widely declared outmoded or even dead but this book reveals how many practitioners continued to work with the form during the late 1960s and 1970s developing it into a vehicle for studying interpersonal communication that simultaneously deployed and

questioned contemporary sociology and psychology Focussing on the artists Allan Kaprow Marta Minuj n Carolee Schneemann and Lea Lublin it charts how they revised and retooled the premises of the Happening within a wider network of dynamic international activity The resulting performances directly intervened in the wider discourse of communication studies as it manifested in the politics of countercultural dropout soft power and cultural diplomacy alternative pedagogies sociological art and feminist consciousness raising

**The Americanization of Social Science** David Haney,2008-01-28 A highly readable introduction to and overview of the postwar social sciences in the United States The Americanization of Social Science explores a critical period in the evolution of American sociology s professional identity from the late 1940s through the early 1960s David Paul Haney contends that during this time leading sociologists encouraged a professional secession from public engagement in the name of establishing the discipline s scientific integrity According to Haney influential practitioners encouraged a willful withdrawal from public sociology by separating their professional work from public life He argues that this separation diminished sociologists capacity for conveying their findings to wider publics especially given their ambivalence towards the mass media as witnessed by the professional estrangement that scholars like David Riesman and C Wright Mills experienced as their writing found receptive lay audiences He argues further that this sense of professional insularity has inhibited sociology s participation in the national discussion about social issues to the present day

**On Becoming a Social Scientist** Shulamit Reinharz,2017-07-12 This autobiographical analysis of the many difficult issues dilemmas choices and adjustments involved in becoming a social scientist highlights the strengths and limitations of two principal research methods survey research and participant observation It emphasizes how these research methods are actually experienced in contrast to how they are ideally described in texts

**Mass Media Writing** Elise K. Parsigian,2013-11-05 This innovative book is the first to identify and describe the systematic process that drives the day to day work of writers in the real world of print and broadcast journalism public relations and advertising The key to creative problem solution for both simple and complex assignments in media work is engagingly detailed in this thought provoking guide Users of this book will learn how to fulfill assignments and write copy that meets an editor s or client s expectations speaks to the intended audience stands up to question and remains in memory The author skillfully blends tested processes from science and art to equip the student with the tools of self management and the techniques of disciplined creativity that defend against erroneous judgment Recognizing the role of problem solving in media and the primacy of critical thinking at all stages of the writing process from preparatory measures to final writing the author challenges the assumption that discipline and creativity are incompatible partners That partnership is described in detail then dramatized with absorbing examples and illustrations drawn from interviews with experienced practitioners in print and broadcast journalism public relations and advertising Each chapter is a discovery of how this reliable partnership for solving writing problems in media applies to both anticipated and unexpected communication situations Making known what media professionals have learned

through trial and error on the job here is a thinking and writing dynamic that students new hires and aspiring free lancers can now acquire before entering the world of print or broadcast journalism public relations or advertising

**Fieldwork in Educational Settings** Sara Delamont, 2002-11-01 Extensively revised and updated this new edition of Fieldwork in Educational Settings will be welcomed by researchers and academics in education and the social sciences Embracing both sociological and anthropological approaches to qualitative research the book covers education inside and beyond schools It emphasises writing up ethnographic research and getting the project finished and is packed with examples from research in progress This new edition brings the original text right up to date for new researchers There is an additional chapter on computer software for data handling and attention is given to the implications of postmodernism for writing up research The examples given are taken from the latest research replacing those from the first edition This is an indispensable handbook by an author whose work on this subject is widely recognised as being an essential resource for the researcher in education

**The Ethics Rupture** Will C. van den Hoonaard, Ann Hamilton, 2016-01-01 For decades now researchers in the social sciences and humanities have been expressing a deep dissatisfaction with the process of research ethics review in academia Continuing the ongoing critique of ethics review begun in Will C van den Hoonaard s Walking the Tightrope and The Seduction of Ethics The Ethics Rupture offers both an account of the system s failings and a series of proposals on how to ensure that social research is ethical rather than merely compliant with institutional requirements Containing twenty five essays written by leading experts from around the world in various disciplines The Ethics Rupture is a landmark study of the problems caused by our current research ethics system and the ways in which scholars are seeking solutions

**EBOOK: FOR EDUCATION** Wilfred Carr, 1995-02-16 A recent review of his work describes Wilfred Carr as one of the most brilliant philosophers now working in the rich British tradition of educational philosophy His work is rigorous refreshing and original and examines a number of fundamental issues with clarity and penetration In For Education Wilfred Carr provides a comprehensive justification for reconstructing educational theory and research as a form of critical inquiry In doing this he confronts a number of important philosophical questions What is educational theory What is an educational practice How are theory and practice related What is the role of values in educational research Is a genuinely educational science possible By appealing to developments in critical theory the philosophy of science and the philosophy of the social sciences Wilfred Carr provides answers to these questions which vindicate the idea of an educational science that is not on or about education but for education a science genuinely committed to promoting educational values and ideals

**Key Themes in Qualitative Research** Paul Atkinson, Amanda Coffey, Sara Delamont, 2004-01-01 Key Themes in Qualitative Research is an attempt by three well respected ethnographic researchers to present a balanced view of qualitative methodology and research The book is structured around classic texts written by methodological pioneers which comprise the basic foundation of modern qualitative research The authors examine key premises in these texts such as intimacy advocacy and validity and how they

may be supported redesigned or made problematic in today's field. This allows for a critical analysis of Old Guard vs Avant Garde ideas and provides for the reader a guide to wade through the proliferation of texts and theories available since the postmodern turn. While not designed as a primer in qualitative research methods, anyone with modest experience in the field should find this book extremely useful.
