Sendak, Neil K. Huyler, 1994 Under the Vermont Use Value Appraisal UVA Forest Land Program enrolled forest lands are taxed at their forest use value rather than their fair market value Technical forestry aspects including approval of a mandatory management plan are administered by the Vermont Department of Forests Parks and Recreation Our objectives were to use data collected by the Department to estimate the annual timber harvest from lands enrolled in the UVA Tax Program and to explore relationships among management variables and harvest information for individual stands Overall 31 percent of UVA properties reported a commercial harvest during 1989 In total the harvest on enrolled lands represented 18 percent and 24 percent respectively of the reported total sawlog and pulpwood fuelwood harvest in Vermont in 1989 while enrolled lands represented about 16 percent of the total timberland in the State However there were no significant relationships among stand and harvest variables that would be useful in predicting harvesting activity The UVA Tax Program gives the State some

influence over forestry activity on privately owned timberland that it did not have prior to the Program Research Paper The Psychology of Social Status Joey T. Cheng, Jessica L. Pryor, 1999 A holistic sociological approach that explores why offenders sexually abuse children The sexual abuse of children is one of the most morally unsettling and emotionally inflammatory issues in American society today It has been estimated that roughly one out of every four girls and one in ten boys experience some form of unwanted sexual attention either inside or outside the family before they reach adulthood How should society deal with the sexual victimization of children Should known offenders be released back into our communities If so where and with what rights should they be allowed to live In Unspeakable Acts Douglas W Pryor argues that much of this debate designed to deal with abusers after they have offended ignores the important issue of why men cross these forbidden sexual boundaries to molest children in the first place and how the behavior can possibly be prevented before it starts Incorporating in depth interviews with more than thirty convicted child molesters Pryor explores how men become involved with breaking sexual boundaries with children He looks at how their lives prior to offending contributed to and led up to what they did the ways that initial interest in sex with children began the tactics offenders employed to molest their victims over time how they felt about and reacted to their behavior between offending episodes and how they were ultimately able to stop The author expands our understanding of this often reviled little understood group leaving us with the uneasy conclusion that the moral wall separating us from what is defined as extreme sick behavior is not as opaque as we would like to believe Getting Real About Race Stephanie M.
