

SPIDER BITES

Medical Dictionary

Etymology: *spider*, *bite*

A bite inflicted by a spider, usually a venomous one.

See also: *spider bite*

Spider bites are usually painless and go unnoticed. However, some spiders are venomous and can cause serious health problems. The most common venomous spider bite is from the black widow spider. This spider is found in the southern United States and is known for its red hourglass-shaped mark on its abdomen. Bites from this spider can cause severe pain, muscle cramps, and in some cases, death. Other venomous spiders include the brown recluse and the tarantula. Bites from these spiders can also cause serious health problems. If you suspect you have been bitten by a venomous spider, seek medical attention immediately.
