religion has influenced the corporate structuring and commercial orientation of American society Porterfield begins her story in ancient Rome She traces the development of corporate organization through medieval Europe and Elizabethan England and then to colonial North America where organizational practices derived from religion infiltrated commerce and commerce led to political independence Left more to their own devices than under British law religious groups in the United States experienced unprecedented autonomy that facilitated new forms of communal governance and new means of broadcasting their messages As commercial enterprise expanded religious organizations grew apace helping many Americans absorb the shocks of economic turbulence and promoting new conceptions of faith spirit and will power that contributed to business Porterfield highlights the role that American religious institutions played a society increasingly dominated by commercial incorporation and free market ideologies She also shows how charitable impulses long nurtured by religion continued to stimulate reform and demand for accountability

THE POSTMODERN CHALLENGE TO THE THEORY AND PRACTICE OF EDUCATIONAL ADMINISTRATION

2003-01-01, 2003-01-01 Based on nearly a decade of scholarship this is a highly focused book on the implications of postmodernism for the construction and assessment of theory and practice in educational administration Current ideas of practice are deconstructed from the notions of sound research to the use of national standards in the preparation of educational leaders along with ways of examining and resolving the theory practice gap Part One of the book contains chapters dealing with the rise of postmodernism and describes its broad based dissent from a century of thought in the field including a penetrating examination of whether the concept of a field itself is viable Part Two of the book explores the many ramifications of postmodernism to practice beginning with ideas concerning educational research These chapters tackle the tough issues of the efficacy of the Interstate Leaders Licensure Standards ISLLC and the national exam as examples of job deskilling and deprofessionalization in the guise of raising standards of preparation of future educational leaders Other

chapters deal with deconstructing the popular managerial ideas contained in Stephen Covey's works and dispute Joe Murphy's call for a new center of gravity in the field as reinforcing the status quo. Finally, the book tackles the issue of the theory-practice gap and indicates that new and progressive theories which anticipate problems of practice are what is required to deal with this persistent issue. The book contains many helpful exhibits in understanding the issues concerning theory and practice as well as a glossary of terms most commonly found in postmodern discourse. This book is designed for college and university programs engaged in the preparation of educational leaders for elementary secondary schools and college administrative positions.

The Chinese Liberal Spirit Xu Fuguan, 2022-04-01 Xu Fuguan (1903-1982) was one of the most important Confucian scholars of the twentieth century. A key figure in the Nationalist Party, Xu was involved in the Chinese civil war after World War II and in the early years of the Nationalist government in Taiwan. He never ceased to believe that democracy was the way forward for the Chinese nation. Making his ethical and political thought accessible to English-speaking readers for the first time, these essays analyze the source of morality and how morality must be realized in democratic government; they also provide a sharp contrast to the claim that democracy is not suitable for China or that Confucian government should be meritocracy, not democracy. They also share the reflections of a man who lived through the Chinese revolution and remained strongly critical of the governments in both the People's Republic of China and Taiwan.
