Spoils Of Famine Ethiopian Famine Policy And Peasant Agriculture:

The Spoils of Famine Jason W. Clay, Sandra Steingraber, Peter Niggli, 1988 **The Political Economy of African Famine** R. E. Downs, Donna O. Kerner, Stephen P. Reyna, 2019-07-19 Originally published in 1991 This volume explores the combination of political and economic forces that influence different levels of food supply The book begins with a discussion of famine theories ranging from cultural ecology to neo Marxism Following this survey is a series of essays by anthropologists geographers economists and development practitioners that explores the role of Western institutions in African famine analyzes famine in particular countries and documents the relationship between famine and gender This book takes an unusually broad look at famine by including analyses of countries where hunger has rarely been studied and by examining African famine from both African and Western perspectives Its concluding proposals for eradicating famine make innovative and provocative contributions to current global debates on food and nutrition *Enough with Famines in Ethiopia* Fassil G. Kiros, 2005 When in 2002 03 Ethiopia was ushered into the twenty first century by the threat of famine of unprecedented proportion it stirred a deeply felt reaction to call on policy makers and ordinary citizens to raise arms against a scourge which has afflicted their country throughout its long history The announcement of the threat of famine amounted to a virtual acknowledgement that the country s past national development goal has been little more than a pipe dream For no claim of development can be made in the face of the prospect of mass starvation It is proposed that a new start is needed in Ethiopia in the pursuit of the goal of lasting food security and the prevention of recurrent famine one which can at times put to question the conventional development wisdom and calls for a commitment to certain key principles which can help prevent the repetition of past failures while at the same time providing the foundation for future progress It is argued that lasting food security can only be achieved by means of an interactive development process involving the sustainable development of agriculture and an increasingly diversified national economy In concluding the main questions which may likely concern many people are addressed directly Wherefrom are the investment resources to be obtained and where the capacities are to be summoned to promote the scale and tempo of the development envisaged Examples are offered of the types of measures which could be considered in response to the future development challenges Ultimately both the ends of development and the means by which they might be attained must derive impetus from the cravings and drive for accomplishment of ordinary people acting individually or collectively in the pursuit of their common interests The primary instrument for unleashing this potential belongs to the political realm *Routledge Library Editions: Food Supply and Policy* Various, 2021-08-29 Reissuing works originally published between 1952 and 1999 this set provides a wide spread of scholarship on issues surrounding food provision throughout the world The earlier books look at import and export changes during times when previous trade routes and options changed while later ones mostly consider food assistance policies poverty and famine and welfare These books cover third world studies economics anthropology politics environment

agriculture and population studies as well as food and nutrition *Ethiopia, the Politics of Famine* James Finn, 1990 War famine pestilence and doctrinaire Marxist Leninist dictatorship these are the four horsemen of modern Ethiopia's particular apocalypse They have combined with one another into a brew more poisonous even than the sum of its parts Just how a people of such ancient culture and proud history and of such intelligence and sophistication could have come to this sad fate requires some words of explanation That the name Ethiopia has over the past two decades become synonymous with starvation civil war and man's massive inhumanity to his fellow man is a source of deep pain to Ethiopians everywhere or those in the growing Ethiopian diaspora as much as to those who remain within Ethiopia's borders and of bewilderment and puzzlement to others There must be a reason for it This volume the result of a recent symposium that included two very distinguished former high officials of the Mengistu regime provides much of the answer *Resettlement and Famine in Ethiopia* Alula Pankhurst, 1992 This book is the inside story of the Ethiopian resettlement programme carried out in the mid 1980s by the Ethiopian government amid fierce international controversy It relies on the views of the settlers themselves and is based on an in depth study carried out by an anthropologist who lived in a resettlement village Alula Pankhurst dispels current myths about resettlement while showing the importance of famine and coercion he highlights social factors in the mosaic of settlers motivation He documents the attempt to institute a collectivist model of agriculture and analyses the reasons for its failure He also examines the effects of Ethiopia's recent economic liberalisation and the impact of aid agencies The book addresses an increasing Third World phenomenon state organised relocation It is a major contribution to the literature on mass migration and on refugees By focusing on the interaction between people and the state it also reassesses a fundamental development problem the gulf between local and national priorities Accessible and thought provoking Resettlement and famine in Ethiopia will be of interest to anthropologists students of development studies and practitioners and all those concerned by famine forced migration and socialist attempts to transform societies Medical Anthropology in Ecological Perspective Ann McElroy, 2018-04-19 Global environmental change and recent worldwide infectious disease outbreaks make the ecological perspective of medical anthropology more important a field of study than ever In this premier teaching text authors Ann McElroy and Patricia K Townsend integrate biocultural environmental and evolutionary approaches to the study of human health providing a complete and authoritative ecological perspective that is essential for interpreting medical anthropology Research by biological anthropologists archaeologists and paleopathologists illuminates the history and prehistory of disease along with coverage of contemporary health issues both local and global This sixth edition is thoroughly revised and updated with expanded discussion on the interaction of environment and infectious disease new material on climate change globalization and the effects of war on physical and mental health and an entirely new chapter on ethics in community health and medical anthropology Medical Anthropology in Ecological Perspective captures the essentials of the discipline and covers its ever changing topics trends and developments in an engaging accessible way

Human Rights Mark Goodale, 2008-10-20 This innovative reader brings together key works that demonstrate the important and unique contributions anthropologists have made to the understanding and practice of human rights over the last 60 years Draws on a range of intellectual and methodological approaches to reveal both the ambiguities and potential of the postwar human rights project Brings together essays by both contemporary luminaries and seminal figures to provide a rich introduction to the subject Supplemented with selected international human rights documents and links to websites on human rights

Environmental Health in Emergencies and Disasters Ben Wisner, John Adams, 2002 Aimed at practitioners policymakers and researchers this volume distills knowledge of environmental health during an emergency or disaster It draws on results from the International Decade for Natural Disaster Reduction and experience with sustainable development between the two Earth Summits

Coming Home? Lynel D. Long, Ellen Oxfeld, 2017-06-16 Few things weigh on the human spirit more heavily than a sense of place the lands we live in and return to have a profound ability to shape our notions of home and homeland not to mention our own identities The pull of the familiar and the desire to begin anew are conflicting impulses for the nearly 180 million people who live outside their countries of origin often with the expectation of returning home Of 30 million people who immigrated to the United States alone between 1900 and 1980 10 million are believed to have returned to their homelands While migration flows occur in both directions surprisingly few studies of transnationalism global migration or diaspora address return experiences Undertaking a comparative analysis of how coming home affects individuals and their communities in a myriad cultural and geographic settings the contributors to this volume seek to understand the unique return migration experiences of refugees migrants and various others as they confront the social pressures and a sense of displacement that accompany their journeys The returns depicted in *Coming Home* range from temporary visits to permanent repatriation from voluntary to coerced movements and from those occurring after a few years of exile to those after several decades away The geographic sites include the Balkans Barbados China Eritrea Ethiopia Germany Nicaragua the Philippines Rwanda and Vietnam Several studies portray the experiences of returning refugees who earlier fled war and violence while others focus on economic or labor migrants As the essays show connections between permanent returnees and home communities are contentious and complex On the one hand issues of land title property rights political orientation and religious and cultural beliefs and practices create grounds for clashes between returnees and their home communities but on the other returnees bring with them a unique ability to transform local practices and provide new resources
