Perspectives on Spoken Discourse James Rock, Caterina Pavesi, Pierfranca Forchini, 2014-03-26 This book written for both teachers of English and

advanced language students presents research related to spoken discourse carried out by three linguists from the Università Cattolica del Sacro Cuore. The book opens with an article by James Rock on the Common European Framework of Reference and its relevance to the concept of communicative competence and the practice of learning spoken English within the university context. In his second article, Rock presents an overview of studies on phraseology in the non-native speaker setting and shows that initial interest in phraseology in the field of language acquisition highlighted the fact that native-like fluency does not stem so much from knowledge of grammatical rules as from features of idiomaticity. In the third paper in the collection, Caterina Pavesi examines learner English written on the computer and seeks to ascertain the status of this English on the written-spoken continuum. Learner English has been the object of a great deal of scholarly attention in recent decades but it has not yet been studied in any great depth in its computer-mediated form. The fourth article in the book examines the language of films, traditionally considered to be an artificial form of language not representative of speech and thus of little value in the study of spoken discourse. In direct contrast with this view, Pierfranca Forchini shows that empirical research on American movies transcribed by her actually proves that the language of movies is extremely similar to conversation along several parameters. Adopting Biber's analytical method, Multi-Dimensional Analysis, which attaches a score to features of language and measures the occurrence of these features, grouping them into dimensions which can describe different types of discourse, Forchini shows that movie language is surprisingly similar to conversational discourse on four out of five dimensions, thus overturning the long-held view of the status of this type of language and providing scientific justification for using movies to teach features of spoken discourse. The research was presented at the Università Cattolica del Sacro Cuore in Brescia in October 2013 under the auspices of and with the support of the Centro Linguistico dell'Università Cattolica CLUC.

Spoken Discourse Rodney Jones, 2016-07-28. This book provides an overview of current theories of and methods for analysing spoken discourse. It includes discussions of both the more traditional approaches of pragmatics, conversation analysis, interactional sociolinguistics, linguistic anthropology and critical discourse analysis and more recently developed approaches such as multimodal discourse analysis and critical sociolinguistics. Rather than treating these perspectives as mutually exclusive, the book introduces a framework based on principles from mediated discourse analysis in which different approaches to spoken discourse are seen as complementing and informing one another. In this framework, spoken discourse is seen as mediated through a complex collection of technological, semiotic and cultural tools which enable and constrain people's ability to engage in different kinds of social actions, enact different kinds of social identities and form different kinds of social relationships. A major focus of the volume is on the way technological tools like telephones, broadcast media, digital technologies are changing the way people communicate with spoken language. The book is suitable for use as a textbook in advanced courses in discourse analysis and language in social interaction and will also be of interest to scholars in a variety of fields including linguistics, sociology, media studies and anthropology.

Lexical Phrases and Language Teaching James R.

Nattinger, Jeanette S. DeCarrico, 1992-09-03 Presents a language teaching programme based on the use of prefabricated language. The authors show that the unit of language they term the lexical phrase can serve as an effective basis for both second and foreign language learning. **Spoken Discourse** Willis Edmondson, 1981 **A Grammar of Spoken English Discourse** Gerard O'Grady, 2010-10-07 David Brazil's pioneering work on the grammar of spoken discourse ended at A Grammar Of Speech 1995 due to his untimely death. Gerard O'Grady picks up the baton in this book and tests the description of used language against a spoken corpus. He incorporates findings from the last decade of corpus linguistics study notably concerning phrases and lexical items larger than single orthographic words and ellipsis. He demonstrates the added communicative significance that the incorporation of two systems of intonation Key and Termination bring to the grammar. O'Grady reviews the literature and covers the theory before moving on to a practical analytic section. His final chapter reviews the arguments, maps the road ahead and lays out the practical applications of the grammar. The book will be of great interest to researchers in applied linguistics, discourse analysis and also EFL/ESL. Children's Comprehension Problems in Oral and Written Language Kate Cain, Jane Oakhill, 2008-05-07 Comprehension is the ultimate aim of reading and listening. How do children develop the ability to comprehend written and spoken language and what can be done to help those who are having difficulties? This book presents cutting edge research on comprehension problems experienced by children without any formal diagnosis as well as those with specific language impairment, autism, ADHD, learning disabilities, hearing impairment, head injuries and spina bifida. Providing in depth information to guide research and practice, chapters describe innovative assessment strategies and identify important implications for intervention and classroom instruction. The book also sheds light on typical development and the key cognitive skills and processes that underlie successful comprehension.

Vocabulary in a Second Language Paul Bogaards, Batia Laufer-Dvorkin, 2004-01-01 The eleven chapters of Vocabulary in a Second Language are written by the world's leading researchers in the field of vocabulary studies in second language acquisition. Each chapter presents experimental research leading to new conclusions about and insights into the selection, the learning and teaching of, or the testing of vocabulary knowledge in foreign languages. This book is intended as an up to date overview of the important domain of the lexicon for researchers in the field of second language acquisition, teacher trainers and professional teachers of second or foreign languages.
