Larry Kaufmann, 2014-11-07 Grandmaster Larry Kaufman presents a very effective way for White to disrupt the plans and demolish the position of players on the black side of the popular Grünfeld Defence The repertoire Kaufman recommends leaves Black the unpleasant choice of either facing a well prepared opponent ready for immediate attack or ending up in an altogether different opening which is not going to leave him very happy the Saemisch variation of the King's Indian This aggressive approach which has sometimes been called the Alekhine Anti Grünfeld should appeal to amateurs while being sound enough for elite players to employ Kaufman clearly lays out the strategic concepts as well as the concrete variations and presents a wealth of new resources for both White and Black *The Agile London System* Alfonso Romero Holmes, Oscar de Prado, 2016-10-15 It is not difficult to understand why The London System is such a popular chess opening with club players all over the world Against virtually every Black defence after 1 d4 it offers White an easy to learn and reliable set of lines with interesting choices between strategic or more aggressive approaches while avoiding tons of opening theory Lately an increasing number of Grandmasters such as Alexander Grischuk Gata Kamsky Baadur Jobava Richard Rapport and even World Champion Magnus Carlsen have played The London System In this light it is surprising that so little has been published about this fascinating universal weapon GM Alfonso Romero and FM Oscar de Prado have now filled this gap In *The Agile London System* they present both historical material and recent top level examples to provide a comprehensive overview The authors explain the typical plans and tactics using illustrative games with clear verbal explanations and provide lots of tactical and strategic exercises They reveal the secrets behind sharp ideas such as the Barry Attack and the Jobava Attack and have added an exciting chapter on the especially aggressive Pereyra Attack developed by the Argentinean master Manuel Pereyra Puebla Chess Genius: Unveiling the Art of Attack Pasquale De Marco, 2025-04-24 In the captivating world of chess where strategy and brilliance collide there exists an electrifying style of play that has captivated players and spectators alike for centuries attacking chess This dynamic and aggressive approach to the game is characterized by a

Kaufman's New Repertoire for Black and White Larry Kaufmann, 2019-10-29

Seven years after his acclaimed and bestselling *The Kaufman Repertoire for Black and White*, Grandmaster Larry Kaufman is back with his new repertoire book covering the entire scope of chess openings in one volume. Two important developments made this new book necessary: Larry Kaufman, who routinely himself plays the lines he advocates, discovered that after 1 d4 the recommendation in his previous book it became nearly impossible to show a consistent advantage for White, especially against the Gruenfeld and the Nimzo-Ragozin defenses. The other factor was that chess engines have become so much stronger in recent years. Komodo, the top chess engine that computer expert Kaufman helped develop, is now able to apply the celebrated Monte Carlo Tree Search algorithm. With Komodo MCTS, it is now possible to abandon lines that may be theoretically best against other computers and instead choose lines that are likely to succeed in actual practice against strong human opponents. Larry Kaufman presents a completely new White repertoire with 1 e4 aiming for an objective advantage in the simplest practical manner. You are presented with two options while you don't have to play the sharpest lines. The Black repertoire has been thoroughly revised and updated, with some crucial chapters replaced. Kaufman's *New Repertoire for Black and White* is the first opening book that is primarily based on Monte Carlo search. The highly original analysis has resulted in many improvements on existing theory. This is a ready-to-go and easy-to-digest repertoire with sound practical lines that do not outdate rapidly and are suitable for masters while accessible for amateurs.
