Ecology of Desert Rivers Richard Kingsford, 2006-06 Summarises current understanding of desert river ecology and its dependence on unpredictable river flows *Les ailes du Sahel* Le Zwarts, Rob G. Bijlsma, Jan van der Kamp, Eddy Wymenga, 2014-04-14 Living on the Edge examines the function of the Sahel region of Africa as an important wintering area for long distance migrant birds It describes the challenges the birds have to cope with climate change of course and rapid man made habitat changes related to deforestation irrigation and reclamation of wetlands How have all these changes affected the birds and have birds adapted to these changes Can we explain the changing numbers of breeding birds in Europe by changes in the Sahel or vice versa Winner of the BB BTO Best Bird Book Award 2010 The Jury commented It is a tremendous book in every department It marks a step change in our knowledge of the ecology of this critically important region in the European African migration system and of the many species familiar to us on their breeding grounds that winter there The authors combine the latest scientific information with vivid descriptions of landscapes and animals Their book is richly illustrated with large numbers of drawings maps and photographs by acclaimed experts The wealth of coloured graphics has been particularly well thought out and encourages readers to delve into the figures and learn more about the region rather than having the all too common opposite effect Summing up the jury praises not just the high quality of the texts the information and the illustrations but also the sheer pleasure of reading the book One of the key attributes of a good book is to be able to grip the reader s attention and transport him or her to another place We feel confident that Living on the edge will have that effect **The Economic Importance of Wild Resources in the Hadejia-Nguru Wetlands, Nigeria** Derek Eaton, Marie-Thérèse Sarch, 1997 **Wetland Management** R. A. Falconer, P. Goodwin, 1994 In recent years there has been growing concern about the management of wetlands particularly in the USA and increasingly in Europe These wetlands ranging from a small harbour such as Christchurch in the UK to the large mangrove swamps of Malaysia are natural resources which require comprehensive management Whilst considerable research has been undertaken and documented on the management of wetland ecosystems little emphasis has been focused on the geomorphic hydraulic and hydrologic behaviour of wetlands and the consequent implications for practical management solutions Living on the Edge Le Zwarts, Rob G. Bijlsma, Jan van der Kamp, Eddy Wymenga, 2016-10-18 Living on the Edge examines the function of the Sahel region of Africa as an important wintering area for long distance migrant birds It describes the challenges the birds have to cope with climate change of course and rapid man made habitat changes related to deforestation irrigation and reclamation of wetlands How have all these changes affected the birds and have birds adapted to these changes Can we

explain the changing numbers of breeding birds in Europe by changes in the Sahel or vice versa Winner of the BB BTO Best Bird Book Award 2010 The Jury commented It is a tremendous book in every department It marks a step change in our knowledge of the ecology of this critically important region in the European African migration system and of the many species familiar to us on their breeding grounds that winter there The authors combine the latest scientific information with vivid descriptions of landscapes and animals Their book is richly illustrated with large numbers of drawings maps and photographs by acclaimed experts The wealth of coloured graphics has been particularly well thought out and encourages readers to delve into the figures and learn more about the region rather than having the all too common opposite effect Summing up the jury praises not just the high quality of the texts the information and the illustrations but also the sheer pleasure of reading the book One of the key attributes of a good book is to be able to grip the reader's attention and transport him or her to another place We feel confident that *Living on the edge* will have that effect Good practices and lessons learned in integrating ecosystem conservation and poverty reduction objectives in wetlands, 2008

An International Perspective on Wetland Rehabilitation W.J. Streever, 2012-12-06 Bill Streever author of *Bringing Back the Wetlands* and numerous technical articles about wetland restoration and creation worked for two years to bring together this collection of papers Authors ranging from private landowners to government managers to scientists present regional overviews case studies and discussions of various issues Regional overviews cover areas as small as the Commonwealth of the Northern Mariana Islands to areas as large as Australia and Africa Case studies range from relatively small projects such as rehabilitation of damage caused by wheel ruts in the high arctic to much larger projects such as attempts to rehabilitate thousands of hectares of Northern Territory wetlands in Australia Seedbank ecology economics remote sensing community involvement the role of the wetland consulting industry and other issues are discussed In an effort to synthesize information from around the world Joy Zedler presents a model that allows comparison of projects and may lead to better predictability of project outcomes In *An International Perspective on Wetland Rehabilitation* authors describe planting engineered structures prescribed flooding excavation and other rehabilitation methods from Israel to New Zealand to the Netherlands and elsewhere For the first time one volume offers an impression of the magnitude and diversity of the field of wetland rehabilitation around the globe

Wetlands, agriculture and poverty reduction McCartney, Matthew, Rebelo, Lisa-Maria, Senaratna Sellamuttu, Sonali, de Silva, Sanjiv, 2010 In many places growing population in conjunction with efforts to increase food security is escalating pressure to expand agriculture within wetlands The environmental impact of wetland agriculture can have profound social and economic repercussions for people dependent on ecosystem services other than those provided directly by agriculture If wetlands are not used sustainably the functions which support agriculture as well as other food security and ecosystem services are undermined This report synthesizes findings from multidisciplinary studies conducted into sustainable wetland agriculture by IWMI and partners in Africa and Asia It highlights the value of wetland

agriculture for poverty reduction as well as the need for more systematic planning that takes into account trade offs in the multiple services that wetlands provide Capitalizing on Nature Edward B. Barbier, 2011-09-08 The basic unit of nature the ecosystem is a special form of wealth which we can think of as a stock of natural capital However perhaps because this capital is free we have tended to view it as limitless abundant and always available for our use exploitation and conversion Capitalizing on Nature shows how modeling ecosystems as natural capital can help us to analyze the economic behavior that has led to the overuse of so much ecological wealth It explains how this concept of ecosystem as natural capital sheds light on a number of important issues including landscape conversion ecological restoration ecosystem resilience and collapse spatial benefits and payments for ecosystem services The book concludes by focusing on major policy challenges that need to be overcome in order to avert the worsening problem of ecological scarcity and how we can fund novel financing mechanisms for global conservation **Wetland Management and Sustainable Livelihoods in Africa** Adrian Wood, Alan

Dixon, Matthew McCartney, 2013-06-19 In this book the authors argue for a paradigm shift in the way African wetlands are considered Current policies and wetland management are too frequently underpinned by a perspective that views agriculture simply as a threat and disregards its important contribution to livelihoods In rural areas where people are entrenched in poverty wetlands in particular wetland agriculture have a critical role to play in supporting and developing peoples livelihoods Furthermore as populations rise and climate change takes grip they will be increasingly important The authors argue that an approach to wetland management that is much more people focused is required That is an approach that instead of being concerned primarily with environmental outcomes is centred on livelihood outcomes supported by the sustainable use of natural wetland resources The authors stress the need for Integrated Water Resource Management and landscape approaches to ensure sustainable use of wetlands throughout a river catchment and the need for wetland management interventions to engage with a wide range of stakeholders They also assess the feasibility of creating incentives and value in wetlands to support sustainable use Drawing on nine empirical case studies this book highlights the different ways in which sustainable use of wetlands has been sought each case focusing on specific issues about wetlands agriculture and livelihoods *Handbook of African Development* Tony Binns, Kenneth Lynch, Etienne Nel, 2018-04-27 This handbook presents an extensive new overview of African development past present and future It addresses key core themes and topics that are pertinent to the continent s development including sections on history health and food politics economics rural and urban development and development policy and practice The volume draws on the expertise of over 60 of the world s leading scholars to provide a detailed and up to date analysis of the key opportunities and challenges that confront Africa and how such issues are being addressed Arranged by key themes the handbook provides not only a historical understanding of the past but also political perspectives on the future The chapters provide critically informed analyses of their topics by drawing upon the latest conceptual viewpoints and applied experiences in Africa in the form of case studies to offer a comprehensive

examination of the opportunities challenges key debates and future prospects This handbook is an invaluable state of the art overview and reference concerning many different aspects of Africa s development which will be of interest to academics in all fields of African studies and also academics and students working in cognate disciplines such as development studies geography history politics and economics Natural Resources and Economic Development Edward Barbier,2019-09-19 The second edition of this landmark book explores how natural resources contribute to development in poor economies **The Wetlands Handbook, 2 Volume Set** Edward Maltby,Tom Barker,2009-07-23 Forty two chapters by international experts from a wide range of disciplines make The Wetlands Handbook the essential tool for those seeking comprehensive understanding of the subject A departure from more traditional treatises this text examines freshwater wetland ecosystem science from the fundamentals to issues of management and policy Introductory chapters address the scope and significance of wetlands globally for communities culture and biodiversity Subsequent sections deal with processes underpinning wetland functioning how wetlands work their uses and values for humans and nature their sensitivity to external impacts and how they may be restored The text is illustrated by numerous examples emphasising functional and holistic approaches to wetland management including case studies on the wise use and rehabilitation of wetlands in farmed urban industrial and other damaged environments highlighting the long term benefits of multiple use The Wetlands Handbook will provide an invaluable reference for researchers managers policy makers and students of wetland sciences Contesting Forestry in West Africa Reginald Cline-Cole,Clare Madge,2017-11-30 This title was first published in 2000 This study looks at the contestation of forestry in West Africa taking into account historical considerations cultural negotiations and environmental issues **A Preliminary Inventory of Coastal Wetlands of Côte D'Ivoire** M. Nicole,1994 *Natural Resources and Economic Development* Edward B. Barbier,2005-11-24 *Natural Resources and Economic Development* first published in 2005 explores a key paradox why is natural resource exploitation not yielding greater benefits to the poor economies of Africa Asia and Latin America Part I examines this paradox both through a historical review of resource use and development and through examining current theories which explain the under performance of today s resource abundant economies and proposes a frontier expansion hypothesis as an alternative explanation Part II develops models to analyse the key economic factors underlying land expansion and water use in developing countries Part III explores further the dualism within dualism structure of resource dependency rural poverty and resource degradation within developing countries and through illustrative country case studies proposes policy and institutional reforms necessary for successful resource based development **The World's Largest Wetlands** Lauchlan H. Fraser,Paul A. Keddy,2005-06-30 During the past century approximately fifty percent of the world s wetlands have been destroyed largely due to human activities Increased human population has led to shrinkage of wetland areas and data show that as they shrink their important functions decline Reduced wetland area causes more flooding in Spring less available water during drought greater risk of water pollution and

less food production and reduced carbon storage Much of the remaining pristine wetland systems are found in the world's largest wetlands and yet these areas have received surprisingly little scientific research or attention This volume presents the views of leading experts on each of the world's largest wetland systems Here this international team of authors share their understanding of the ecological dynamics of large wetlands and their significance and emphasise their need of conservation

Urban Growth and Land Degradation in Developing Cities Roy Maconachie, 2016-02-11 The peri urban interface in poor countries is frequently an area of great dynamism and a focus of competition for basic resources In Nigeria peri urban livelihood strategies have become an increasingly important survival mechanism in the context of rapid urban growth This book uses an innovative combination of methodologies from both the natural and social sciences to examine recent developments in and around the city of Kano in northern Nigeria and in doing so provides insights into the sustainability of these livelihood strategies Identifying some of the most significant forces that are currently shaping the process of peri urban change it argues that despite the adoption of creative and ingenious strategies by many farmers urban growth is having a considerable effect on the livelihood resilience of individuals households and communities The findings presented in this book have much wider relevance and are transferable to other burgeoning Third World cities where increased pressures on urban hinterlands have intensified contests amongst various actors made access to resources much more difficult and made traditional smallholder mechanisms of adaptation and resilience increasingly challenging
