Applying Linguistics Dan McIntyre, Hazel Price, 2018-04-27 Applying Linguistics: Language and the Impact Agenda explores the challenges of demonstrating the socio-cultural and economic impact of research in linguistics. The chapters provide critical discussion of the concept of impact as well as an examination of both the constraints and opportunities of the impact agenda. The book includes case studies of impact-focused research from leading scholars such as M Lynne Murphy, David Britain, Peter French and Bas Aarts, discussion of impact from the perspective of the UK Research Excellence Framework (REF), insights and opinions from academics, practitioners and journalists, personal reflection on the nature of impact from the ESRC's Interim Chief Executive, practical advice on generating and evidencing impact. With chapters from international authors exploring impact both within and outside the context of the UK REF, Applying Linguistics: Language and the Impact Agenda will be essential reading for early career researchers, established academics and PhD students interested in developing impact from their research.

Learning Outside the Classroom Simon Beames, Peter Higgins, Robbie Nicol, 2012-03-22 The first curricular-focused outdoor learning textbook for prospective and practising K-12 teachers, this book provides both academic justification and practical support for educators working in a wide variety of environments and with diverse populations of students to incorporate more meaningful outdoor learning opportunities into their daily teaching activities. Learning Outside the Classroom is not a set of prescriptive activities that can be read and used uncritically. The idea of adaptation for personal relevance is central. All teachers are capable of enhancing their students' learning experiences by systematically and progressively incorporating ventures outside the classroom into their lessons. The principles and examples presented in this book are intended to be adapted by teachers to suit the needs of their students in

ways that draw upon content offered by the local landscape and its natural and built heritage Nor is this book just about outdoor learning it s about good teaching wherever it takes place It is about helping teachers devise and use the tools with which they can address the largely uncontested assumption that legitimate learning only occurs within four walls Learning outside the classroom affords teachers the privilege of helping and the joy of observing students in a process of intellectual emotional and social growth that can last a lifetime Provided by publisher
