

TOWARD A SIXTH PARTY SYSTEM? PARTISANSHIP AND POLITICAL DEVELOPMENT

JAMES F. WARD
Harvard University

THE AMERICAN political system has been credited with the invention of the political party as an institution for the organization of popular political participation and the aggregation of citizen demands.¹ One recurrent theme in American political thinking, however, has been the persistent claim that the party system is in danger of collapse. The claim has taken several forms. For normative opponents of political parties the alleged empirical fragility of the party system only reinforced their claims of superiority for other political styles, such as traditionalism (James Monroe), bureaucratic centralization (Alexander Hamilton), or nonpartisan organizational participation (M. Ostrogorski), to list several alternatives.² Friends of the party system have diagnosed its pathology as an absence of "party responsibility," i.e., a chronic lack of organizational discipline preventing parties from exercising coherent policy control when in power.³

Walter Dean Burnham is perhaps the most sophisticated contemporary exponent of the decline-of-party thesis. His book, *Critical Elections and the Main-springs of American Politics* (1970), and various articles develop a "theory of stasis and movement in American politics" of which the decline-of-party thesis is a crucial part.⁴ I believe that Burnham's theory is vulnerable to a number of criticisms.

NOTE: I would like to thank Samuel P. Huntington and two anonymous referees of the *Western Political Quarterly* for their helpful comments on an earlier version of this article.

The Idea Of A Party System:

The Idea of a Party System Richard Hofstadter, 1969 This volume traces the historical processes in thought by which American political leaders slowly edged away from their complete philosophical rejection of a party and hesitantly began to embrace a party system The author's analysis of the idea of party and the development of legitimate opposition offers fresh insights into the political crisis of 1797-1801 on the thought of George Washington Thomas Jefferson James Madison James Monroe Martin Van Buren and other leading figures and on the beginnings of modern democratic politics *The Idea of a Party System* Richard Hofstadter, 1969 This volume traces the historical processes in thought by which American political leaders slowly edged away from their complete philosophical rejection of a party and hesitantly began to embrace a party system The author's analysis of the idea of party and the development of legitimate opposition offers fresh insights into the political crisis of 1797-1801 on the thought of George Washington Thomas Jefferson James Madison James Monroe Martin Van Buren and other leading figures and on the beginnings of modern democratic politics New Perspectives on the Early Republic Ralph D. demonstrate the broader applicability of this approach by extending it to other countries and their political systems This book brings together essays on eleven countries and two broad themes Contributors to the first section analyze the extent to which party and electoral changes and shifts in the partisan composition of government have led or not led to policy changes in the United States the United Kingdom the Netherlands Denmark Switzerland and France The second section turns the focus on changing institutional structures in Germany Italy Belgium Spain and Canada including the German reunification and the collapse of the Italian party system Together the essays make clear the efficacy of the agenda setting approach for understanding not only how policies evolve but also how political systems function

The Reshaping of West European Party Politics Christoffer Green-Pedersen, 2019-07-31 Long gone are the times when class based political parties with extensive membership dominated politics Instead party politics has become issue based Surprisingly few studies have focused on how the issue content of West European party politics has developed over the past decades Empirically Reshaping of West European Party Politics studies party politics in Belgium Denmark France Germany the Netherlands Sweden and the UK from 1980 and onwards This book highlights the more complex party system agenda with the decline but not disappearance of macroeconomic issues as well as the rise in new politics issues together with education and health care Moreover various new politics issues such as immigration the environment and European integration have seen very different trajectories To explain the development of the individual issues this volume develops a new theoretical model labelled the issue incentive model of party system attention The aim of the model is to explain how much attention issues get throughout the party system which is labelled the party system agenda To explain the development of the party system agenda one needs to focus on the incentives that individual policy issues offer to large mainstream parties i e the typical Social Democratic Christian Democratic or Conservative Liberal parties that have dominated West European governments for decades The core idea of the model is that the incentives that individual policy issues offer to these vote and office seeking parties depend on three factors namely issue characteristics issue ownership and coalition considerations The issue incentive model builds on and develops a top down perspective on which the issue content of party politics is determined by the strategic considerations of political parties and their competition with each other Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Emilie van Haute Professor of Political Science Universit libre de Bruxelles Ferdinand M ller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow John and Rebecca Moores Professor of Political Science University of Houston

Parties and Party Systems Giovanni Sartori, 2014-01-01 In this rich and broad ranging volume Giovanni Sartori outlines what is now recognised to be the most comprehensive and authoritative approach

to the classification of party systems He also offers an extensive review of the concept and rationale of the political party and develops a sharp critique of various spatial models of party competition This is political science at its best combining the intelligent use of theory with sophisticated analytic arguments and grounding all of this on a substantial cross national empirical base *Parties and Party Systems* is one of the classics of postwar political science and is now established as the foremost work in its field

The Founders and the Idea of a National University George Thomas, 2015 *Constituting the American Mind* is about early efforts to establish a national university and what those efforts say about the nature and logic of American Constitutionalism This book offers the first in depth study of the efforts to establish a national university from a constitutional perspective While mostly noted in passing the national university was put forward by every president from Washington to John Quincy Adams as a necessary supplement to the formal institutions of government it would help constitute the American mind in a manner that carried forward the ideas the constitution rested on including for example the separation of the civic from the theological

Rethinking Party Systems in the Third Wave of Democratization Scott Mainwaring, 1999 Based on an in depth examination of the Brazilian case this book argues that we need to rethink important theoretical issues and empirical realities of party systems in the third wave of democratization

The Idea of Political Marketing Nicholas O. O'Shaughnessy, Stephan C.M. Henneberg, 2002-06-30 O'Shaughnessy Henneberg and their contributors examine how the theory and practice of marketing has been and can be applied to politics Particular attention was paid to the theory of political marketing with conceptual definitions developed to better facilitate communication between marketing professionals and political science researchers Political marketing is about the making and unmaking of governments in a democracy Despite its growing importance the marketing academic profession has shown very little interest in the political ramifications of their discipline while political scientists often come to political marketing with the view that it is cosmetic if not trivial O'Shaughnessy Henneberg and their contributors examine how the theory and practice of marketing has been and can be applied to politics As they show elections are a persuasion task writ large most especially with the demise of inherited class loyalties Following elections governments can employ marketing techniques to build support for their actions while opposition parties can press the government and its supporters through similar marketing approaches Of particular interest to scholars researchers and policy makers involved with politics political communication and the making of public policy

Patriot Fires Melinda Lawson, 2002 The Civil War is often credited with giving birth to the modern American state The demands of warfare led to the centralization of business and industry and to an unprecedented expansion of federal power But the Civil War did more than that as Melinda Lawson shows it brought about a change in American national identity redefining the relationship between the individual and the government Though much has been written about the Civil War and the making of the political and economic American

nation this is the first comprehensive study of the role that the war played in the shaping of the cultural and ideological nation state In *Patriot Fires* Lawson explains how when threatened by the rebellious South the North came together as a nation and mobilized its populace for war With no formal government office to rally citizens the job of defining the war in patriotic terms fell largely to private individuals or associations each with their own motives and methods Lawson explores how these interpreters of the war helped instill in Americans a new understanding of loyalty to country Through efforts such as sanitary fairs to promote the welfare of soldiers the war bond drives of Jay Cooke and the establishment of Union Leagues Northerners cultivated a new sense of patriotism rooted not just in the subjective American idea but in existing religious political and cultural values Moreover Democrats and Republicans Abolitionists and Abraham Lincoln created their own understandings of American patriotism and national identity raising debates over the meaning of the American idea to new heights Examining speeches pamphlets pageants sermons and assemblies Lawson shows how citizens and organizations constructed a new kind of nationalism based on a nation of Americans rather than a union of states a European styled nationalism grounded in history and tradition and celebrating the preeminence of the nation state Original in its insights and innovative in its approach *Patriot Fires* is an impressive work of cultural and intellectual history As America engages in new conflicts around the globe Lawson shows us that issues addressed by nation builders of the nineteenth century are relevant once again as the meaning of patriotism continues to be explored **The Pilot**, 1900 Constitutionalism in Perspective
