The Impossible Border Annemarie H. Sammartino,2014-03-17 Between 1914 and 1922 millions of Europeans left their homes as a result of war postwar settlements and revolution After 1918 the immense movement of people across Germany s eastern border posed a sharp challenge to the new Weimar Republic Ethnic Germans flooded over the border from the new Polish state Russian migr s poured into the German capital and East European Jews sought protection in Germany from the upheaval in their homelands Nor was the movement in one direction only German Freikorps sought to found a soldiers colony in Latvia and a group of German socialists planned to settle in a Soviet factory town In *The Impossible Border* Annemarie H Sammartino explores these waves of migration and their consequences for Germany Migration became a flashpoint for such controversies as the relative importance of ethnic and cultural belonging the interaction of nationalism and political ideologies and whether or not Germany could serve as a place of refuge for those seeking asylum Sammartino shows the significance of migration for understanding the difficulties confronting the Weimar Republic and the growing appeal of political extremism Sammartino demonstrates that the moderation of the state in confronting migration was not merely by default but also by design However

the ability of a republican nation state to control its borders became a barometer for its overall success or failure. Meanwhile, debates about migration were a forum for political extremists to develop increasingly radical understandings of the relationship between the state, its citizens, and its frontiers. The widespread conviction that the democratic republic could not control its impossible Eastern borders fostered the ideologies of those on the radical right who sought to resolve the issue by force and for all time.

Globalization and Borders L. Weber, S. Pickering, 2011-11-22. This book analyzes the political and material conditions driving contemporary border control policies and discusses the processes that mediate popular and official understandings of border-related fatalities.

Border Optics Camilla Fojas, 2021-06-08. Examines how the US-Mexico border is seen through visual codes of surveillance. When Donald Trump promised to build a wall on the US-Mexico border, both supporters and opponents visualized a snaking barrier of concrete cleaving through nearly two thousand miles of arid desert. Though only 4 percent of the US population lives in proximity to the border, imagining what the wall would look like came easily to most Americans in part because of how images of the border are reproduced and circulated for national audiences. *Border Optics* considers the US-Mexico border as one of the most visualized and imagined spaces in the US. As a place of continual crisis, permanent visibility, and territorial defense, the border is rendered as a layered visual space of policing, one that is seen from watchtowers, camera-mounted vehicles, helicopters, surveillance balloons, radar systems, unmanned aerial vehicles, and live-streaming websites. It is also a space that is visualized across various forms and genres of media, from maps to geographical surveys, military strategic plans, illustrations, photographs, postcards, novels, film, and television, which combine fascination with the region with the visual codes of surveillance and survey. *Border Optics* elaborates on the expanded vision of the border as a consequence of the interface of militarism, technology, and media. Camilla Fojas describes how the perception of the viewing public is controlled through a booming security industrial complex made up of entertainment media, local and federal police, prisons, and detention centers, the aerospace industry, and all manner of security technology industries. The first study to examine visual codes of surveillance within an analysis of the history and culture of the border region, *Border Optics* is an innovative and groundbreaking examination of security, cultures, race, gender, and colonialism.

Book News Inc **Gendering Border Studies** Jane Aaron, Henrice Altink, Chris Weedon, 2010-06-15 The study of borders has recently undergone significant transitions reflecting changes in the functions of boundaries themselves as the world political map has experienced transformations Gender defined as the knowledge about perceived distinctions between the sexes is an important signifier of borders as constructed and contested lines of differences In the interplay with other categories of difference like class race ethnicity and religion it plays a major role in giving meaning to different forms of borders It is not surprising then that an increasing number of studies in the last years have aimed for a gendering of border studies This book explores this new interdisciplinary field and develops it further The main questions it asks are How do we define borders frontiers and boundaries in different disciplinary approaches of gendered border studies What were and are the main fields of gendered border studies in different fields What might be important questions for future research And how useful is an inter or transdisciplinary approach for gendered border studies Sixteen established scholars from various disciplines contribute chapters in which they set out how the issue of gender and borders has been approached in their discipline and describe what they expect from future research

The Material Ghost Gilberto Perez, 2000-12-26 Gilberto Perez draws on his lifelong love of the movies as well as his work as a film scholar to write a lively wide ranging penetrating study of films and filmmakers and the nature of the art form

The Biometric Border World Karen Fog Olwig, Kristina Grünenberg, Perle Møhl, Anja Simonsen, 2019-10-22 Since the 1990s biometric border control has attained key importance throughout Europe Employing digital images of for example fingerprints DNA bones faces or irises biometric technologies use bodies to identify categorize and regulate individuals cross border movements Based on innovative collaborative fieldwork this book examines how biometrics are developed put to use and negotiated in key European border sites It analyses the disparate ways in which the technologies are applied perceived and experienced by border control agents and others managing the cross border flow of people by scientists and developers engaged in making the technologies and by migrants and non government organizations attempting to manoeuvre in the complicated and often unpredictable systems of technological control Biometric technologies are promoted by national and supranational authorities and industry as scientifically exact and neutral methods of identification and verification and as an infallible solution to security threats The ethnographic case studies in this volume demonstrate however that the technologies are in fact characterized by considerable ambiguity and uncertainty and subject to substantial subjective interpretation translation and brokering with different implications for migrants border guards researchers and other actors engaged in the border world

Israel/Palestine Drew Paul, 2020-01-07 Since the early 1990s Israel has greatly expanded a system checkpoints walls and other barriers in the West Bank and Gaza that restrict Palestinian movement Israel Palestine examines how authors and filmmakers have grappled with the spread of these borders Focusing on the works of Elia Suleiman Raba i al Madhoun Ghassan Kanafani Sami Michael and Sayed Kashua it traces how political engagement in literature and film has shifted away

from previously common paradigms of resistance and coexistence and has become reorganised around these now ubiquitous physical barriers. Depictions of these borders interrogate the notion that such spaces are impenetrable and unbreakable. They imagine distinct forms of protest and redefine the relationship between cultural production and political engagement. A *Research Agenda for Border Studies* James W. Scott, 2020-12-25 This innovative Research Agenda uncovers links between different levels of border making processes or bordering from the political to the cognitive and connects everyday processes and experiences of border making to the wider social world. It addresses the question of how everyday bordering practices and discourses can be productively linked to different aspects of social relations.

Feminism on the Border Sonia Saldívar-Hull, 2000-05-09 Sonia Saldívar Hull's book proposes two moves that will no doubt leave a mark on Chicano and Latin American Studies as well as in cultural theory. The first consists in establishing alliances between Chicana and Latin American writers/activists like Gloria Anzaldúa and Cherrie Moraga on the one hand and Rigoberta Menchú and Domitilla Barrios de Chungara on the other. The second move consists in looking for theories where you can find them in the non places of theories such as prefaces, interviews and narratives. By underscoring the non places of theories, Sonia Saldívar Hull indirectly shows the geopolitical distribution of knowledge between the place of theory in white feminism and the theoretical non places of women of color and of third world women. Saldívar Hull has made a signal contribution to Chicano and Latin American Studies and cultural theory. Walter D Mignolo, author of *Local Histories, Global Designs: Coloniality, Subaltern Knowledges and Border Thinking*. This is a major critical claim for the sociohistorical contextualization of Chicanas who are subject to processes of colonization and our conditions of existence. Through a reading of Anzaldúa, Cisneros and Viramontes, Saldívar Hull asks us to consider how the subalternized text speaks, how and why it is muted. How do testimonio, autobiography and history give shape to the literary where embodied wholeness may be possible. It is a critical de-centering of American Studies and Mexican Studies as usual as she traces our crossed genealogies situated on the borders. Norma Alarcon, Professor of Ethnic Studies, University of California Berkeley.
