Hoffenberg, 2019-10-22 When the Reverend Henry Carmichael opened the Sydney Mechanics School of Arts in 1833 he introduced a bold directive for Australia to advance on

the scale of nations it needed to develop a science of its own Prominent scientists in the colonies of New South Wales and Victoria answered this call by participating in popular exhibitions far and near from London s Crystal Place in 1851 to Sydney Melbourne Adelaide and Brisbane during the final decades of the nineteenth century A Science of Our Own explores the influential work of local botanists chemists and geologists William B Clarke Joseph Bosisto Robert Brough Smyth and Ferdinand Mueller who contributed to shaping a distinctive public science in Australia during the nineteenth century It extends beyond the political underpinnings of the development of public science to consider the rich social and cultural context at its core For the Australian colonies as Peter H Hoffenberg argues these exhibitions not only offered a path to progress by promoting both the knowledge and authority of local scientists and public policies they also ultimately redefined the relationship between science and society by representing and appealing to the growing popularity of science at home and abroad

Foucault and Family Relations Malcolm Joyce,2019-05-14 Foucault and Family Relations Governing from a Distance in Australia analyzes how notions of property ownership were instrumental in maintaining family stability and continuity in

rural Australia outlining how inheritance and divorce laws functioned to govern the internal relationships of families to assist the state to rule from a distance Using a selection of Foucault's ideas on the family sexuality race space and economics this book shows how property operated as a disciplinary device which was underpinned by technical ideas such as surveying and cartography This book uses legal judgments as a form of ethnography to show how property as a socio technical device allowed a degree of local freedom for owners This aspect of property allowed the state to stimulate ideas of local freedom to assist in ruling from a distance demonstrating how the rural family as a domestic unit became a key field of intervention for the state as the family represented a bridge to larger relationships of power

Replenishing the Earth James Belich, 2011-05-05 Why are we speaking English Replenishing the Earth gives a new answer to that question uncovering a settler revolution that took place from the early nineteenth century that led to the explosive settlement of the American West and its forgotten twin the British West comprising the settler dominions of Canada Australia New Zealand and South Africa Between 1780 and 1930 the number of English speakers rocketed from 12 million in 1780 to 200 million and their wealth and power grew to match Their secret was not racial or cultural or institutional superiority but a resonant intersection of historical changes including the sudden rise of mass transfer across oceans and mountains a revolutionary upward shift in attitudes to emigration the emergence of a settler boom mentality and a late flowering of non industrial technologies wind water wood and work animals especially on settler frontiers This revolution combined with the Industrial Revolution to transform settlement into something explosive capable of creating great cities like Chicago and Melbourne and large socio economies in a single generation When the great settler booms busted as they always did a second pattern set in Links between the Anglo wests and their metropolises London and New York actually tightened as rising tides of staple products flowed one way and ideas the other This re colonization re integrated Greater America and Greater Britain bulking them out to become the superpowers of their day The Settler Revolution was not exclusive to the Anglophone countries Argentina Siberia and Manchuria also experienced it But it was the Anglophone settlers who managed to integrate frontier and metropolis most successfully and it was this that gave them the impetus and the material power to provide the world's leading super powers for the last 200 years This book will reshape understandings of American British and British dominion histories in the long 19th century It is a story that has such crucial implications for the histories of settler societies the homelands that spawned them and the indigenous peoples who resisted them that their full histories cannot be written without it
