**Maqasid Al-Shari'ah** Mazen Hashem,2024-06-04 The previous decade witnessed a plethora of books on the subject of maqasid aims of Shariah stressing that Islam s commandments have overarching aims and that the individual texts of Qur an and hadith can only be adequately understood within the universal principles of Islam While the classical work on maqasid is immense that of Shatibi d 1388 C E gained the utmost authority as it theorized for five general aims of Shariah which can take one of three levels of priority Since then most of the works on the subject of maqasid have been a variation on Shatibi s approach The major contribution of this book is to marry Ibn Khaldun s perspective with that of Shatibi In such a way a new maqasid theory that attends to the insights of history and social sciences is constructed The proposed theory is marked by a high degree of synthesis and maintains the major categories of Shatibi but only after redefining and expanding them Moreover the new enhanced theory of maqasid is marked by being multidimensional where the five goals of Shariah operate in an open space In addition to its academic contribution this new work hopes to make maqasid more amenable for appreciation and application in our time

*Heidegger and Development in the Global South* Siby K. George,2015-03-05 Taking the Heideggerian critical ontology of technology as its base this volume looks at postcolonial modernization and development in the global south as the worldwide expansion of the western metaphysical understanding of reality We live today in an increasingly globalizing technological society that Martin Heidegger described in the middle of the last century as the planetary imperialism of technologically organized man Consequent upon this cultural intellectual globalization the ahistorical violent individualistic calculative and capitalistic logic of the metaphysics of technology is permeating the life world even of the world s poorest peoples in ways they could neither choose nor control This volume questions the political ethics and justice of post war development discourse in the light of the egalitarian aims of modern societies cultural freedom of communities and nations and the ecological limits of the planet The final chapters discuss the alternative proposal of development as various conceptions of good life and equitable human flourishing amidst equally flourishing non human life and non living beings This unique volume is the first book length treatment of the ontology of modernization and development in the global south from a Heideggerian stance
