The Individual And The Social:

The Individual and the Social Order Joseph Alexander Leighton,1926 Human Beings--between the Individual and the Social Peter Herrmann,2006 Looking for an answer of social science being able to maintain political independence without loosing genuine political orientation and responsibility and at the same time maintaining a sophisticated balance of holistic orientation on the one side and discrimination on the other side is of course on the one hand bound to the objective conditions of society on the other hand and even more so scientists have to accept their responsibility of re gaining independence in terms of looking for valid answers to assess development and to change them where necessary rather than fulfilling expectations of the development by simply maintaining the status quo In this regard the present contributions reach a high level of expertise in their independence of judgements This is of particular interest as they cover a huge variety of topics and areas not least coming from different disciplinary backgrounds and as well looking at different aggregate levels

Marx's Construction of Social Theory (RLE Marxism) J.M. Barbalet, 2015-04-17 This study first published in 1983 explores the connections between Marx s philosophy and his empirical analysis of society and state by showing the different meanings of many of Marx s concepts as their role in his theory changes and the theory itself develops Beginning with an examination of Marx s search for a sound epistemological basis on which to build a social theory Dr Barbalet then gives an analysis of the way in which Marx continually modifies the concepts he uses and continues with an examination of the different functions they are given in different theoretical settings Various nuances of Marx s thought often obscured by the simplistic early late dichotomy are revealed by Dr Barbalet s close attention to the progressive transformation of Marx s concepts and by his scrupulous analysis of them in not only their textual but also their theoretical context Finally the book examines the manner in which Marx s construction of social theory by its very nature means that some material is replaced by other theoretical fabric as the theoretical structure itself is in different ways dismantled and reorganised as Marx s thought evolves and develops
