Gans,2004 Herbert J Gans is the Robert S Lynd Professor of Sociology at Columbia University Book Jacket      The Postwar Decline of American Newspapers, 1945-1965 David R. Davies,2006-07-30 On the surface the American newspaper industry appears to have changed little from 1945 to 1965 remaining both healthy and prosperous The number of newspapers in 1965 was about the same as in 1945 while during the twenty year period advertising revenues increased substantially despite new competition from television Just as in 1945 the vast majority of newspapers went to press with improved but old fashioned letterpress methods in 1965 And newspaper reporters still professed a strong if now somewhat shaken faith in the federal government at the end of the twenty years But the surface appearance of both stability and profitability obscured profound change In the two decades after World War II the business of newspaper publishing changed significantly in myriad ways By 1965 editors and publishers had recognized the extent of these changes and were beginning to adjust Each of the changes was significant of its own accord and the range of challenges throughout the period combined to transform newspapers and the nation they served by 1965 This transformation was evident to varying degrees in newspapers content their production methods their economic position within the overall media marketplace and their relationship with government Newspapers some more than others made strides to keep up with and overcome some of these challenges But in each of these areas newspapers as a group were slow to respond to the problems facing journalism      **Journalism Without Profit** Magda Konieczna,2018-06-21 As mainstream journalism wanes news nonprofits attempt to fill the gap by providing the kind of quality information that is essential to our democracy This book explores the emergent behaviors of sharing and collaboration that allow them to do so and their potential for success or failure in the 21st century      Monthly Labor Review ,1971 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book

genres and its style is an expression of the dilemmas which have bedevilled broadcasting from the moment of its invention. Anthony Smith's book provides for the first time a connected and carefully researched picture of the real issues involved in the debate about broadcasting. This book shows how the argument about levels of taste in broadcasting about balance and fairness about trivialisation control and freedom of access are elements of a gigantic problem which threatens the whole structure of democratic freedom. The book shows some of the path to be taken if broadcasting is not to undermine the basic notion of freedom of expression. Topical, subtle and revealing, this is an important historical document, a must read for scholars and researchers of media studies, news media, media history, mass communication and political studies.

A Short History of Disruptive Journalism Technologies Will Mari, 2019-02-07. A Short History of Disruptive Journalism Technologies provides a swift analysis of the computerization of the newsroom from the mid 1960s through to the early 1990s. It focuses on how word processing and a number of related affordances including mobile reporting tools impacted the daily work routines of American news workers. The narrative opens with the development of mainframes and their attendant use as databases in large daily newspapers. It moves on to the minicomputer era and explores initial news worker experiences with computers for editing and publication. Following this, the book examines the microprocessor era and the rise of smart terminals, microcomputers and off the shelf hardware software along with the increasing use of computers in smaller news organizations. Mari then turns to the use of pre internet networks, wire services and bulletin boards deployed for user interaction. He looks at the integration of decentralized computer networks in newsrooms with a mix of content management systems and PCs and the increasing use of pagers and cellphones for news gathering including the shift from portable to mobile conceptualizations for these technologies. A Short History of Disruptive Journalism Technologies is an illuminating survey for students and instructors of journalism studies. It represents an important acknowledgement of the impact of pre internet technological disruptions which led to the even more disruptive internet and related computing technologies in the latter 1990s and through the present.

**Paradigms Lost** William Sonn, 2006-02-14. Four times in western history in the 1400s, the early 1800s, the 1880s and again in the mid 20th century we learned to duplicate and disseminate the printed word more cheaply. And each time strange events followed. For with each of these changes in the gritty production of glamorous content, expensive and secret bodies of knowledge abruptly became cheap and easy to spread. Once rare and sometimes disorienting impressions rained down on once sheltered folks. New and otherwise inexperienced hands mixed them into whole new breeds of information, myth, logic and viewpoints. There were fantastic scientific advances, mass migrations, bold social experiments, financial upheavals and much bloodshed. In the harrowing decades that followed, powerful new kinds of governments, businesses and groups came to elbow aside old ones. In all of these periods there were great creaking shifts in politics, wealth, religions and even the way we learn, think and see. And in the last decade the costs of producing and distributing printed knowledge have fallen a fifth time, far and fast and almost to free. Paradigms Lost traces the history of the
