The Inner Limits of Mankind Ervin Laszlo, 1989 An examination of contemporary values and attitudes in which a systems scientist and philosopher explore ways in which each of us can contribute to their transformation and argue for the emergence of a new globally oriented environmentally conscious spiritually aware thinking person **The Inner Limits of Mankind** Ervin Laszlo, 1989 An examination of contemporary values and attitudes in which a systems scientist and philosopher explore ways in which each of us can contribute to their transformation and argue for the emergence of a new globally oriented environmentally conscious spiritually aware thinking person *The Laszlo Chronicle* Gyorgyi Szabo, 2017-01-24 This study analyses the fifty year evolution of Ervin Laszlo's contribution to science and philosophy It records the major turning points in his thinking and discusses who and what influenced this evolution and with what result Laszlo's search for answers to questions such as man's relationship to nature and the cosmos and the nature of underlying factors of evolution which connect all things were not satisfied by working only on the basis of the General Evolutionary Systems Theory Wittgenstein said In every serious philosophical question uncertainty extends to the very roots of the problem We must always be prepared to learn something totally new Laszlo did discover something entirely new the theory of the information field after immersing himself in a range of areas of study such as cosmology consciousness studies quantum physics metaphysics and various Eastern traditions The integration of his earlier works with his more recent studies lies behind his explanation of the existence of the Akashic Field The Akashic Field is a term that refers to an interactive universe communicating in a subtle manner which connects everything with every other thing everywhere This is a pure information field where communication takes place without the need for the transportation of physical energy thus interaction can occur instantaneously regardless of distance and time Coherence and consciousness are the bases of Laszlo's Akashic field He proposed a system theoretic paradigm which focuses on a general understanding of the cosmos and the implications for entities such as human beings This entails the observation and explanation of human and cosmic evolution as viewed in unity or inter connectedness where macro and micro are essentially interlinked Laszlo's philosophical work extends to sociology when describing concurrent worldwide issues closely related to the existence of the Akashic Field His humanist ideals are evidenced by his efforts to help humans understand the context and causes for their recent challenges and the possibilities that may lie ahead Ervin Laszlo's half century of exceptional philosophical work gives us the most coherent picture of the nature of the world to date Culture's Consequences Geert Hofstede, 1984 In his bestselling book *Culture's Consequences* Geert Hofstede proposed four dimensions on which the differences among national cultures can be understood Individualism Power Distance Uncertainty Avoidance and Masculinity This volume comprises the first in depth discussion of the masculinity dimension and how it can help us to understand differences among cultures The book begins with a general explanation of the masculinity dimension and discusses how it illuminates broad features of different cultures

The following parts apply the dimension more specifically to gender and gender identity sexuality and sexual behaviour and religion probably the most influential variable of all Hofstede closes the book

Technology and Diversity in Higher Education: New Challenges Inoue, Yukiko, 2006-10-31 This book examines current and effective educational practices as well as new challenges involving emerging technologies in increasingly diverse learning environments in higher education and the impact of the explosion of technology These challenges are well documented in this collection of essays case studies and research reports Provided by publisher *Reconnection* Betty Jean Craige, 2010-11-01 An openly polemical work *Reconnection* seeks a way of returning the humanities to their place at the center of human life For the past three hundred years to study the humanities has implied an isolation from politics science and society Literary studies in particular have often fallen prey to this isolation by viewing novels plays and poems as impassive verbal icons as texts to be explicated without reference to political context or social significance Seeking a way of ending this self imposed exile of the humanities from the turmoil of social issues and concerns Betty Jean Craige looks to the contextual nondisciplinary thought that began to take hold in academia during the 1960s a development that echoed the rising political awareness brought to the universities by the Vietnam War the civil rights movement and women s liberation Recently this emergent openness in the university has come under attack by conservative critics who have sought to roll back the movement for nontraditional inquiry in academia and to reassert the dominance of hierarchical canonical thought By tracing the ideological history of literary studies Craige shows that this reactionary goal of reimposing canonical thought is in time doomed to failure the age of the discipline is over In its place Craige calls for the creation of a holistic system of learning that will emphasize interdisciplinary and nondisciplinary research reconnecting literary studies with history and philosophy with science and politics restoring literature itself to a central place in our intellectual discourse and social debate
