The Internal Organization of Ch'ing Bureaucracy Thomas A. Metzger, 1973-02-05 **The Internal Organization of Ching Bureaucracy** Thomas A. Metzger, The Internal Organization of Ch'ing Bureaucracy: Legal, Normative, and Communication Aspects Thomas A. Metzger, 1973 This work looks at the bureaucracy of the Ching empire 1644 1912 By analyzing the laws dealing with administrative discipline as well as the ways in which these laws were made communicated and argued about it determines the nature of norms basic to the actualities of the Ching administrative life It relates these working norms to leading issues and ideas in the Confucian intellectual tradition The Board of Rites and the Making of Qing China Macabe Keliher, 2019-10-15 The Board of Rites and the Making of Qing China presents a major new approach in research on the formation of the Qing empire 1636 1912 in early modern China Focusing on the symbolic practices that structured domination and legitimized authority the book challenges traditional understandings of state formation and argues that in addition to war making and institution building the disciplining of diverse political actors and the construction of political order through symbolic acts were essential undertakings in the making of the Qing state Beginning in 1631 with the establishment of the key disciplinary organization the Board of Rites and culminating with the publication of the first administrative code in 1690 Keliher shows that the Qing political environment was premised on sets of intertwined relationships constantly performed through acts such as the New Year's Day ceremony greeting rites and sumptuary regulations or what was referred to as li in Chinese Drawing on Chinese and Manchu language archival sources this book is the first to demonstrate how Qing state makers drew on existing practices and made up new ones to reimagine political culture and construct a system of domination that lay the basis for empire *Handbook of Administrative History* Jos Raadschelders, 2017-07-05 Public administration is commonly assumed to be a young discipline rooted in law and political science with little history of its own Likewise teaching and scholarship in this field is often career oriented and geared either toward the search for immediately usable knowledge or guidelines and prescriptions for the future Although most administrative scientists would acknowledge that their field has a history their time horizon is limited to the recent past Raadschelders demonstrates that public administration has in fact a long standing tradition both in practice and in writing administration has been an issue ever since human beings recognized the need to organize themselves in order to organize the environment in which they lived This history in turn underlines the need for administrators to be aware of the importance and contemporary impact of past decisions and old traditions In seeking to go beyond the usual problem solving and future oriented studies of public administration this volume adds greatly to the cognitive richness of this field of research Indeed the search for theoretical generalizations will profit from an approach that unravels long term trends in the development of administration and government Raadschelders approaches public administration history from a dual perspective as trained historian and professor of public administration The volume is appropriately called a handbook in view of its methodical

listing of the literature on administrative history together with summaries of numerous authors principal theories The second chapter is an essay on sources in the field including an extended bibliography These parts of the book alone make it useful to scholars in the field Raadschelders is helpful in other ways as well The third and fourth chapters offer a highly sophisticated discussion of methodological problems encountered in writing administrative history including the issue of perceiving stage

European and Chinese Histories of Economic Thought Iwo Amelung,Bertram Schefold,2021-11-17 The Western literature on the history of Chinese economic thought is sparse and comparisons with the history of Western economic thought even more so This pioneering book brings together Western and Chinese scholars to reflect on the historical evolution of economic thought in Europe and China The international panel of contributors cover key topics such as currency usury land tenure the granary system welfare and government and special attention is given to monetary institutions and policies The problem of good government emerges as the unifying thread of a complex analysis that includes both theoretical issues and applied economics Chinese lines of evolution include the problem of the agency of the State its ideological justification the financing of public expenditure the role played by the public administration and the provision of credit The early radical condemnation of usury in the Near East and in the West gives way to theoretical justifications of interest taking in early capitalist Europe they in turn lead to advances in mathematics and business administration and represent one of the origins of modern economic theory Other uniting themes include the relationship between metallic and paper money in Chinese and European experiences and the cross fertilization of economic practices and ideas in the course of their pluri millennial interactions Differences emerge the approach to the organization of economic life was and still is more State centred in China The editors bring together these analytical threads in a final chapter opening wider horizons for this new line of comparative economic research which is important for the understanding of modern ideological turns This volume provides valuable reading for scholars in the history of economic thought economic history and Chinese studies

Human Rights in Korea William Shaw,2020-10-26 These chapters by eight Korea specialists present a new approach to human rights issues in Korea Instead of using an external and purely contemporary standard the authors work from within Korean history treating the successive phases of Korea's modern century to examine the uneasy fate of human rights and some of the ideas of human rights as they have developed in the Korean context Beginning with the Independence Club of the late nineteenth century and continuing through to the constitutional and judicial structures underlying the Sixth Republic Government of Roh Tae Woo in South Korea these papers illuminate the sometimes complex interactions between modern Korean human rights issues and the legacies of Korean culture and colonial occupation The final sections deal with the usefulness and appropriateness of U S policies toward human rights in South Korea and comparatively with the overall issues raised in the volume

When People Want Punishment Lily L. Tsai, 2021-08-12 Against the backdrop of rising populism around the world and democratic backsliding in countries with robust multiparty elections this book asks why ordinary people favor authoritarian leaders Much of the existing scholarship on illiberal regimes and authoritarian durability focuses on institutional explanations but Tsai argues that to better understand these issues we need to examine public opinion and citizens concerns about retributive justice Government authorities uphold retributive justice and are viewed by citizens as fair and committed to public good when they affirm society's basic values by punishing wrongdoers who act against these values Tsai argues that the production of retributive justice and moral order is a central function of the state and an important component of state building Drawing on rich empirical evidence from in depth fieldwork original surveys and innovative experiments the book provides a new framework for understanding authoritarian resilience and democratic fragility

Conflicting Counsels to Confuse the Age Helen Dunstan,2020-08-06 *Conflicting Counsels to Confuse the Age* translates and analyzes thirty eight memorials to the throne and other Qing documents dealing with important issues of Chinese political economy providing thoughtful and provocative commentary Subjects covered by the texts include water control mining grain trade pawnshops brewing and commercial shipping The documents also contain detailed discussions of how the state should control wealth self interest profit hoarding and the market In translating these primary sources Helen Dunstan invites fellow specialists in Chinese studies including Qing historians to watch Qing officials and others thinking through problems of political economy and developing arguments to persuade colleagues or superiors By emphasizing their rhetorical nature and genre conventions Dunstan offers a reminder that it is improper to use the information in such texts without attention to the author s purpose and without grasping the rhetorical structure of the text as a whole As a model for close reading *Conflicting Counsels* aims to induce greater sensitivity to the nature of Qing records The second purpose of *Conflicting Counsels* is to help dispel the notion that economic liberalism is necessarily a Western modern phenomenon Many of the texts translated record areas of tension and controversy in eighteenth century approaches to a central project of Confucian paternalist administration nourishing the people yangmin Although Dunstan attempts to present both sides fairly some materials included present the opinion that in certain vital matters it was better for the state to stand aside and leave society s own economic institutions trade in particular to handle things While not a majority the texts that build some kind of market mechanism argument should be of greatest interest to Qing historians

Questioning Collapse Patricia A. McAnany,Norman Yoffee,2009-09-28 *Questioning Collapse* challenges those scholars and popular writers who advance the thesis that societies past and present collapse because of behavior that destroyed their environments or because of

overpopulation In a series of highly accessible and closely argued essays a team of internationally recognized scholars bring history and context to bear in their radically different analyses of iconic events such as the deforestation of Easter Island the cessation of the Norse colony in Greenland the faltering of nineteenth century China the migration of ancestral peoples away from Chaco Canyon in the American southwest the crisis and resilience of Lowland Maya kingship and other societies that purportedly collapsed Collectively these essays demonstrate that resilience in the face of societal crises rather than collapse is the leitmotif of the human story from the earliest civilizations to the present Scrutinizing the notion that Euro American colonial triumphs were an accident of geography Questioning Collapse also critically examines the complex historical relationship between race and political labels of societal success and failure

Dictatorship and Information Martin K. Dimitrov, 2023 Fear pervades dictatorial regimes Citizens fear leaders the regime's agents fear superiors and leaders fear the masses The ubiquity of fear in such regimes gives rise to the dictator's dilemma where autocrats do not know the level of opposition they face and cannot effectively neutralize domestic threats to their rule The dilemma has led scholars to believe that autocracies are likely to be short lived Yet some autocracies have found ways to mitigate the dictator's dilemma As Martin K Dimitrov shows in Dictatorship and Information substantial variability exists in the survival of nondemocratic regimes with single party polities having the longest average duration Offering a systematic theory of the institutional solutions to the dictator's dilemma Dimitrov argues that single party autocracies have fostered channels that allow for the confidential vertical transmission of information while also solving the problems associated with distorted information To explain how this all works Dimitrov focuses on communist regimes which have the longest average lifespan among single party autocracies and have developed the most sophisticated information gathering institutions Communist regimes face a variety of threats but the main one is the masses Dimitrov therefore examines the origins evolution and internal logic of the information collection ecosystem established by communist states to monitor popular dissent Drawing from a rich base of evidence across multiple communist regimes and nearly 100 interviews Dimitrov reshapes our understanding of how autocrats learn or fail to learn about the societies they rule and how

they maintain or lose power
