without words It seems appropriate then and not a little overdue that Jonathan Day has created a book that expounds explores and examines Frank's work pictorially Taking Frank's iconic images as his point of reference Day shot new photographs that commented on the road and contemporary America Here these images are paired with critical commentary that details the aspects of the work that are visually expounded and explained in Day's complementary images A visual entryway to the photographs and themes of this iconic book in the history of photography Postcards from the Road represents an innovative carefully considered departure from standard photographic textbooks Indian Art Worlds in Contention Helle Bundgaard, 2013-11-05 This beautifully illustrated book explores the opinions of artists critics and others involved with arts or crafts arguing for a theory that considers the different discursive formations and related strategic practices of an art world Focusing on Orissan patta paintings in India the author examines the local regional and national discourses involved In so doing the text demonstrates that while painters local discourses are characterised by pragmatism the discourses of regional and especially national elites are concerned with the exegesis of local paintings and their association with the great Sanskrit tradition A central theme of the study focuses on the awards given for skill in craft making and their changing significance as they pass from national and regional elites to local painters It is shown how certain key actions by local painters result from a clash between local discourses on the one hand and regional and national discourses on the other **Postcards from Stanland** David H.
