The Interloper:

The Interloper Michel Anteby, 2024-04-09 A practical and theoretical guide for field researchers struggling with access Resistance is the bane of all field researchers who are often viewed as interlopers when they enter a community and start asking questions People obstruct investigations and hide evidence They shelve complaints silence dissent and even forget their own past and deny having done so How can we learn about a community when its members resist so strongly The answer is that the resistance itself is sometimes the key Michel Anteby explains how community members often disclose more than intended when they close ranks and create obstacles He draws insights from diverse stories of resistance by uncooperative participants from Nazi rocket scientists and Harvard professors to Disney union busters and people who secure cadavers for medical school dissection to reveal how field resistance manifests itself and how researchers can learn from it He argues that many forms of resistance are retrospectively telling and that these forms are the routine products not by products of the field That means that resistance mechanisms are not only indicative of something else happening instead they often are the very data points that can shed light on how participants make sense of their worlds An essential guide for ethnographers sociologists and all field researchers seeking access The Interloper shares practical and theoretical insights into the value of having the door slammed in your face

Sperm Competition and the Evolution of Animal Mating systems Robert L. Smith,2012-12-02 Sperm Competition and the Evolution of Animal Mating Systems describes the role of sperm competition in selection on a range of attributes from gamete morphology to species mating systems This book is organized into 19 chapters

and begins with the conceptualization of sperm competition as a subset of sexual selection and its implications for the insects. The following chapter describes the relationship between multiple mating and female fitness with an emphasis on determining the conditions under which selection on females is likely to counteract selection on males for avoiding sperm competition. Other chapters consider the female perspective on sperm competition, the evolutionary causation at the level of the individual male gamete and the correlation of high paternal investment and sperm precedence in the insects. The remaining chapters are arranged phylogenetically and explore sperm competition in diverse animal taxa such as the *Drosophila*, Lepidoptera, spiders, amphibians and reptiles. These chapters also cover the evolution of direct versus indirect sperm transfer among the arachnids or the problem for kinship theory presented by multiple mating and sperm competition in the Hymenoptera. This book further discusses the remarkable potential for sperm competition among certain temperate bat species whose females store sperm through winter hibernation and the mixed strategies and male caused female genital trauma as possible sperm competition adaptations in poeciliid fishes. The concluding chapter examines the predictions concerning testes size and mating systems in the primates and the possible role of sperm competition in human selection. This book is of great value to reproductive biologists and researchers.

Assisted Suicide and the European Convention on Human Rights Stevie Martin, 2021-04-12 Locating assisted suicide within the broader medical end of life context and drawing on the empirical data available from the increasing number of permissive jurisdictions, this book provides a novel examination of the human rights implications of the prohibition on assisted suicide in England and Wales and beyond. Assisted suicide is a contentious topic and one which has been the subject of judicial and academic debate internationally. The central objective of the book is to approach the question of the ban's compatibility with the European Convention on Human Rights afresh, freed from the constraints of the existing case law and its erroneous approach to the legal issues and selective reliance on empirical data. The book also examines the compatibility of the ban on assisted suicide with rights which have either been erroneously disregarded or not considered by either the domestic courts or the European Court of Human Rights. Having regard to human rights jurisprudence more broadly, including in the context of abortion, the research and analysis undertaken here demonstrates that the ban on assisted suicide violates the rights of a significant number of individuals to life, to freedom from torture or inhuman or degrading treatment and to private life. Such analysis does not depend on a strained or contrived approach to the rights at issue. Rather, the conclusions flow naturally from a coherent logical application of the established principles governing those rights. While the focus of the book is the Suicide Act 1961, the conclusions reached have implications beyond England and Wales, including for the other devolved jurisdictions and international jurisdictions. Beyond courts and legislators, it will be a valuable resource for students of human rights and medical law, as well as medical and legal practitioners and academics working in human rights and end of life care.

The Adversary Thea Harrison, 2021-07-26 From NYT bestselling author Thea Harrison comes the explosive conclusion to *The Unseen*. When Dragos and Pia move to the Other

The Interloper Michel Anteby, 2024-04-09 A stranger enters your world and starts asking questions you would prefer not to answer What do you do Mostly when an interloper appears communities find ways to resist they obstruct investigations and hide evidence shelve complaints and silence dissent even forget their own past and deny having done so Such resistance that is the social mechanisms deployed by social groups to maintain the status quo is the bane of field researchers everywhere for it often seems to slam the door in their face How can one learn about a community when they resist so very strongly The answer is that sometimes the resistance is itself the key By closing ranks and creating obstacles community members often disclose more than they meant This book shows how such resistance manifests itself how researchers can respond to it and most importantly what it all reveals To do so *The Interloper* draws insights from diverse stories of resistance and research inquiries everything from Nazi rocket scientists to Disney union busters Harvard professors to those securing cadavers for medical school dissection to draw attention to field resistance and help analyze it Offering a window into such research for readers of many disciplines this book ultimately is intended both as a practical and theoretical guide for field researchers All these stories and more reveal a common truth When any field researcher tries to gain access to a field they are sure to meet resistance to their investigations *The Interloper* brings together all these instances of resistance that he encountered or witnessed alongside accounts from other published work The book organizes them around ideal forms of resistance and details their unique implications Ultimately *The Interloper* argues that such resistance contains way more analytical possibilities than most interlopers including field researchers envision
