Enter the King Gordon Kipling, 1998 This study describes for the first time the ritual purposes, symbolic vocabulary and quasi-dramatic form of one late medieval courtly festival, the royal entry. Although the royal entry as a formal ceremony can be traced back as an unbroken tradition from late Classical times through to the Renaissance, Kipling begins where the royal entry adopts pageantry as its essential medium in the late fourteenth century.

A Profane Wit James William Johnson, 2004 A biography of the poet and libertine, the Earl of Rochester. Of the glittering, licentious court around King Charles II, John Wilmot, the second Earl of Rochester, was the most notorious. Simultaneously admired and vilified, he personified the rake. A hell-for-leather libertine, profane, promiscuous, he shocked his pious contemporaries with his doubts about religion and his blunt verses that dealt with sex or vicious satiric assaults on the high and mighty of the court. This account of Rochester and his times provides the facts behind his legendary reputation as a rake and his deathbed repentance. However, it also demonstrates that he was a loving if unfaithful husband, a devoted father, a loyal friend, a serious scholar, a social critic, and an aspiring patriot. An Emeritus Professor of English at the University of Rochester, James William Johnson is the author or editor of nine books and many articles treating British and American literature.

The Scientific Revolution William E. Burns, 2001-10-23 An encyclopedic collection of key scientists and the tools and concepts they developed that transformed our understanding of the physical world. Many are familiar with the ideas of Copernicus, Descartes, and Galileo. But here the reader is also introduced to lesser-known ideas and contributors to the Scientific Revolution, such as the mathematical Bernoulli Family and Andreas Vesalius, whose anatomical charts revolutionized the study of the human body. More marginal characters include the magician Robert Fludd. The encyclopedia also discusses subjects like Arabic science and the bizarre history of blood transfusions and institutions like the Universities of Padua and Leiden, which were dominant forces in academic medicine and science.
