Lloyd Wright Her story is one of the many told in *The Women Who Changed Architecture* which sets the record straight on the transformative impact women have made on architecture With in depth profiles and stunning images this is the most comprehensive look at women in architecture around the world from the nineteenth century to today Discover contemporary leaders like MacArthur Fellow Jeanne Gang spearheading sustainable design initiatives reimagining cities as equitable spaces and directing architecture schools An essential read for architecture students architects and anyone interested in how buildings are created and the history behind them **John McAndrew's Modernist Vision** Mardges Bacon,2018-11-06

John McAndrew s *Modernist Vision* tells the compelling story of the architect scholar and curator John McAndrew who played a key role in redefining modernism in the United States from the 1930s onward The designer of the Vassar College Art Library arguably the first modern interior on a college campus and the curator of architecture at the Museum of Modern Art in New York from 1937 to 1941 McAndrew was instrumental in creating a distinct and innovative aesthetic that bridged the European modernist lineage and American regional vernacular Providing a fascinating glimpse into McAndrew s life his associations with important architects and artists and the historical context that shaped his work this book is a thoroughly researched testament to a man who left a powerful mark on the evolution of American architecture Arts and Crafts Architecture Maureen Meister,2014-11-04 This book offers the first full scale examination of the architecture associated with the Arts and Crafts movement that spread throughout New England at the turn of the twentieth century Although interest in the Arts and Crafts movement has grown since the 1970s the literature on New England has focused on craft production Meister traces the history of the movement from its origins in mid nineteenth century England to its arrival in the United States and describes how Boston architects including H H Richardson embraced its tenets in the 1870s and 1880s She then turns to the next generation of designers examining buildings by twelve of the region s most prominent architects eleven men and a woman who assumed leadership roles in the Society of Arts and Crafts founded in Boston in 1897 Among them are Ralph Adams Cram Lois Lilley Howe Charles Maginnis and H Langford Warren They promoted designs based on historical precedent and the region s heritage while encouraging well executed ornament Meister also discusses revered cultural personalities who influenced the architects notably Ralph Waldo Emerson and art historian Charles Eliot Norton as well as contemporaries who shared their concerns such as Louis Brandeis Conservative though the architects were in the styles they favored they also were forward looking blending Arts and Crafts values with Progressive Era idealism Open to new materials and building types they made lasting contributions with many of their designs now landmarks honored in cities and towns across New England *Romanesque and the Past* John McNeill,Richard Plant,2024-11-01 The nineteen papers collected in this volume explore a notable phenomenon that of retrospection in the art and architecture of Romanesque Europe They arise from a conference organized by the British Archaeological Association in 2010 and reflect its interest in how and why the past manifested itself in the visual culture of the 11th and 12th centuries This took many forms from the casual re use of

ancient material to a specific desire to re present or emulate earlier objects and buildings Central to it is a concern for the revival of Roman and early medieval forms spolia selective quotation archaism and the construction of histories The individual essays presented here cover a wide range of topics and media the significance of consecration ceremonies in the creation of architectural memory the rise of pictorial concepts in 12th century chronicles the creation of history in the Paris of Hugh of St Victor and the appeal of the works of Bernward of Hildesheim and of Hrabanus Maurus in the centuries after their deaths There are studies of buildings and the ideological purpose behind them at Tarragona Ripoll Cluny Pannonhalma Hungary La Roccelletta Calabria and Old St Peter s comparative studies of Trier Villeneuve and Glastonbury and of Bury St Edmunds Rievaulx and Canterbury and wide ranging papers on the tantalizing evidence for an engagement with an overseas past in Ireland an Anglo Saxon past in England and a Milanese past among the aisleless cruciform churches of Augustinian Europe The volume concludes with an assessment of the very concept of Romanesque     Perspectives for an Architecture of Solitude Peter Fergusson,2004     Environmentalism in Landscape Architecture Michel Conan,2000 The papers presented in this volume range from proposals for new design approaches historical analysis of the relationship between the practice of landscape architecture and environmentalism to the theories of early practitioners of landscape architecture imbued by an environmentalist outlook The issues above are addressed through topics as eclectic as the design of American zoos the establishment of the Tennessee Valley Authority road design and maintenance in Texas and criticism of relationships between the words and works of select landscape architects This volume provides a fresh approach to encounters between environmentalism and landscape architecture by reframing the issues through self reflection instead of strategic debate
