Taylor,2024-04-23 This book delivers an innovative critical approach to better understand U S fiction of the information age and argues that in the last eighty years fiction has become increasingly concerned with its representations of mathematical ideas images and practices In so doing this book provides a fuller transnational account of the place of mathematics in understanding mathematically informed novels Literature and science studies have acknowledged and situated historical points of cultural crossover by emphasising mathematics within this larger intellectual context and not as an unlikely and alien adjunct to post war culture this monograph clarifies how mathematically informed postmodern fictions work in a cognate fashion to other fields undergoing structuralist revolutions This is especially evident in fiction by the key mathematically literate Postmodern authors upon whom this study focuses namely Thomas Pynchon Don DeLillo and David Foster Wallace through which recent the technological revolutions facilitated by mathematics manifest in cultural discourse *The Social Lives of Books* Edward Frederick Finn,2011 This project explores how changing models of literary production are blurring or erasing the divisions between authors critics and readers Millions of cultural consumers are participating in previously closed literary conversations and expressing forms of mass distinction through their purchases and reviews of books These traces of popular reading choices constitute a fresh perspective on elusive audience reactions to literature and reveal evolving networks of conversation Employing network analysis

methodologies and distant reading of book reviews recommendations and other digital traces of cultural distinction I develop a new model for literary culture in America today Through readings of the fiction and reception of Thomas Pynchon Toni Morrison David Foster Wallace and Junot Diaz this model outlines the fundamental requirements for contemporary literary fame My introduction outlines methodological tools I developed and situates them in the critical traditions of literary reception cultural sociology and media theory before describing the digital ecologies that have emerged around literature online and their value Chapter 1 explores the nature of literary fame through a case study of Thomas Pynchon whose carefully guarded anonymity and ironic distance from capitalism are reflected in the networks his readers construct around his long challenging books In stark contrast Toni Morrison the subject of Chapter 2 has succeeded critically and commercially tirelessly seeking out readers to form literary communities around her writing most prominently through her collaboration with Oprah s Book Club Chapter 3 considers David Foster Wallace and Junot Diaz and sets out a model for contemporary literary culture a reading society that demands new forms of authorial reflexivity to mirror the collaborative iterative nature of digital literary conversations I conclude with a brief consideration of the exciting prospects and challenges for fiction in a world that reads more than ever but is growing disaffected with the material realities of literary production

Donahue, 2015-02-04 In *Failed Frontiersmen* James Donahue writes that one of the founding and most persistent mythologies of the United States is that of the American frontier Looking at a selection of twentieth century American male fiction writers E L Doctorow John Barth Thomas Pynchon Ishmael Reed Gerald Vizenor and Cormac McCarthy he shows how they reevaluated the historical romance of frontier mythology in response to the social and political movements of the 1960s particularly regarding the Vietnam War civil rights and the treatment of Native Americans Although these writers focus on different moments in American history and different geographic locations the author reveals their commonly held belief that the frontier mythology failed to deliver on its promises of cultural stability and political advancement especially in the face of the multicultural crucible of the 1960s *Cultural Frames Framing Culture* American Literatures Initiative **Mystery, Violence, and Popular Culture** John G. Cawelti, 2004 For two years Philip

Gambone traveled the length and breadth of the United States talking candidly with LGBTQ people about their lives. In addition to interviews from David Sedaris, George Takei, Barney Frank, and Tammy Baldwin, *Travels in a Gay Nation* brings us lesser known voices: a retired Naval officer, a transgender scholar, and drag king; a Princeton philosopher, two opera sopranos who happen to be lovers, an indie rock musician, the founder of a gay frat house, and a pair of Vermont garden designers. In this age when contemporary gay America is still coming under attack, Gambone captures the humanity of each individual. For some, their identity as a sexual minority is crucial to their life's work; for others, it has been less so, perhaps even irrelevant. But whether splashy or quiet, center stage or behind the scenes, Gambone's subjects have managed, despite facing ignorance, fear, hatred, intolerance, injustice, violence, ridicule, or just plain indifference, to construct passionate, inspiring lives.
