Feedback gathers evidence for how highly interactive pedagogically designed formative feedback enhances students memory and understanding The second study entitled Interactive Audio Feedback examines whether the speed enhancements of oral feedback improve the conditions for the production of the lecturer s feedback and the quality of the feedback delivered to the students The final study Interactive Texting Feedback takes a pedagogical approach to provide formative feedback to a student audience using mobile text messages and determines whether Interactive Texting Feedback enhances the learning experience within the e Learning environment The information contained in the book is useful for academics and institutions to improve their teaching and the efficiency of their learning delivery mechanisms and will guide the design of instructional content It will also be of utility to other researchers and those in roles that require an understanding of interactivity
