Small Farmers Big Business Contract Farming And Rural Development:

Small Farmers, Big Business David Glover, Ken Kusterer, 2016-07-27 This book deals with an agricultural production and marketing system known as contract farming CF In this system a public or private agency purchases the crops of independent farmers through contracts often providing inputs technical assistance and marketing CF has a long history in developed countries and has spread to the Third World The book uses case studies from North America Latin America and Africa to assess the experience to date and provide guidelines for the use of CF in the future **Contract Farming and the Development of Smallholder Agricultural Businesses** Joseph A. Kuzilwa, Niels Fold, Arne Henningsen, Marianne Nylandsted Larsen, 2017-08-24 Contract farming has received renewed attention recently as developing economies try to grapple with how to transform the agricultural sector and its associated value chains This book examines different contract arrangements for selected crops applying both qualitative and quantitative approaches in order to examine how contract farming affects smallholders and value chain dynamics in Tanzania Major themes covered in the book include contract farming policy contract farming and value chain dynamics contract farming adoption decisions contract farming and income diversification The authors also discuss alternative aspects of contract farming such as trust conspiracy empowerment and corporate social responsibility The book presents original research from case studies conducted in Tanzania on sugarcane tobacco sunflower and cotton These crops have a history of trials and errors with contract farming involving smallholders Furthermore they are targeted in national strategies as some of the main crops for establishment and upgrading of agro industrial activities in Tanzania Contract farming and public-private partnerships in aquaculture Food and Agriculture Organization of the United Nations, 2018-10-31 Through an array of project outcomes in different countries this paper demonstrates that contract farming is a win win solution because young workers gain access to markets while private companies have access to produce without acquiring land or supervising labour **The Role of Smallholder Farms in Food and Nutrition Security** Sergio Gomez y Paloma, Laura Riesgo, Kamel Louhichi, 2020-05-14 This open access book discusses the current role of smallholders in connection with food security and poverty reduction in developing countries It addresses the opportunities they enjoy and the constraints they face by analysing the availability access to and utilization of production factors Due to the relevance of smallholder farms enhancing their production capacities and economic and social resilience could produce positive impacts on food security and nutrition at a number of levels In addition to the role of small farmers as food suppliers the book considers their role as consumers and their level of nutrition security It investigates the link between agriculture and nutrition in order to better understand how agriculture affects human health and dietary patterns Given the importance of smallholdings strategies to increase their productivity are essential to improving food and nutrition security as well as food diversity *Cooperatives, the State, and Corporate Power in African Export Agriculture* Karin Wedig, 2019-02-22 Agriculture is a major contributor to Africa's GDP the region's biggest source of employment and its

largest food producer However agricultural productivity remains low and buyer driven global value chains offer few opportunities for small producers to upgrade into higher value added activities In recent years the revival of Africa s cooperatives has been celebrated by governments and international donors as a pathway towards inclusive agricultural development and this book explores the strengths but also the issues which surround these cooperatives The book scrutinizes the neoliberal ideal of economic prosperity arising through the operation of liberalized labor markets by illuminating the discriminatory nature of Uganda s informal labor relations It points to the role of cooperatives as a potential instrument of progressive change in African export agriculture where large numbers of small producers depend on casual wage work in addition to farming In contrast to the portrayal advanced by some governments and rarely questioned by donors of an unproblematic co existence of small producers collective action and big capital interests the author calls for a re politicized debate on the Social and Solidarity Economy As part of this she highlights the adverse political and economic conditions faced by African cooperatives including intense international competition in agricultural processing inadequate access to infrastructure and services and at times antagonistic state cooperative relations Supported by wide ranging interdisciplinary evidence including new ethnographic survey and interview data this book shows how cooperatives may be co opted by both the state and corporations in a discourse that ignores structural inequalities in value chains and emphasizes poverty reduction over economic and political empowerment It provides a critique of New Institutional Economics as a framework for understanding how institutions shape redistribution and develops a political economy approach to explore the conditions for structural change in African export agriculture
