A Theory of Disfunctionality: The European Micro-states as Disfunctional States in the International System Archie W. Simpson, 2021-06-01 A Theory of Disfunctionality The European Micro states as Disfunctional States in the International System explains the continuing survival of European micro states as members of the international system Micro states are small sovereign states with populations of 1 million or less of which

there are 10 in Europe The existence of micro states raises a number of questions about the nature of statehood the recognition of sovereignty and the ability of such states to maintain a presence in international politics This book establishes the theory of disfunctionality in which a functional account of statehood is proposed It is argued that the state has six functions but the micro states are so small that they contract out some state functions to others in the international system By doing this the micro states ensure their continuing survival in international politics The book which focuses on two case studies Monaco and Luxembourg will be of particular interest to those involved in small state studies including scholars students practitioners and policy makers as well as those researching International Relations and state theory Mauritius: A successful Small Island Developing State Boopen Seetanah,Raja Sannasse,Robin Nunkoo,2019-11-11 The economic upturn and performance of Mauritius is a far cry from predictions made in the 1960s The island s remarkable economic performance since the 1980s can be attributed to a multitude of factors instrumental to the success of the economy including structural reforms outward looking export orientated strategies diversification in the manufacturing tourism and financial services sectors amongst others sound economic governance and institutions and significant investment in human capital This book attempts to provide a detailed analysis of the various key ingredients which have helped to propel Mauritius to its current status The various chapters provide important readings for both academics and policymakers with the final chapter providing key policy strategies which the government needs to implement to help Mauritius graduate to the next level of development namely to that of a high income economy and in moving out of the middle income trap laying the foundations for future growth and shared prosperity in the light of both domestic challenges and global constraints
