Barren States Carrie B. Douglass,2020-05-25 The fertility rate has dramatically declined across Europe in recent years Globally over sixty four countries have fallen below generation replacement levels and countries in eastern and southern Europe are registering the lowest birth rates in the history of humanity Demographers emphasize that these developments could have serious repercussions for society and public policy from a projected drastic loss of national population numbers to labor shortages and a swelling population of over 65s Typically analysts have approached the issue of low fertility quantitatively and from state levels As a result most research

tends to elide any nuanced understanding of this significant trend Filling a major gap this timely book goes well beyond existing studies to investigate how people experience understand and speak about what is called low fertility On the individual level is there such a thing How do people understand their choices and the perceived limitations on their lives What is the meaning of motherhood for women today How has the definition of family changed What are the particularities of fertility decline in each country And perhaps most importantly what does this tendency toward fewer births mean to the women and men who ultimately become demographic statistics Offering new readings and a much deeper understanding of Europe s decline in fertility this exciting book adds the voices of everyday people to previous state centered studies Overturning a number of assumptions case studies show that having fewer children is often understood positively in Europe as a means to freedom and self empowerment Anyone wishing to understand what low fertility means to the people who live it will find this book essential reading
