Rudolph,2022-12-20 Few people question the importance of science education in American schooling The public readily accepts that it is the key to economic growth through innovation develops the ability to reason more effectively and enables us to solve the everyday problems we encounter through knowing how the world works Good science teaching results in all these benefits and more or so we think But what if all this is simply wrong What if the benefits we assume science education produces turn out to be an illusion nothing more than wishful

thinking In *Why We Teach Science and Why We Should* former high school teacher and historian of science education John L. Rudolph examines the reasons we've long given for teaching science and assesses how they hold up to what we know about what students really learn or don't learn in science classrooms and what research tells us about how people actually interact with science in their daily lives. The results will surprise you. Instead of more and more rigorous traditional science education to fill the STEM pipeline, Rudolph challenges us to think outside the box and makes the case for an expansive science education aimed instead at rebuilding trust between science and the public, something we desperately need in our current era of impending natural challenges and science denial.

The Politics of Museums Clive Gray, 2015-09-15 This is the first book to examine how and why museums are political institutions. By concentrating on the ways in which power, ideology, and legitimacy work at the international, national, and local levels of the museum experience, Clive Gray provides an original analysis of who exercises power and how power is used in museums.

Handbook of Research on Bioeconomy and Economic Ecosystems Pego, Ana, 2023-07-19 Bioeconomy is an essential natural capital for life, citizen well-being, and societal prosperity. After decades of intense, damaging use, pollution, and hydrological stress, Europe's ecosystems are acutely threatened with serious degradation. This situation not only means acute economic loss but also entails catastrophic ecological, social, and cultural damage. *Handbook of Research on Bioeconomy and Economic Ecosystems* is a critical resource that explores the conservation of ecosystems and their biodiversity and discusses potential new challenges in terms of the economic, social, and environmental path for Europe and other regions of the world. Featuring research on topics such as bioeconomy, circular economy, and economic and social analysis, this book is ideally designed for city authorities, experts, officers, business representatives, economists, politicians, academicians, and researchers.

Pedagogical Content Knowledge in STEM Stephen Miles Uzzo, Sherryl Browne Graves, Erin Shay, Marisa Harford, Robert Thompson, 2018-10-25 This volume represents both recent research in pedagogical content knowledge (PCK) in science, technology, engineering, and math (STEM) as well as emerging innovations in how PCK is applied in practice. The notion of research to practice is critical to validating how effectively PCK works within the clinic and how it can be used to improve STEM learning. As the need for more effective educational approaches in STEM grows, the importance of developing, identifying, and validating effective practices and practitioner competencies are needed. This book covers a wide range of topics in PCK in different school levels: middle school, college, teacher training, teacher professional development, and different environments: museums, rural. The contributors believe that vital to successful STEM education practice is recognition that STEM domains require both specialized domain knowledge as well as specialized pedagogical approaches. The authors of this work were chosen because of their extensive fieldwork in PCK research and practice, making this volume valuable to furthering how PCK is used to enlighten the

understanding of learning as well as providing practical instruction This text helps STEM practitioners researchers and decision makers further their interest in more effective STEM education practice and raises new questions about STEM learning Multidisciplinary Aspects of Design Francesca Zanella,Giampiero Bosoni,Elisabetta Di Stefano,Gioia Laura Iannilli,Giovanni Matteucci,Rita Messori,Raffaella Trocchianesi,2023-12-30 This open access book gathers the contributions from the Design OPEN International Conference held in Parma Italy in May 2022 The conference explored the multidisciplinary aspects of design starting from its dimensions objects design as focused on the object on its functional and symbolic dimension and at the same time on the object as a tool for representing cultures processes the designer s self reflective moment which is focused on the analysis and on the definition of processes in various contexts spanning innovation social engagement reflection on emergencies or forecasting experiences design as a theoretical and practical strategy aimed at facilitating experiential interactions among people people and objects or environments and narratives making history representing through different media archiving narrating and exhibiting design The contributions which were selected by means of a rigorous international peer review process highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists **The Cumulative Book Index** ,1913
