Social And Political Sciences Of The Environment Three Decades Of Research In The Netherlands:

Social and Political Sciences of the Environment Pieter Leroy, Nicolaas Johannes Maria Nelissen, 1999 The Netherlands is regarded as a leading country in the field of environmental sciences and its environmental policy is widely considered as sophisticated But what do political and social sciences contribute to this policy What have Dutch political and social scientists achieved with regard to environmental problems and where do they stand in comparison to what is going on internationally The authors give an overview of three decades of research by Dutch political and social scientists of the environment Within that legacy they distinguish studies concerning the structural basis of environmental studies as well as research into environmental attitudes and behaviour environmental communication the environmental movement and environmental policy They identify the predominant research issues and those topics that have hitherto been relatively neglected

Sustainable Development as a Civilizational Revolution Artur Pawlowski, 2011-05-24 As a concept sustainable development is in conflict with traditional development based upon economic growth Sustainable development is an attempt to formulate a programme that integrates different aspects ecological social and economical which were usually considered as separate from each other Sustainable Development as a Civilizationa Greening Society P.J. Driessen, P. Glasbergen, 2013-04-17 This book can be regarded as a monograph on the debates and developments in Dutch environmental policy It has been written with a specific perspective in mind First and foremost the line of approach we have taken was from a multidisciplinary social science point of view The trend in environmental policy is looked at from the angle of sociology policy studies and political science Secondly all analyses depart from the paradigm shift concept This particular paradigm shift is based on the fact that a radical change has taken shape over the years in the way environmental issues are handled Previously environmental policy had always been characterised by is top down approach in which government determined the actual objectives of policy and assumed that it could win over business non governmental organisations and citizens to act in line with those objectives There was also a great deal of faith in the technical solutions to environmental issues Today s environmental policy is based on a totally different philosophy Environmental objectives are now reached in association with business non governmental organisations and citizens These actors are also involved in bringing environmental policy into practice In other words the implementation of policy has a more interactive nature New relationships emerge between government the market and civil society and policy discourses also become integrated The environmental interest is more often weighed against the economic interests the spatial development and against social justice

Institutional Dynamics in Environmental Governance Bas Arts, Pieter Leroy, 2006-09-09 Environmental policy in its broadest context has been significantly revitalized and renewed during the last two decades That observation is nothing new attested to by the number of publications conferences and both private and public projects that have been initiated However our understanding of the dynamics of this renewal has generally been informed by studies on single policies and projects leaving us with a

limited understanding of what the newness consists of in terms of an integrated perspective This book presents fresh analyses of a number of well known cases but does so from one comprehensive view the so called policy arrangement approach Cases discussed range over organic farming integrated water management nature policy cultural heritage policy integrated region oriented policy corporate environmental management and target group policy always in search of the commonality of experience and conclusions to be drawn in understanding the past and in formulating future perspectives

Partnerships, Governance and Sustainable Development P. Glasbergen, Frank Biermann, A. P. J. Mol, 2007 this is a book to read for anybody who wants a good overview of ongoing research on environmental partnerships in public administration business administration political science and sociology Thomas Sikor *Journal of Integrative Environmental Sciences* The profit of this book is the well proportioned mixture of theoretical reflections and empirical findings mostly presented in the form of case studies the volume offers a well structured and recommendable account of the current state of governance and partnerships in the field of sustainable development Thomas Krumm *Political Studies Review* This well structured volume brings together a group of leading experts on an important emerging topic of global and local environmental policy The book is highly recommended for every student and scholar in the field of environmental governance Martin J. Nicke *Freie Universität Berlin Germany* Partnerships have emerged as a critical best practice in the pursuit of sustainability Glasbergen, Biermann and Mol's book explores the partnership issue from a variety of empirical and theoretical perspectives highlighting how to understand them and what not to do Highly recommended Daniel C. Esty *Yale University US* This significant study discusses the emergence of partnerships for sustainable development as an innovative and potentially influential new type of governance With contributions from leading experts in the field the partnership paradigm is discussed and the contributors explore the process extent and circumstances under which partnerships can improve the legitimacy and effectiveness of governance for sustainable development Scientific research on partnerships within the context of governance theory is fairly new and there is a clear need to systemize a knowledge base to further define the international research agenda In addition there is an urgent demand from governments and international organizations as well as from non governmental actors for strategic insights to build upon their activities in this field This book is designed to address the questions debates and agendas related to this new mode of governance This multi disciplinary book brings together unique perspectives from organizational theory policy science sociology and political science As such it will be warmly welcomed by academics of environmental policy and politics as well as scholars and researchers interested in governance for sustainable development It will also appeal to public policy scholars

Governing Environmental Flows Gert Spaargaren, A. P. J. Mol, Frederick H. Buttel, 2006 Lays the foundations for a new conceptualization of global environmental governance that draws on the flow perspective found in recent work in sociology ***International Social Science Journal***, 2004 Handbook of Environmental Sociology Riley E. Dunlap, William Michelson, 2002 *Environmental sociology an introduction Sociological*

African Pastoralism M. A. Mohamed Salih, Ton Dietz, Abdel Ghaffar Mohamed Ahmed, 2001-07-20 Although many countries in Africa are devastated by poverty and famine and are desperately in need of aid it is generally recognised that programmes of aid and development in Africa are imposed upon local communities with little regard for their traditional values and way of life This book provides a fresh look at these intricate issues and explores the way in which farming and traditional pastoral livelihoods have strengthened rather than weakened in the face of government reforms It reveals how traditional institutions and resource management strategies within local African communities continue to endure in spite of the enormous pressure that development programs assert as pastoralists resolve to confront coercive state policies designed to privilege the interests of the wealthy and powerful elite The book introduces thirteen case studies from Botswana Ethiopia Eritrea Kenya Somalia Sudan and Uganda and various other parts of the African continent
