Modernization and Postmodernization Ronald Inglehart, 2020-06-30 Ronald Inglehart argues that economic development cultural change and political change go together in coherent and even to some extent predictable patterns This is a controversial claim It implies that some trajectories of socioeconomic change are more likely than others and consequently that certain changes are foreseeable Once a society has embarked on industrialization for example a whole syndrome of related changes from mass mobilization to diminishing differences in gender roles is likely to appear These changes in worldviews seem to reflect changes in the economic and political environment but they take place with a generational time lag and have considerable autonomy and momentum of their own But industrialization is not the end of history Advanced industrial society leads to a basic shift in values de emphasizing the instrumental rationality that characterized industrial society Postmodern values then bring new societal changes including democratic political institutions and the decline of state socialist regimes To demonstrate the powerful links between belief systems and political and socioeconomic variables this book draws on a unique database the World Values Surveys This database covers a broader range than ever before available for looking at the impact of mass publics on political and social life It provides information from societies representing 70 percent of the world s population from societies with per capita incomes as low as 300 per year to those with per capita incomes one hundred times greater and from long established democracies with market economies to authoritarian states

Directions Of Change Mustafa O. Attir, 2019-03-01 After a period of relative confidence about the future of modernizing societies scholars are now questioning with renewed urgency the directions of the modernization trend This book the result of nearly a decade of collaborative efforts by scholars in twelve countries examines the modernization process with particular attention to how it is affected by cultural and especially socioeconomic variables The authors describe major theoretical approaches to the idea of modernity and point to the sociological issues interlinked with modernization They also consider specific factors such as nationalism ethnicity and traditional institutions and show how they can determine differing modernization trajectories The concluding section of the book focuses on nation and culture specific examples of modernization presenting case studies that illustrate the range of modernization attempts The authors also explore the extent to which modernization may in fact be a generalization of the American way of life
