Boosting Immunity Len Saputo, MD, Nancy Faass, MSW, MPH, 2010-11-22 Every day the human body fights off environmental toxins airborne germs chemicals in food and any number of other damaging substances How the body manages it and how people can help the process along are the subjects of Boosting Immunity Topics include Acidity alkalinity Allergies Body temperature Diet Digestive flora Nutrients Exercise Sleep Working with experts in these fields Dr Saputo and Nancy Faass have created an informative book that provides easy to implement lifestyle guidelines for maximum health *Chronic Fatigue Syndromes* Jay Goldstein, 2020-08-26 Chronic Fatigue Syndrome CFS is

now a recognized major and international medical concern Neglected for many years because of its puzzling wide range of symptoms and inability to be slotted into any single mainstream medical discipline CFS has gained government academic and public attention In this innovative book Dr Jay Goldstein provides a medical narrative of an evolving theory of how the symptoms of CFS may develop through dysfunction of numerous physiological pathways He describes the biologic basis of these assumptions and based on an analysis of basic medical principles leads the reader to logical conclusions In addition Dr Goldstein reveals a wealth of clinical experience by describing successes and failures of various therapies and discusses the reasons for the outcomes Dr Goldstein s private practice is devoted to patients who fit the profile of a CFS sufferer As a result his extensive clinical experience has given him a unique hands on perspective not readily available to most researchers

Chronic Fatigue Syndromes The Limbic Hypothesis carefully reviews the extant research literature in each chapter Although Dr Goldstein cautions that this model should be viewed only as a PROMISING FOUNDATION for future research no less than six peer reviewers all leading researchers and clinicians in the CFS field have endorsed the direction of Dr Goldstein s bold proposition The breadth and scope of this book is perhaps best summarized by Paul Cheney MD PhD a national leader in the field Despite its long history the medical establishment with its great advances in biotechnology has been largely unable to crack the basic pathophysiology of the chronic fatigue syndrome Dr Goldstein s new book takes us to a place few people know well and describes a plausible mechanism of injury to the deep brain which could explain every symptom seen in patients with chronic fatigue syndrome It is the unifying power of his hypothesis together with emerging scientific support for this view that makes this book an important one to read for both the patient with CFS as well as the practitioner and medical scientist who attempt to understand it
