Hetherington, 2018-06-05 American public policy has become demonstrably more conservative since the 1960s Neither Jimmy Carter nor Bill Clinton was much like either John F Kennedy or Lyndon Johnson The American public however has not become more conservative Why then the right turn in public policy Using both individual and aggregate level survey data Marc Hetherington shows that the rapid decline in Americans political trust since the 1960s is critical to explaining this puzzle As people lost faith in the federal government the delivery system for most progressive policies they supported progressive ideas much less The 9 11 attacks increased such trust as public attention focused on security but the effect was temporary Specifically Hetherington shows that as political trust declined so too did support for redistributive programs such as welfare and food stamps and race targeted programs While the presence of race in a policy area tends to make political trust important for whites trust affects policy preferences in other non race related policy areas as well In the mid 1990s the public was easily swayed against comprehensive health care reform because those who felt they could afford coverage worried that a large new federal bureaucracy would make things worse for them In demonstrating a strong link between public opinion and policy outcomes this engagingly written book represents a substantial contribution to the study of public opinion and voting behavior policy and American politics generally Mystery Fanfare Michael L. Cook, 1983 This work is a composite index of the complete runs of all mystery and detective fan magazines that have been published through 1981 Added to it are indexes of many magazines of related nature This includes magazines that are primarily oriented to boys book collecting the paperbacks and the pulp magazine hero characters since these all have a place in the mystery and detective
