

A scenic landscape featuring a winding asphalt road that leads into the distance, flanked by dark, silhouetted mountains. The sky is filled with soft, orange and yellow clouds, suggesting a sunset or sunrise. The overall mood is contemplative and serene.

Are all humans human? Or are

Some Are More Human Than Others

Erik Parens, Josephine Johnston

Some Are More Human Than Others:

Some are More Human Than Others Stevie Smith, 1989 The British poet Stevie Smith as her many readers well know sprinkled her drawings throughout her poetry collections In this sketchbook *Some Are More Human Than Others* she did the opposite she spiced her drawings with words Together they resound with what Robert Lowell described as Smith s unique and cheerfully gruesome voice and open up a little world of peculiar experience something somber and something gay innocent and cruel truths of our world trapped off guard , **Making Human Rights Real** Filip Spagnoli, 2007 Here in a nutshell readers may find a description of the most important characteristics of human rights and a clear and concise discussion of the problem of making human rights real and not just hypothetical Building on definitions of human rights used by the United Nations and other international bodies the author describes the main characteristics of the system of human rights universality interdependence differences between types of rights absolute or limited rights the subjects of rights individuals or groups the link between rights and the judicial system and between rights and democracy He then discusses some of the instruments we can use to promote respect for human rights the means by which we might make these rights real for a greater portion of humanity Along the way he analyzes some of the related controversies regarding sovereignty international intervention and globalization and questions of cultural imperialism as they bear upon human rights Do we have a right to impose rights or to defend ourselves from such intervention This systematic discussion presents a complex and difficult topic in an understandable framework accessible to the general public and will stand as a useful foundation for readings of more specialized scientific legal and philosophical works Where most human rights books for the nonspecialist focus on specific instances of rights abuses this work provides a more general approach focused on the logic in the system of human rights Filip Spagnoli obtained his PhD at the University of Brussels He has written numerous OpEd articles in leading Belgian newspapers and specialized articles in philosophical periodicals and two books *Homo Democraticus On the Universal Desirability but the Not So Universal Possibility of Democracy and Human Rights* 2003 and *Democratic Imperialism A Practical Guide* 2004 Employed by the research and statistics directorate of the Belgian Central Bank Spagnoli is a guest speaker at conferences and universities and has participated in European Commission study visits to Eastern European countries with the aim of delivering statistical expertise and helping these countries to achieve membership of the European Union Enforcing and Challenging the Voting Rights Act Marsha Darling, 2014-02-24 Political redistricting is one of the most controversial issues in contemporary American society The practice of shaping voting districts to enhance the political representation of minorities at all levels of government emerged as a legal remedy for redressing the systematic historical exclusion of minority political representation It continues to have vocal and active defenders and detractors to this day with court rulings upholding or challenging the practice every year The controversies of redistricting have challenged America s commitment to participatory democracy and America s ability to account for its historical record of voting and racial

discrimination The legal and historical arguments addressing the policy of redistricting and the constitutional issues surrounding it revolve around interpretations of the Fifteenth Amendment and America's ability to accept or reject race based solutions to political representation This three volume set brings together all the major legal cases and the most influential articles on the legal and historical arguments surrounding this issue [An Exploration of Space 1999 Through the Lens of Fan Fiction: Forever Alpha](#) John K. Balor, 2019-07-10 An essential introduction to a rapidly growing field of study AN EXPLORATION OF SPACE 1999 THROUGH THE LENS OF FAN FICTION gathers in one place the complete 2015 16 Online Alpha discussion of the SPACE 1999 fan fiction corpus with a focus on the FOREVER ALPHA fan fiction series Collected here are central viewpoints and arguments by Online Alpha discussants that have dominated Online Alpha debates in recent years Editor John K Balor provides a cogent introduction that places each piece in its historical and intellectual context mapping the discussion and suggesting future trajectories The book has been developed on an idealistic basis It is sold at the lowest price the publisher was willing to accept A free e book version can be downloaded at www.lulu.com

GMOs, Consumerism and the Global Politics of Biotechnology Mawere, Munyaradzi, Nhemachena, Artwell, 2017-08-16 Despite sustained continental and national struggles for autonomy sovereignty and independence in postcolonial Africa the continent is increasingly embattled by the forces of globalisation which threaten African identity that is at the core of African struggles for continental and national unity Situating the debates in the contemporary discourses on decoloniality global consumerism global food apartheid and the challenges and prospects of the emergent sharing economies this book critically examines the importation use and implications of genetically modified organisms GMOs and other such non food products on African bodies institutions and cultures The book poses questions about how Africa can be decolonised both politically and in terms of global food apartheid and the dehumanising importation and use of foreign non food products some of which militate against the ethos of African identity Renaissance and indigeneity On note the book urges the African continent to ensure the safety of imports ensuing from the global flows and circulations that are mired in the resilient invisible global matrices of power *Transformation of a Common Man* James E. Frazier, 2002-07-29 From Time Beyond all time he came From the misty fire of Light and Sound he descended into Form I AM I AM his name thundered through the infinite void Demons stirred Ancient gods of the earth and angels of heaven awoke to peer through misty veils of eternity The time of reaping had come to God's last creation to man on earth to the blue white world of water to the Garden planet Shining angels shook moist golden wings Demons rattled dry curses from leathery throats Giants sylphs and avatars all wanted in the game The time has come again for the Host From the white haired Old Man flowed a joyous song for all to hear Let the Play of Life begin Let the Play of Life begin **What Job's Friends Could Have Done** Stephen Torr, 2025-08-19 In a world that is becoming more aware of the impact of traumatic experiences on the lives of individuals the church is faced with the challenge of examining how to do life well together in a way that helps rather than hinders those who are living in

the aftermath of trauma Beginning with the question of what Job s friends could have done differently to help Job in the midst of his suffering the present work draws on Kevin Vanhoozer s theodramatic model and the Object Relations Theory of British pediatrician and psychoanalyst Donald Winnicott to provide biblically rooted guidance for developing a trauma sensitive church In bringing these perspectives together exploration takes place into what it means to be made in the image of God in the theodrama and what the church s role is in enabling the christological form of this image to take shape in each individual particularly in the aftermath of individual trauma The work of Winnicott provides fresh insight into how this development might be facilitated by the church within the theodrama of salvation

Dimensions of Human Behavior Elizabeth D.

Hutchison,Leanne Wood,2024-02-20 Dimensions of Human Behavior Person and Environment offers a comprehensive examination of human behavior using a multidimensional framework The new Seventh Edition delves into diversity neuroscience and the impact of the COVID 19 pandemic complemented by new case studies

The Self, Ethics & Human Rights Joseph Indaimo,2015-02-11 This book explores how the notion of human identity informs the ethical goal of justice in human rights Within the modern discourse of human rights the issue of identity has been largely neglected However within this discourse lies a conceptualisation of identity that was derived from a particular liberal philosophy about the true nature of the isolated self determining and rational individual Rights are thus conceived as something that are owned by each independent self and that guarantee the exercise of its autonomy Critically engaging this subject of rights this book considers how recent shifts in the concept of identity and more specifically the critical humanist notion of the other provides a basis for re imagining the foundation of contemporary human rights Drawing on the work of Jacques Lacan and Emmanuel Levinas an inter subjectivity between self and other always already marks human identity with an ethical openness And this book argues it is in the shift away from the human self as a sovereign individual that human rights have come to reflect a self identity that is grounded in the potential of an irreducible concern for the other

Human Flourishing in an Age of Gene Editing

Erik Parens,Josephine Johnston,2019-07-29 International uproar followed the recent announcement of the birth of twin girls whose genomes had been edited with a breakthrough DNA editing technology This technology called clustered regularly interspaced short palindrome repeats or CRISPR Cas9 can alter any DNA including DNA in embryos meaning that changes can be passed to the offspring of the person that embryo becomes Should we use gene editing technologies to change ourselves our children and future generations to come The potential uses of CRISPR Cas9 and other gene editing technologies are unprecedented in human history By using these technologies we eradicate certain dreadful diseases Altering human DNA however raises enormously difficult questions Some of these questions are about safety Can these technologies be deployed without posing an unreasonable risk of physical harm to current and future generations Can all physical risks be adequately assessed and responsibly managed But gene editing technologies also raise other moral questions which touch on deeply held personal cultural and societal values Might such technologies redefine what it means

to be healthy or normal or cherished Might they undermine relationships between parents and children or exacerbate the gap between the haves and have nots The broadest form of this second kind of question is the focus of this book What might gene editing and related technologies mean for human flourishing In the new essays collected here an interdisciplinary group of scholars asks age old questions about the nature and well being of humans in the context of a revolutionary new biotechnology one that has the potential to change the genetic make up of both existing people and future generations Welcoming readers who study related issues and those not yet familiar with the formal study of bioethics the authors of these essays open up a conversation about the ethics of gene editing It is through this conversation that citizens can influence laws and the distribution of funding for science and medicine that professional leaders can shape understanding and use of gene editing and related technologies by scientists patients and practitioners and that individuals can make decisions about their own lives and the lives of their families

Coast Banker, 1921 *The Assault on American Excellence* Anthony T. Kronman, 2020-08-11 I want to call it a cry of the heart but it s more like a cry of the brain a calm and erudite one Peggy Noonan The Wall Street Journal The former dean of Yale Law School argues that the feverish egalitarianism gripping college campuses today is a threat to our democracy College education is under attack from all sides these days Most of the handwringing over free speech safe zones trigger warnings and the babying of students has focused on the excesses of political correctness That may be true but as Anthony Kronman shows it s not the real problem Necessary humane and brave Bret Stephens The New York Times The Assault on American Excellence makes the case that the boundless impulse for democratic equality gripping college campuses today is a threat to institutions whose job is to prepare citizens to live in a vibrant democracy Three centuries ago the founders of our nation saw that for this country to have a robust government it must have citizens trained to have tough skins to make up their own minds and to win arguments not on the basis of emotion but because their side is closer to the truth Without that Americans would risk electing demagogues Kronman is the first to tie today s campus clashes to the history of American values drawing on luminaries like Alexis de Tocqueville and John Adams to argue that our modern controversies threaten the best of our intellectual traditions His tone is warm and wise that of an educator who has devoted his life to helping students be capable of living up to the demands of a free society and to do so they must first be tested in a system that isn t focused on sympathy at the expense of rigor and that values excellence above all

At the Dawn of Modernity David Levine, 2001-02-19 This examination of the social history of modernization investigates the centuries that followed the year 1000 when a new kind of society emerged in Europe The text highlights both the top down and bottom up changes that characterized the social experience of early modernization

Men, Masculinities, and Earth Paul M. Pulé, Martin Hultman, 2021-08-03 This book considers issues of social and ecological significance through a masculinities lens Earth our home for aeons is reeling The atmosphere is heating up causing reefs to bleach fisheries to collapse regions to flood and dry vast tracts to burn the polar ice caps to melt ancient glaciers to retreat biodiversity to decline exacerbated by the sixth great extinction and more Meanwhile social and economic disparities are widening Pandemics are cauterising global communities and altering our social mores Nationalism is feeding divisiveness and hate especially through men's violence Politically extreme individuals and groups are exalting freedom while scapegoating the marginalised Such are the symptoms of an emerging Anthropocene This anthology contends with these alarming trends pointing our attention towards their gendered origins Building on our monograph Ecological Masculinities Theoretical Foundations and Practical Guidance 2018 this collection of essays is framed as a dinner party conversation grouped into six discursive themes Their views reflect a growing community of practice whose combined efforts capture the most recent perspectives on masculine ecologisation Together they aim to help create a more caring world for all moving the ecological masculinities conversation forward as it becomes an established international and pluralised field of study

Disabling Leadership Andrew T. Draper, Jody Michele, Andrea Mae, 2023-12-12 Churches must both consider the theology of disability and also become places where people with disabilities lead Moving beyond paternalistic views of disability this book encompasses cutting edge theological ethics as well as practical examples of how church leaders and congregants can foster genuinely inclusive leadership teams

The Human Dilemma Barbara Dole Larsen, 2009-12 Who has never wondered why people behave the way they do They create glorious music art and literature They have uncovered the secrets of the universe and disease yet have not been able to figure out how to get along with each other without war The Human Dilemma sets out to find out why It describes how humans evolved how their wonderful brains work and what they are like when they are born The author explores the reasons individuals grow up with different personalities depending on the societies in which they mature from hunter gatherers in Africa to industrial Americans She then turns to relationships between the sexes the temptations of power and why religious differences lead to violence The Human Dilemma explains in simple readable language how human nature customs and beliefs interfere with mankind's ability to resolve the overwhelming problems facing the world today Violent conflicts between cultures have become more volatile over the years Many believe it is man's nature to fight yet ancient civilizations like Crete were peaceful and everyone was treated equally

women as well as men The same is true of two hunting gathering tribes in Africa that have followed the same way of life for thousands of years Perhaps it is just as human to cooperate peacefully in solving problems as it is to fight over them and just as human to see our fellows as equal instead of superior or inferior Why then do men regard women as inferior in so many societies And why do so many nations plunge into battle especially since the invention of nuclear bombs makes it possible to wipe out our entire species The newest peril is global warming caused by the spewing of carbon into the atmosphere from burning fossil fuels which may eventually change our climate back to the days before mankind existed Some animals have already become extinct because they cannot adjust to warmer weather Humans may not survive such a drastic change Our magnificent brains are capable of inventing solutions to all the problems confronting us and entrepreneurs are eager to put these inventions into practice Why then don't we do it Is there some flaw in our nature that makes it easier to blame each other instead and find excuses for relieving our frustrations in warfare As the author studied the sciences for answers to her questions she became convinced that only by fully understanding our nature and the reasons why it is difficult for us to confront our problems can we hope to resolve them and continue to survive Her conclusions are found in *The Human Dilemma* An original and thought provoking book which will appeal to a very wide audience Richard Edelman Psychoanalyst In her wonderfully wide ranging exploration of human nature Barbara Larsen has distilled her research into a lucid and absolutely fascinating book Richard Edelman Psychoanalyst The writer's style is open and exploratory warmly self sharing and it is an enjoyable as well as a searching and provocative learning experience Saul L Brown Emeritus Chairman Department of Psychiatry Cedars Sinai Medical Center Los Angeles CA Larsen skillfully weaves together current theory and research from an impressive variety of sources Arthur A Dole Emeritus Professor of Education University of Pennsylvania

Human Rights and the Capabilities Approach Diane Elson, Sakiko Fukuda-Parr, Polly Vizard, 2014-06-11 Among several contesting views about the purpose of development and how progress should be evaluated human rights and capabilities or human development stand out as two approaches that are concerned first and foremost with the well being of individuals their freedom dignity and empowerment These two approaches contrast sharply with the dominant development frameworks that emphasize economic growth as the essential objective Though human rights and capabilities share these common commitment to human priorities they are distinct concepts and fields that have developed separately The aim of this volume is to explore the relationship between them in order to enhance the understanding of both as theoretical paradigms as public policy frameworks and as approaches to development The book includes contributions from some of the leading scholars in the two fields of capabilities approach and human rights It covers the essential aspects of this relationship addressing the complementarities between human rights and capabilities as theoretical concepts how the concept of capabilities can contribute to resolving some key theoretical issues in human rights how the social science analysis and methods of the capabilities approach can clarify human rights concepts and strengthen human rights advocacy and how

human rights norms can strengthen public policy and mobilize collective action to demand greater accountability in placing human priorities first in public policy Human Rights and the Capabilities Approach raises many questions for further interdisciplinary conversation and further research This book was originally published as a special issue of the Journal of Human Development and Capabilities and has been expanded with two additional articles from this journal and a new foreword by Professor Amartya Sen

Fellow Creatures Christine M. Korsgaard, 2018-06-18 Christine M Korsgaard presents a compelling new view of humans moral relationships to the other animals She defends the claim that we are obligated to treat all sentient beings as what Kant called ends in themselves Drawing on a theory of the good derived from Aristotle she offers an explanation of why animals are the sorts of beings for whom things can be good or bad She then turns to Kant's argument for the value of humanity to show that rationality commits us to claiming the standing of ends in ourselves in two senses Kant argued that as autonomous beings we claim to be ends in ourselves when we claim the standing to make laws for ourselves and each other Korsgaard argues that as beings who have a good we also claim to be ends in ourselves when we take the things that are good for us to be good absolutely and so worthy of pursuit The first claim commits us to joining with other autonomous beings in relations of moral reciprocity The second claim commits us to treating the good of every sentient creature as something of absolute importance Korsgaard argues that human beings are not more important than the other animals that our moral nature does not make us superior to the other animals and that our unique capacities do not make us better off than the other animals She criticizes the marginal cases argument and advances a new view of moral standing as attaching to the atemporal subjects of lives She criticizes Kant's own view that our duties to animals are indirect and offers a non utilitarian account of the relation between pleasure and the good She also addresses a number of directly practical questions whether we have the right to eat animals experiment on them make them work for us and fight in our wars and keep them as pets and how to understand the wrong that we do when we cause a species to go extinct
