

Moments in 2D:

Moments in 2D can be calculated using the **Principle of Transmissibility**:

- If a force acting on a rigid body is transmitted along its line of action, the effect of this force on the rigid body remains unchanged

As **moments are vectors**, they must have a magnitude and **direction**:

- In engineering, we typically select as **counter-clockwise** rotations (CCW) as positive and **clockwise** rotations (CW) as negative!
