English Literature, Its History and Its Signi the English-Speaking World William J. Long, 2016-09-05 This book which presents the whole splendid history of English literature from Anglo Saxon times to the close of the Victorian Era has three specific aims The first is to create or to encourage in every student the desire to read the best books and to know literature itself rather than what has been written about literature The second is to interpret literature both personally and historically that is to show how a great book generally reflects not only the author's life and thought but also the spirit of the age and the ideals of the nation's history The third aim is to show by a study of each successive period how our literature has steadily developed from its first simple songs and stories to its present complexity in prose and poetry To carry out these aims we have introduced the following features 1 A brief accurate summary of historical events and social conditions in each period and a consideration of the ideals which stirred the whole nation as in the days of Elizabeth before they found expression in literature 2 A study of the various literary epochs in turn showing what each gained from the epoch preceding and how each aided in the development of a national literature 3 A readable biography of every important writer showing how he lived and worked how he met success or failure how he influenced his age and how his age influenced him 4 A study and analysis of every author's best works and of many of the books required for college entrance examinations 5 Selections enough especially from earlier writers and from writers not likely to be found in the home or school library to indicate the spirit of each author's work and directions as to the best works to read and where such works may be found in inexpensive editions 6 A frank untechnical discussion of each great writer's work as a whole and a critical estimate of his relative place and influence in our literature

Selected Writings of an Eighteenth-Century Venetian Woman of Letters Elisabetta Caminer Turra, 2007-11-01 Elisabetta Caminer Turra 1751-96 was one of the most prominent women in eighteenth century Italy and a central figure in the international Republic of Letters A journalist and publisher Caminer participated in important debates on capital punishment freedom of the press and the abuse of clerical power She also helped spread Enlightenment ideas into Italy by promoting and publishing Voltaire's latest works and translating new European plays plays she herself directed to great applause on Venetian stages Bringing together Caminer's letters poems and journalistic writings nearly all published for the first time here Selected Writings offers readers an intellectual biography of this remarkable figure as well as a glimpse into her intimate correspondence with the most prominent thinkers of her day But more important Selected Writings provides insight into the passion that animated Caminer's fervent reflections on the complex and shifting condition of women in her

society the same passion that pushed her to succeed in the male dominated literary professions **Outlines of English and American Literature** William Joseph Long,1917 **The Cambridge History of English Literature** Sir Adolphus William Ward,Alfred Rayney Waller,1914 Some Eighteenth Century Men of Letters Whitwell Elwin,1973 **Rethinking History, Science, and Religion** Bernard Lightman,2019-10-03 The historical interface between science and religion was depicted as an unbridgeable conflict in the last quarter of the nineteenth century Starting in the 1970s such a conception was too simplistic and not at all accurate when considering the totality of that relationship This volume evaluates the utility of the complexity principle in past present and future scholarship First put forward by historian John Brooke over twenty five years ago the complexity principle rejects the idea of a single thesis of conflict or harmony or integration or separation between science and religion Rethinking History Science and Religion brings together an interdisciplinary group of scholars at the forefront of their fields to consider whether new approaches to the study of science and culture such as recent developments in research on science and the history of publishing the global history of science the geographical examination of space and place and science and media have cast doubt on the complexity thesis or if it remains a serviceable historiographical model The Cambridge History of English Literature ,1914 The Academy and Literature ,1903 *A History of English Literature from Beowulf to 1926* William Vaughn Moody, Robert Morss Lovett,1926 *Catalogue* Bernard Quaritch (Firm),1905
