Sonar Ten Years:

The Golden Goose Ate All The Grassroots Jim Jacobs, 2002-08-22 If you like politics or even if you don't or if you've ever wondered why someone would ever run for political office The Golden Goose Ate The Grassroots will more than hold your interest. However, if you have ever wondered what kind of person would throw his hat into the ring with little chance of winning, if you take your humor subtle and tend to root for the underdog The Golden Goose Ate The Grassroots is a must read. You will chuckle, you will laugh out loud, you will cry, you will shake your head at the absurdity of our political process and you will come away with an understanding of the campaign intricacies that can only be imparted by someone who has been there. Done that. This candidate was probably the most underfunded, non-experienced candidate in the nation. Yet the candidate author received over 86,000 votes enough to be elected in a lot of congressional districts in the country. He had no political experience or connections, no name recognition, no money, no organization, and no idea what he was doing. Yet he ran against a super-funded two-term incumbent in a two-to-one negative demographic district, navigated the minefield that has befallen countless politically seasoned hopefuls, and still managed to scare the hell out of his opponent and make a statement. Had he won, this would be the political How To book of the year. That he didn't makes it an even greater story, and there are no sour grapes crushed between these covers.

Space-Time Wireless Systems H. Bölcskei, D. Gesbert, C. B. Papadias, A.-J. van der Veen, 2006-06-15 This is a comprehensive reference for readers wanting to learn about the entire range of relevant aspects in wireless communications.

SubSig David H. Reynhout, 2002-07-04 For nearly a century the name Submarine Signal meant something special to its thousands of employees, to its many competitors, and to practitioners of the art of underwater acoustics the world over. From its modest beginnings in 1901 as Submarine Signal Company through its elevation to a full division of Raytheon Company in 1963 to its submergence into a new organization in 1998, SubSig as it was known was a vital part of the free world's defense, an important contributor to underwater acoustics and undersea technology. Though never the subject of an organizational excellence survey, it became home and family to the thousands of employees who made SubSig what it was: unassuming yet confident, relaxed yet hard working, but with an accommodating persistence. History will record that SubSig was a pioneer in sonar and radar technologies. This book is an attempt at describing the events and people that made it a unique place.

Harbour Protection Through Data Fusion Technologies Elisa Shahbazian, Galina Rogova, Michael J. de Weert, 2008-12-03 An Advanced Research Workshop (ARW) Data Fusion Technologies for Harbour Protection was held in Tallinn, Estonia, 27 June - 1 July 2005. This workshop was organized by request of the NATO Security Through Science Programme and the Defence Investment Division. An ARW is one of many types of funded group support mechanisms established by the NATO Science Committee to contribute to the critical assessment of existing knowledge on new important topics, to identify directions for future research, and to promote close working relationships between scientists from different countries and with different professional experiences. The NATO Science Committee was

approved at a meeting of the Heads of Government of the Alliance in December 1957 subsequent to the 1956 recommendation of Three Wise Men Foreign Ministers Lange Norway Martino Italy and Pearson Canada on Non Military Cooperation in NATO The NATO Science Committee established the NATO Science Programme in 1958 to encourage and support scientific collaboration between individual scientists and to foster scientific development in its member states In 1999 following the end of the Cold War the Science Programme was transformed so that support is now devoted to collaboration between Partner country and NATO country scientists or to contributing towards research support in Partner countries Since 2004 the Science Programme was further modified to focus exclusively on NATO Priority Research Topics i e Defence Against Terrorism or Countering Other Threats to Security and also preferably on a Partner country priority area
