various areas of contemporary phenomenology including several distinct schools of Husserl and Heidegger scholarship as well as approaches derived from Merleau Ponty de Beauvoir Fanon and others An innovative quantitative analysis of citation networks provides rich visualizations of the field as a whole The second part showcases phenomenology as a living discipline that can advance research in other areas While some areas of interaction between phenomenology and other disciplines are by now well established e g cognitive science this volume sheds light on newer areas of application The goal is to move beyond discussions of philosophical method and highlight scholars who are actually doing phenomenology in a variety of areas including Embodiment and questions of gender race and identity The arts visual art literature architecture and Archaeology and anthropology This volume offers a concise introduction to cutting edge phenomenological research and is suitable for both students and specialists

Kierkegaard, Metaphysics and Political Theory Alison Assiter, 2011-10-27 Alison Assiter argues that the notion of the person that lies at the heart of the liberal tradition is derived from a Kantian and Cartesian metaphysic This metaphysic according to her is flawed and it permeates a number of aspects of the tradition Significantly it excludes certain individuals those who are labelled mad or evil Instead she offers an alternative metaphysical image of the person that is derived largely from the work of Kierkegaard Assiter argues that there is a strand of Kierkegaard's writing that offers a metaphysical picture that recognises the dependence of people upon one another He offers a moral outlook derived from this that encourages people to love one another Inspired by Kierkegaard Assiter goes on to argue that it is useful to focus on needs rather than rights in moral and political thinking and to defend the view that it is important to care about others who may be far removed from each one of us Furthermore she argues it is important that we treat those who are close to us well

Marginality in Philosophy and Psychology George Tudorie, 2022-04-07 Discussing marginality from an analytic perspective and drawing on canonical theories by a diverse set of authors such as Dilthey Collingwood Wittgenstein Foucault John McDowell Susan Carey Michael Tomasello and Chris Frith this book is an important contribution to ongoing debates on marginality among psychiatrists psychologists social scientists and philosophers Psychology often resorts to overambitious theorizing due to a perceived pressure to justify its scientific credentials Taking the cases of preverbal children and mentally ill patients George Tudorie illustrates that applying overarching and unifying explanations to marginal subjects is problematic arguing instead that those at the margins should be given their proper explanatory autonomy Tudorie examines recent cognitive theories on early development in children to reveal the difficulties of conceptualising the emergence of human abilities while also demonstrating how cognitive accounts of psychosis built around the typical concepts of belief desire intention psychology eventually falter In doing so he reveals that interpretation is not a route psychology can take at the margins and calls for a clearer view of explanatory options in marginal cases

From Logic to Practice Gabriele Lolli, Marco Panza, Giorgio Venturi, 2014-11-28 This book brings together young researchers from a variety of fields within mathematics philosophy and logic It discusses questions that arise in their work as well as themes and reactions that appear to be similar in different contexts The book shows that a fairly intensive activity in the philosophy of mathematics is underway due on the one hand to the disillusionment with respect to traditional answers on the other to exciting new features of present day mathematics The book explains how the problem of applicability once again plays a central role in the development of mathematics It examines how new languages different from the logical ones mostly figural are recognized as valid and experimented with and how

unifying concepts structure category set are in competition for those who look at this form of unification It further shows that traditional philosophies such as constructivism while still lively are no longer only philosophies but guidelines for research Finally the book demonstrates that the search for and validation of new axioms is analyzed with a blend of mathematical historical philosophical psychological considerations Freedom's Progress? Gerard Casey,2021-10-04 In Freedom s Progress Gerard Casey argues that the progress of freedom has largely consisted in an intermittent and imperfect transition from tribalism to individualism from the primacy of the collective to the fragile centrality of the individual person and of freedom Such a transition is he argues neither automatic nor complete nor are relapses to tribalism impossible The reason for the fragility of freedom is simple the importance of individual freedom is simply not obvious to everyone Most people want security in this world not liberty Libertarians writes Max Eastman used to tell us that the love of freedom is the strongest of political motives but recent events have taught us the extravagance of this opinion The herd instinct and the yearning for paternal authority are often as strong Indeed the tendency of men to gang up under a leader and submit to his will is of all political traits the best attested by history The charm of the collective exercises a perennial magnetic attraction for the human spirit In the 20th century Fascism Bolshevism and National Socialism were Casey argues each of them a return to tribalism in one form or another and many aspects of our current Western welfare states continue to embody tribalist impulses Thinkers you would expect to feature in a history of political thought feature in this book Plato Aristotle Machiavelli Locke Mill and Marx but you will also find thinkers treated in Freedom s Progress who don t usually show up in standard accounts Johannes Althusius Immanuel Kant William Godwin Max Stirner Joseph Proudhon Mikhail Bakunin Pyotr Kropotkin Josiah Warren Benjamin Tucker and Auberon Herbert Freedom s Progress also contains discussions of the broader social and cultural contexts in which politics takes its place with chapters on slavery Christianity the universities cities Feudalism law kingship the Reformation the English Revolution and what Casey calls Twentieth Century Tribalisms Bolshevism Fascism and National Socialism and an extensive chapter on human prehistory **List of Books Forming the**
