Sphere in Britain, 1700-1850 David Lemmings,2016-05-13 Modern criminal courts are characteristically the domain of lawyers with trials conducted in an environment of formality and solemnity where facts are found and legal rules are impartially applied to administer justice Recent historical scholarship has shown that in England lawyers only began to appear in ordinary criminal trials during the eighteenth century however and earlier trials often took place in an atmosphere of noise and disorder where the behaviour of the crowd significant body language meaningful looks and audible comment could influence decisively the decisions of jurors and judges This collection of essays considers this transition from early scenes of popular participation to the much more orderly and professional legal proceedings typical of the nineteenth century

and links this with another important shift the mushroom growth of popular news and comment about trials and punishments which occurred from the later seventeenth century It hypothesizes that the popular participation which had been a feature of courtroom proceedings before the mid eighteenth century was not stifled by lawyerization but rather partly relocated to the public sphere of the press partly because of some changes connected with the work of the lawyers Ranging from the early 1700s to the mid nineteenth century and taking account of criminal justice proceedings in Scotland as well as England the essays consider whether pamphlets newspapers ballads and crime fiction provided material for critical perceptions of criminal justice proceedings or alternatively helped to convey the official majesty intended to legitimize the law In so doing the volume opens up fascinating vistas upon the cultural history of Britain s legal system over the long eighteenth century

Neo-Liberalism and Austerity Peter Kelly,Jo Pike,2016-12-26 This collection examines the relationships between a globalising neoliberal capitalism a post GFC environment of recession and austerity and the moral economies of young people s health and well being Contributors explore how in the second decade of the 21st century many young people in the OECD EU economies and in the developing economies of Asia Africa and Central and South America continue to be carrying a particularly heavy burden for many of the downstream effects of the 2008 09 Global Financial Crisis The authors explore the ways in which increasing local and global inequalities often have profound consequences for large populations of young people These consequences are not just related to marginalisation from education training and work They also include obstacles to their active participation in the civic life of their communities to their transitions to their sense of belonging The book examines the choices that are made or not made by governments businesses and individuals in relation to young people s education training work health and well being sexualities diets and bodies in the context of a crisis of neoliberalism and of austerity
