The Hawaiian Goose An Experiment In Conservation:

The Hawaiian Goose Janet Kear, A.J. Berger, 2010-09-30 Dr Janet Kear Assistant Director of the Wildfowl Trust and Curator of its Martin Mere Reserve and Professor Andrew Berger of the University of Hawaii have written a timely and absorbing account of the recent history of the Hawaiian Goose or Nene its descent to near extinction its eleventh hour rescue and current restoration to the wild The species declined from an estimated population of 25 000 in Hawaii in the 18th century to less than fifty birds in the 1940s Today thanks largely to the extended breeding programmes at Slimbridge and Pohakuloa there are probably more than 2000 Hawaiian Geese in the world The achievement is justly applauded and well known but whether this impressive experiment in conservation has been truly successful will not be clear until it becomes evident that the released birds can maintain a breeding population in the wild As the authors explain the outcome is far from predictable The causes which led to the species decline and the hazards and difficulties faced by the reintroduced population are discussed at length but the core of the book is the propagation programmes at Slimbridge and Pohakuloa and the problems and successes they brought during many years of patient work For the conservationist and aviculturalist the accounts of captive breeding under headings such as infertility diet longevity mortality and the effects of foster mothers geographical latitude and genetic strain will be essential reading Appropriately Sir Peter Scott whose interest and involvement in the rescue of the Hawaiian Goose was of prime importance is one of the artists whose drawings supplement the text There is also a colour frontispiece and 24 monochrome plates EndFragment

Conservation Biology of Hawaiian Forest Birds Thane K. Pratt, Carter T. Atkinson, Paul C. Banko, Bethany L. Woodworth, James D. Jacobi, 2009-01-01 Hawaii's forest bird community is the most insular and most endangered in the world and serves as a case study for threatened species globally Ten have disappeared in the past thirty years nine are critically endangered and even common species are currently in decline Thane K Pratt his coeditors and collaborators all leaders in their field describe the research and conservation efforts over the past thirty years to save Hawaii's forest birds They also offer the most comprehensive look at the reasons for these extinctions and attempts to overcome them in the future Among the topics covered in this book are trends in bird populations environmental and genetic factors limiting population size avian diseases predators and competing alien bird species Color plates by award winning local photographer Jack Jeffrey illustrate all living species discussed or described

Creative Conservation P.J. Olney, G.

Mace,A. Feistner,2012-12-06 Past progress and future challenges R J Wheater Royal Zoological Society of Scotland Edinburgh UK In the past two decades much has been achieved in the sphere of breeding endangered species and we should be pleased that our co operative efforts have already borne so much fruit However on balance and despite the best efforts of conservationists the position of wildlife in the wild places where they are best conserved has become worse often dramatically worse Before returning to the United Kingdom in 1972 I was in Uganda for 16 years most of which time was spent as Chief Warden of Murchison Falls National Park Our main problem was that an over population of large mammals was having a devastating impact on the habitat Devas tation was being wrought on woodland areas by the arrival of large numbers of elephants into the sanctuary of the Park following changes in land use in the areas outside the Park These changes were in response to the requirements of an ever expanding human population **Bird Conservation 2** Stanley A. Temple,1985-05-31 Concerned conservationists and professional and amateur ornithologists alike welcomed the inauguration in 1983 of Bird Conservation Sponsored by the U S Section of the International Council for Bird Preservation the ambitious project was designed to provide a yearly overview of current research and key ecological topics in the field of bird conservation This the second yearbook of the series includes essays by leading ecologists and ornithologists and focuses on a range of issues critical to island birds among them the status of endangered birds of Micronesia the distribution and abundance of Hawaiian native birds the vulnerability of endemic island birds to extinction and bird conservation efforts in the United States Caribbean Also included are concise reports on recent bird conservation activities and research and an annotated bibliography of relevant literature **Ency Worlds Zoos Vol 2 Only** Catharine E. Bell,2024-11-01 This book includes a reference of the zoos in the world plus explanations and photographs of animals and which zoo they can be found in It is volume 2 and includes listings from G to P **Endangered Animals** Brian Miller,Richard P. Reading,2000-09-30 Explore the multiple issues that surround species declines and conservation efforts through the only reference source to examine the conflicting conservation issues of 49 endangered species While the causes of endangerment are relatively easy to understand the ultimate or underlying factors are often far more complex and difficult to address An introduction to these issues and how to resolve them is provided in this unique collection of case studies of animal species that have been pushed to the brink of extinction Each case study provides the following information Common name Scientific name Order Family Status Threats Habitat Distribution Natural history Conflicting Issues Future and Prognosis Conservationists are increasingly recognizing that the ultimate causes of extinction are primarily socio economic and political yet biological approaches to recovery continue to dominate More inclusive interdisciplinary conservation programs are explored here to offer better prospects for managing problems and conflicts In addition to the case studies trends and common themes are explored to provide a comprehensive interdisciplinary approach to conservation Students and teachers can explore a wide variety of endangered species programs and the conflicting issues common to recovery efforts which will enable them to evaluate

conservation practice and to draw their own conclusions for improvement

Reintroduction Biology John G. Ewen, Doug P. Armstrong, Kevin A. Parker, Philip J. Seddon, 2012-01-30 This book aims to further advance the field of reintroduction biology beyond the considerable progress made since the formation of the IUCN SSC Re introduction Specialist Group Using an issue based framework that purposely avoids a structure based on case studies the book s central theme is advocating a strategic approach to reintroduction where all actions are guided by explicit theoretical frameworks based on clearly defined objectives Issues covered include husbandry and intensive management monitoring and genetic and health management Although taxonomically neutral there is a recognised dominance of bird and mammal studies that reflects the published research in this field The structure and content are designed for use by people wanting to bridge the research management gap such as conservation managers wanting to expand their thinking about reintroduction related decisions or researchers who seek to make useful applied contributions to reintroduction

Current Ornithology Richard Johnston, 2012-12-06 If it is still true that more than 80% of the ornithologists in North America are primarily interested or engaged in ecological studies on birds J R King and W J Bock Final Report of the Workshop on a National Plan For Ornithology 1978 then Volume 3 of Current Orni thology is preadapted for their consideration All but one article in this volume are somehow concerned with the ecological aspects of the bi ology of birds Variation in the scope of topical coverage is relatively broad and includes conservation reproduction behavior community structure and evolutionary ecology Three reviews concern the pervasive effects of man and industry on various bird populations of the world Risebrough provides a de tailed description of the relationships between pesticides and bird pop ulations Morrison ass es ses aspects of bird population numbers as in dicators of environmental change and Temple outlines current research on endangered species The broad spectrum of reproductive ecology of birds is variously treated in this volume Jehl and Murray explore sexual selection and some of the resulting complexities in the evolution of sexual size di morphism primarily in shorebirds Lawton and Lawton are concerned with the relationships between social behavior and breeding systems in which variation is found in the age at which reproduction is first undertaken Oring examines the wide ranging variation in polyandrous breeding systems in birds while Rohwer is concerned with adoption versus infanticide in birds and their relationships to reproductive fit ness

The Woodhen Clifford Frith, 2013-06-12 This book tells the fascinating success story of saving the flightless Woodhen of Lord Howe Island This unique large rail an iconic and highly endangered Australian bird was at the very brink of extinction with just 15 individuals found in 1980 when bold and risky actions were taken to save it The book begins with the discovery and ecology of Lord Howe Island It then details the history of the Woodhen its place among the rails and their evolution of flightlessness the planning implementation and trials tribulations and successes of the captive breeding programme and the way in which the wild population recovered The ecology behaviour and breeding biology of this unique flightless island rail are also discussed The text is accompanied by numerous photographs and drawings This is a story of survival yet the bird remains highly

endangered as it is under constant potential threat which could tip it over the brink and to extinction The Woodhen provides gripping insights into the potential for both losing and saving vertebrate species Winner of a 2014 Whitley Awards Certificate of Commendation for Historical Zoology

A Field Guide to the Birds of Hawaii and the Tropical Pacific H. Douglas Pratt, Phillip L. Bruner, Delwyn G. Berrett, 2023-06-06 This is the first field guide to the identification of the birds of the islands of the tropical Pacific including the Hawaiian Islands Fiji Samoa Tonga southeastern Polynesia and Micronesia It is intended both as a reference for the expert and as an introduction to birding in the region for the novice Small enough to be carried afield it contains much previously unpublished information about behavior vocalizations ecology and distribution The forty five color plates depict all plumages of all bird species that breed in the islands as well as of those that regularly visit them and the surrounding oceans and of most species believed to be extinct on the islands Black and white figures show many of the rarer visitors Introductory sections discuss the tropical Pacific as an environment for birds problems of birding on islands and bird conservation Appendixes include maps of the island groups and a thorough bibliography H.R. 1268--the National Biological Diversity Conservation and Environmental Research Act United States. Conserving Bird Biodiversity Ken Norris, Deborah J. Pain, 2002-06-06 The earth's biodiversity currently faces an extinction crisis that is unprecedented Conservationists attempt to intervene in the extinction process either locally by protecting or restoring important species and habitats or at national and international levels by influencing key policies and promoting debate Reliable information is the foundation upon which these efforts are based which places research at the heart of biodiversity conservation The role of research in such conservation is diverse It includes understanding why biodiversity is important defining units of biodiversity priority setting for species and sites managing endangered and declining populations understanding large scale processes making predictions about the future and interfacing with training education public awareness and policy initiatives Using examples from a wide range of bird conservation work worldwide researchers consider the principles underlying these issues and illustrate how these principles have been applied to address actual conservation problems for students practitioners and researchers in conservation biology

Wildlife 2001: Populations D.R. McCullough, R.H. Barrett, 2012-12-06 In 1984 a conference called Wildlife 2000 Modeling habitat relationships of terrestrial vertebrates was held at Stanford Sierra Camp at Fallen Leaf Lake in the Sierra Nevada Mountains of California The conference was well received and the published volume Verner J M L Morrison and C J Ralph editors 1986 Wildlife 2000 modeling habitat relationships of terrestrial vertebrates University of Wisconsin Press Madison Wisconsin USA proved to be a landmark publication that received a book award by The Wildlife Society Wildlife 2001 populations was a followup conference with emphasis on the other major biological field of wildlife conservation and management populations It was held on July 29 31 1991 at the Oakland Airport Hilton Hotel in Oakland California in

accordance with our intent that this conference have a much stronger international representation than did Wildlife 2000. The goal of the conference was to bring together an international group of specialists to address the state of the art in wildlife population dynamics and set the agenda for future research and management on the threshold of the 21st century. The mix of specialists included workers in theoretical as well as practical aspects of wildlife conservation and management. Three general sessions covered methods, modelling and conservation of threatened species. **Saddle Road (State Route 200) Mamalahoa Highway (State Route 190) to Milepost 6, County of Hawai'i**, 1999 **Animal Reintroductions**

Mark R. Stanley Price, 1989-09-14. This book explores the reintroduction of the oryx back into the wild from zoo populations.

At Home and at Large in the Great Plains: Essays and Memories Paul Johnsgard, 2015. These fourteen essays originally appeared in *Prairie Fire*, a monthly newspaper that for seven years has carried important messages of social, environmental and economic issues to residents of Nebraska, Iowa, Colorado and South Dakota and subscribers in the rest of the world. They discuss the North American east-west ecological boundaries, spring migration events, bird feeders, feathered survivors of a glacial past, the threatened sharp-tailed grouse, the effects of climate change, some sacred places: Aransas National Wildlife Refuge, the Ashfall Fossil Beds, Squaw Creek Refuge, the Hutton Niobrara Ranch Sanctuary and Yellowstone National Park, our troubles with mountain lions and grizzly bears and crane season in Wyoming. There is also an expanded informal autobiography, *My Life in Biology*, and a current and comprehensive list of all publications of a writer described as probably the world's most prolific living author of ornithological and natural history literature. **The Ecology and Management of Breeding Waterfowl**, 1992 **Bird Conservation** British Ornithologists' Union. The Hawaiian Goose An Experiment In Conservation: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. The Hawaiian Goose An Experiment In Conservation : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
