Buss, 2006-04-25 As acclaimed psychological researcher and author David Buss writes People are mesmerized by murder It commands our attention like no other human phenomenon and those touched by its ugly tendrils never forget Though we may like to believe that murderers are pathological misfits and hardened criminals the vast majority of murders are committed by people who until the day they kill would seem to be perfectly normal David Buss's pioneering work has made major national news in the past and this provocative book is sure to generate a storm of attention *The Murderer Next Door* is a riveting look into the dark underworld of the human psyche an astonishing exploration of when and why we kill and what might push any one of us over the edge A leader in the innovative field of evolutionary psychology Buss conducted an unprecedented set of studies investigating the underlying motives and circumstances of murders from the bizarre outlier cases of serial killers to those of the friendly next door neighbor who one day kills his wife Reporting on findings that are

often startling and counterintuitive the younger woman involved in a love triangle is at a high risk of being killed he puts forth a bold new general theory of homicide arguing that the human psyche has evolved specialized adaptations whose function is to kill Taking readers through the surprising twists and turns of the evolutionary logic of murder he explains exactly when each of us is most at risk both of being murdered and of becoming a murderer His findings about the high risk situations alone will be news making Featuring gripping storytelling about specific murder cases including a never used FBI file of more than 400 000 murders and a highly detailed study of 400 murders conducted by Buss in collaboration with a forensic psychiatrist and a pioneering investigation of homicidal fantasies in which Buss found that 91 percent of men and 84 percent of women have had at least one such vivid fantasy *The Murderer Next Door* will be necessary reading for those who have been fascinated by books on profiling lovers of true crime and murder mysteries as well as readers intrigued by the inner workings of the human mind *The Fate of Borderline Patients* Michael H. Motherhood in the Media Barbara Barnett, 2016-02-19 This book examines contemporary media stories about women who kill their children By analyzing media texts motherhood blogs and journalistic interviews the book seeks to understand better maternal violence and the factors that lead women to harm their children The central thesis of this book is that media practices have changed dramatically during the past 50 years as has society's views on appropriate feminine behavior yet definitions of characteristics of good mothers remain largely defined by 1950s sitcoms Victorian ideals and Christian theology The book contends that in spite of media saturation in American society and the media's increased opportunities to tell complex and nuanced stories news media narratives continue to situate maternal violence as rare unfathomable and unpredictable The news media's shift in focus from public service to profit making industry has encouraged superficial coverage of maternal violence as reporters look for stories that sell not stories that explain Motherhood blogs in contrast offer an opportunity for women to tell their own stories about motherhood based on experience Interviews with journalists offer insights into how the structure of their jobs dictates media coverage of this
