Implementing Global Networked Systems Management Raj Ananthanpillai,1997 The work that is described in this book was driven by necessity to meet a real need for managing globally distributed complex networks And it s that pragmatic approach to achieving results managing real world complex networks from end to end that is sometimes missing from the current formal standards bodies vendors providing disparate projects services It is extremely important for the end users to move away from vertical thinking focus expand on systems thinking a move that will address not only vertical network management needs but also horizontal business management needs **ABCs of z/OS System Programming: Volume 4** Paul Rogers,IBM Redbooks,2011-02-10 This IBM Redbooks publication describes the functions of z OS Communications Server z OS Communications Server provides a set of communications protocols that support peer to peer connectivity functions for both local and wide area networks including the most popular wide area network the Internet z OS

Communications Server also provides performance enhancements that can benefit a variety of TCP/IP applications. z/OS Communications Server provides both SNA and TCP/IP networking protocols for z/OS. The SNA protocols are provided by VTAM and include Subarea Advanced Peer-to-Peer Networking and High Performance Routing protocols. z/OS Communications Server exploits z/OS UNIX services even for traditional MVS/TSO environments and applications. Prior to utilizing TCP/IP services, therefore, a full-function mode z/OS UNIX environment including a Data Facility Storage Management Subsystem (DFSMS) and a security product such as Resource Access Control Facility (RACF) must be defined and active before z/OS Communications Server can be started successfully.

The ABCs of z/OS System Programming is a 13-volume collection that provides an introduction to the z/OS operating system and the hardware architecture. Whether you are a beginner or an experienced system programmer, the ABCs collection provides the information that you need to start your research into z/OS and related subjects. If you want to become more familiar with z/OS in your current environment or if you are evaluating platforms to consolidate your e-business applications, the ABCs collection will serve as a powerful technical tool. The contents of the volumes are as follows:

- Volume 1: Introduction to z/OS and storage concepts, TSO/E, ISPF, JCL, SDSF, and z/OS delivery and installation.
- Volume 2: z/OS implementation and daily maintenance, defining subsystems, JES2 and JES3, LPA, LNK, LST, authorized libraries, SMP/E, Language Environment.
