Snow War John G. Woods,Friends of Mount Revelstoke and Glacier National Parks,Parks Canada,2008 Encounters in Avalanche Country Diana L. Di Stefano,2013-11-01 Every winter settlers of the U S and Canadian Mountain West could expect to lose dozens of lives to deadly avalanches This constant threat to trappers miners railway workers and their families forced individuals and communities to develop knowledge share strategies and band together as they tried to survive the extreme conditions of avalanche country The result of this convergence author Diana Di Stefano argues was a complex network of formal and informal cooperation that used disaster preparedness to engage legal action and instill a sense of regional identity among the many lives affected by these natural disasters Encounters in Avalanche Country tells the story of mountain communities responses to disaster over a century of social change and rapid industrialization As mining and railway companies triggered new kinds of disasters ideas about environmental risk and responsibility were increasingly negotiated by mountain laborers at the elite levels among corporations and in socially charged civil suits Disasters became a dangerous crossroads where social spaces and ecological realities collided illustrating how individuals groups communities and corporate entities were all tangled in this web of connections between people and their environment Written in a lively and engaging narrative style Encounters in Avalanche Country uncovers authentic stories of survival struggles frightening avalanches and how local knowledge challenged legal traditions that defined avalanches as acts of god Combining disaster mining railroad and ski histories with the theme of severe winter weather it provides a new and fascinating perspective on the settlement of the Mountain West **British Columbia by the Road** Ben Bradley,2017-06-07 In British Columbia by the Road Ben Bradley takes readers on an unprecedented journey through the history of roads highways and motoring in British Columbia s Interior a remote landscape composed of plateaus and interlocking valleys soaring mountains and treacherous passes Challenging the idea that the automobile offered travellers the freedom of the road and a view of unadulterated nature Bradley shows that an array of interested parties boosters businessmen conservationists and public servants manipulated what drivers and passengers could and should view from the road When it came to roads and highways planners and builders had two concerns grading or paving a way through the wilderness and opening pathways to new parks and historic sites They understood that the development of a modern road network would lead to new ways of perceiving BC and its environment Although cars and roads promised freedom they offered drivers a curated view of the landscape that shaped the province s image in the eyes of residents and visitors alike A Thousand Blunders Frank Leonard,2011-11-01 During the first two decades of this century the Grand Trunk Pacific Railway played an important part in the development of the north central corridor of British Columbia The GTP which ran from Winnipeg via the Yellowhead Pass and Edmonton to Prince Rupert on the northwest coast was built to supplant the Canadian Pacific line to Vancouver The B C line was the most

expensive and least remunerative of its sections and contributed ultimately to the company's collapse in 1919. In *A Thousand Blunders*, Frank Leonard looks at why the Road of a Thousand Wonders failed to live up to the expectations forecast by company president Charles M. Hays and other senior managers. Not only was the railway built through a sparsely settled region which generated little immediate traffic but its economic difficulties were also compounded by the numerous mistakes made by managers at all levels, for example their failure to respond adequately to labour shortages caused serious delays and prevented the company from proving Prince Rupert as an effective alternative harbour before World War I broke out. For this book, Frank Leonard had access to a wealth of original documents among them the GTP legal department files providing him with insights into the decisions that formed the basis for policies in townsites and on Indian reserves. *A Thousand Blunders* is a provocative account of one of the greatest failures in Canadian entrepreneurial history. Richly detailed and thoroughly documented, it makes an important contribution to the fields of railway and business history as well as to the study of the history of northern British Columbia. *The Canadian Alpine Journal*, 1980

Canada's Rocky Mountains Faye Reineberg Holt, 2010. The grandeur of the Canadian Rockies has captivated hearts and minds, challenged the daring and athletic, and fired the imaginations of writers, photographers, and other artists. In this book, images ranging from simple to iconic to surprising capture that rich heritage. Discover the people, legends, and little-known facts of this area's past. Meet the men and women who conquered peaks and built lives in mountain communities. Through narrative and image, revel in the parks and hinterlands that have endlessly fascinated tourists. Faye invites locals and tourists alike to marvel at the photos, consider the science of the mountain landscape, and catch glimpses of yesterday in the sports culture and real-life adventure of Canada's Rocky Mountains.

Natural Hazards Edward Keller, Duane DeVecchio, John Clague, 2016-10-04. *Natural Hazards* focuses on hazards as the interface between humanity and its needs for space and resources, as well as on the ongoing geologic processes of Earth and features many new Canadian examples and discussions while retaining the best U.S. and international illustrations. The third Canadian edition strikes an ideal balance between the scientific and the human aspects of natural hazards, combining basic scientific principles within a solid social framework.

Disaster Risk and Vulnerability C. Emdad Haque, David Etkin, 2012-04-11. From the Asian tsunami of 2004 to hurricane Katrina in 2005 and the Tohoku earthquake of 2011, our century has been fraught with catastrophic natural disasters. *Disaster Risk and Vulnerability* assesses the human toll and economic losses of natural disasters and reasserts the importance of human collaboration and organization in disaster management. In most cases, policy makers, planners, managers, and regulators who implement disaster risk reduction, response planning, and management strategies remain detached from local conditions, failing to address them effectively. Presenting case studies from Asia and North America, as well as a broad range of approaches to community mobilization and partnership development, contributors show that local communities, all levels of government, and non-governmental organizations must work collectively in order to reduce the harm caused by disasters. Despite unprecedented

progress in science and technology and governments continued efforts in disaster risk reduction socioeconomic losses due to environmental disasters continue to rise Disaster Risk and Vulnerability provides knowledge and information that will benefit anyone working in the fields of environment disasters and community mobilization in an effort to reverse this trend The Canadian Historical Review ,1984 Includes section Recent publications relating to Canada *Park Prisoners* W.
