Because 3rd Grade Florida Comprehensive Assessment Test FCAT scores have a direct impact on promotion the results for
that grade level are released early by the State When the FCAT results for 3rd Grade were released in May 2007 many
people were troubled Over 80% of the elementary schools in the Miami Dade School District showed a decrease in the
percentage of students scoring in Levels 3 and above in Reading Similar trends produced an outcry across the state After an
8 percentage point jump in the previous year there was a statewide drop of 6 percentage points in 2007 These results were
more than surprising and cast doubt on the soundness of the scoring process After a careful review the Education
Commissioner announced that there did appear to be a problem in the scoring of the test and a rescaling of the 3rd Grade
FCAT reading exam would be forthcoming This admission by the State while honorable and praiseworthy opened the door for
many to question other aspects of the FCAT test sometimes without just cause While it is clearly unfair to discount the overall
precision and usefulness of the FCAT some form of careful review of scores is nonetheless proper The search for the same
kind of irregular trends in the data that brought this type of problem to the surface is always warranted and should be
welcomed Any abnormalities revealed in the examination of the scores need to be made public so that the need for in depth
analysis can be considered It is in that spirit that this paper presents some unusual patterns in the data for FCAT Reading at
