Family Violence and Social Change in the Pacific Islands Lois Bastide, Denis Regnier, 2022-09-23 The Pacific Islands have some of the highest rates of family violence in the world Addressing the contemporary mutations of Pacific Island families and the shifting understandings of violence in the context of rapid social change this book investigates the conflict dynamics generated by these transformations The contributors draw from detailed case studies in a range of Pacific territories to examine family violence in relation to the social economic and political situation of native populations as well as individual collective and institutional responses to the development of violence within and upon the family They focus on vernacular understandings conflicting social norms the emergence of different types of violent patterns the impact of violence on individuals and communities and local attempts at mitigating or combating it Combining ethnographic expertise with engaged scholarship this volume offers a vivid account of ongoing social change in Pacific Island societies and a crucial contribution to the understanding of family violence as a social process cultural construct and political issue This book will appeal to scholars with interests in the sociology of violence and the family Pacific studies development studies and the social and cultural anthropology of Oceania

Environmental Change and the World's Futures

Jonathan Paul Marshall, Linda H. Connor, 2015-08-27 Climate change and ecological instability have the potential to disrupt human societies and their futures Cultural social and ethical life in all societies is directed towards a future that can never be observed and never be directly acted upon and yet is always interacting with us Thinking and acting towards the future involves efforts of imagination that are linked to our sense of being in the world and the ecological pressures we experience The three key ideas of this book ecologies ontologies and mythologies help us understand the ways people in many different societies attempt to predict and shape their futures Each chapter places a different emphasis on the linked domains of environmental change embodied experience myth and fantasy politics technology and intellectual reflection in relation to imagined futures The diverse geographic scope of the chapters includes rural Nepal the islands of the Pacific Ocean Sweden coastal Scotland North America and remote rural and urban Australia This book will appeal to researchers and students in anthropology

sociology environmental studies cultural studies psychology and politics *Resilience in the Pacific and the Caribbean* Simon Hollis,2020-10-26 This book critically examines the global diffusion and local reception of resilience through the implementation of Disaster Risk Reduction DRR programmes in Pacific and Caribbean island states Global efforts to strengthen local disaster resilience capacities have become a staple of international development activity in recent decades yet the successful implementation of DRR projects designed to strengthen local resilience remains elusive While there are pockets of success a gap remains between global expectations and local realities Through a critical realist study of global and local worldviews of resilience in the Pacific and Caribbean islands this book argues that the global advocacy of DRR remains inadequate because of a failure to prioritise a person orientated ethics in its conceptualization of disaster resilience This regional comparison provides a valuable lens to understand the underlying social structures that makes resilience possible and the extent to which local governments communities and persons interpret and modify their behaviour on risk when faced with the global message on resilience This book will be of much interest to students of resilience risk management development studies and area studies [The Global Health Care Chain](#) John Connell,2008-12-12 This book provides the first detailed analysis of the growing phenomenon of the international migration of skilled health workers and reveals its exceptional significance for both sending and receiving countries **Internalized Oppression** Eric John Ramos David,2013-12-09 Print CourseSmart *Migration and Development in the South Pacific* John Connell,1990 [Comparing Cultures](#) Michael Schnegg,Edward D. in the field It offers an assessment of environmental movements in different regions of the world macrostructural conditions and processes underlying their mobilization the microstructural and social psychological dimensions of environmental movements and activism and current trends as well as prospects for environmental movements and social change The handbook provides critical reviews and appraisals of the current state of the art and future development of conceptual and theoretical approaches as well as empirical knowledge and understanding of environmental movements and activism It encourages dialogue across the disciplinary barriers between social movement studies and other perspectives and reflects upon the causes and consequences of citizens participation in environmental movements and activities The volume brings historical studies of environmentalism sociological analyses of the social composition of participants in and sympathizers of environmental movements investigations by political scientists on the conditions and processes underlying environmental movements and activism and other disciplinary inquiries together while keeping a clear focus within social movement theory and research as the main lines of inquiry The handbook is an essential guide and reference point not only for researchers but also for undergraduate and graduate teaching and for policymakers and activists Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons CC BY NC ND 4.0 license

Handbook on Teaching Social Issues Ronald W. Evans, 2021-05-01 The Handbook on Teaching Social Issues 2nd edition provides teachers and teacher educators with a comprehensive guide to teaching social issues in the classroom This second edition re frames the teaching of social issues with a dedicated emphasis on issues of social justice It raises the potential for a new and stronger focus on social issues instruction in schools Contributors include many of the leading experts in the field of social studies education Issues centered social studies is an approach to teaching history government geography economics and other subject related courses through a focus on persistent social issues The emphasis is on problematic questions that need to be addressed and investigated in depth to increase social understanding active participation and social progress Questions or issues may address problems of the past present or future and involve disagreement over facts definitions values and beliefs arising in the study of any of the social studies disciplines or other aspects of human affairs The authors and editor believe that this approach should be at the heart of social studies instruction in schools

ENDORSEMENTS At a time when even the world's most stable democracies are backsliding towards autocratic rule Ronald Evans has pulled together an essential guide for teachers who want to do something about it The 2nd edition of the Handbook on Teaching Social Issues is a brilliant and timely collection that should be the constant companion for teachers across the disciplines Joel Westheimer University Research Chair in Democracy and Education University of Ottawa The Handbook on Teaching Social Issues 2nd edition is a fantastic resource for teachers teacher educators and professional development specialists who are interested in ensuring that social issues are at the center of the curriculum The chapters are focused on the most important contemporary thinking about what social issues are why they are so important for young

people to learn about and what research indicates are the most effective pedagogical approaches. The wide ranging theoretical and practical expertise of the editor and all of the chapter authors account for why this handbook makes such an exceptional contribution to our understanding of how and why the social issues approach is so important and stimulating.

Diana Hess, Dean, UW Madison School of Education; Karen A. Falk, Distinguished Chair of Education Democracy, both as a form of governance and a reservoir of principles and practices, faces an existential threat. The Handbook on Teaching Social Issues is a perfectly timed and wonderfully engaging exploration of what lies at the heart of social studies curriculum, social inquiry for democratic life. The authors provide conceptual frames, classroom strategies, and deep insights about the complex and utterly crucial work of education for democratic citizenship. Education like that conceptualized and described in this volume is a curative so needed at this critical moment.

Ron Evans and his colleagues have delivered an outstanding set of contributions to the field. The Handbook underscores John Dewey's now haunting invocation that democracy must be renewed with each generation and an education worthy of its name is the handmaiden of democratic rebirth.

William Gaudelli, Dean and Professor, Lehigh University. This volume is so timely and relevant for democratic education. Instead of retreating to separate ideological corners, the authors in this handbook invite us to engage in deliberative discourse that requires civic reasoning and often requires us to meet in a place that serves us all.

Gloria Ladson-Billings, Professor Emerita, Department of Curriculum. I am excited to use the 2nd edition with my teacher education students.

LaGarrett King, Isabella Wade Lyda, and Paul Lyda, Professor of Education, Founding Director, CARTER Center for K-12 Black history education, University of Missouri. Ronald Evans has curated a collection of informative contributions that will serve as an indispensable resource for social studies educators committed to engaging their students in the thoughtful examination of social issues.

The Handbook on Teaching Social Issues, 2nd edition, articulates the historical, definitional, and conceptual foundations of social issues education. It offers clear presentations of general guidelines for unit planning, discussion methods, and assessment. It identifies specific teaching strategies, resources, and sample lessons for investigating a range of persistent and contemporary social issues on the elementary, middle, and secondary levels through the social studies disciplines. Updated with perspectives on education for social justice that have emerged since the first edition, this edition effectively situates social issues education in the contemporary sociopolitical milieu.

The Handbook on Teaching Social Issues is a timely, accessible, and practical guide to involving students in a vital facet of citizenship in a democracy.

William G. Wraga, Professor, Dean's Office; Mary Frances Early, College of Education, University of Georgia. The Handbook on Teaching Social Issues, 2nd edition, is a long-awaited, welcome, and timely volume. It is apparent that the foundational tenets of the first edition have served social studies professionals well over the past 25 years, given the growth of social issues scholarship showcased in this new edition. Notable is the re-framing and presentation here of scholarship through a social justice lens. I appreciate the offering of unique tools on an array of specific critical topics that fill gaps in our pedagogical content knowledge. This volume will sit right alongside my dog-eared

Genz, 2018-02-28 On the atoll of Rongelap in the northern seas of the Marshall Islands apprentice navigators once learned to find their way across the ocean by remotely sensing how islands transform the patterning of swell and currents Renowned for their instructional stick charts that model and map the interplay of islands and waves these students of wave piloting techniques embarked on trial voyages to ruprup jo kur a Marshallese expression roughly translated as breaking the shell of the turtle which would confer their status as navigators These traditional practices already in decline with imposing colonial occupations came to an

abrupt halt with the Cold War era nuclear weapons testing program conducted by the United States. The residents and their descendants are still trying to recover from the myriad environmental, biological, social, and psychological impacts of the nuclear tests. *Breaking the Shell* presents the journey of Captain Korent Joel, who having been forced into exile from the near-apocalyptic thermonuclear Bravo test of 1954, has reconnected to his ancestral maritime heritage and forged an unprecedented path toward becoming a navigator. Paralleling the Hawaiian renaissance that centered on Nainoa Thompson learning from Satawalese navigator Mau Piailug, the beginnings of the Marshallese voyaging revitalization, a collaborative community-based project spanning the fields of anthropology, history, and oceanography, involved blending scientific knowledge systems, resolving ambivalence in nearly forgotten navigational techniques, and deftly negotiating cultural protocols of knowledge use and transmission. Through Captain Korent's own voyaging trial, he and a group of surviving mariners from Rongelap are, against one of the darkest hours in human history, breaking the shell of their prime identity as nuclear refugees to begin recovering their most intimate connections to the sea. Ultimately, these efforts would inaugurate the return of the traditional outrigger voyaging canoe for the greater Marshallese nation, an achievement that may work toward easing ethnic tensions abroad and ensuring cultural survival in their battle against the looming climate change-induced rising ocean. Drawing attention to cultural rediscovery, revitalization, and resilience in Oceania, the Marshallese are once again celebrating their existence as a people born to the rhythms of the sea.

Combatting Climate Change in the Pacific

Marc Williams, Duncan McDuie-Ra, 2017-12-12. This book analyses the regional complexes of climate security in the Pacific. Pacific Island States and Territories (PICTs) have long been cast as the frontline of climate change and placed within the grand architecture of global climate governance. The region provides compelling new insights into the ways climate change is constructed, governed, and shaped by, and in turn shapes, regional and global climate politics. By focusing on climate security as it is constructed in the Pacific and how this concept mobilises resources and shapes the implementation of climate finance, the book provides an up-to-date account of the way regional organizations in the Pacific have contributed to the search for solutions to the problem of climate insecurity. In the context of the United Nations Climate Change Conference COP21 in Paris in 2015, the focus of this book on regional governance offers a concise and innovative account of climate politics in the prevailing global context and one with implications for the study of climate security in other regions, particularly in the developing world.

Participatory Media in Environmental Communication Usha Sundar Harris, 2018-09-13. *Participatory Media in Environmental Communication* brings together stories of communities in the Pacific islands, a region that is severely affected by the impacts of climate change. Despite living on the margins of the digital revolution, these island communities have used media and communication to create awareness of and find solutions to environmental challenges. By telling their stories in their own way, ordinary people are able to communicate compelling accounts of how different but interrelated environmental, political, and economic issues converge and impact at a local level. This book fills a significant gap in our

understanding of how participatory media is used as a dialogic tool to raise awareness and facilitate discussion of environmental issues that are now critical It includes a section on pedagogy and practice the undergirding principles the tools the methods The book offers a framework for Participatory Environmental Communication that weaves three widely used concepts diversity network and agency into a cohesive underlying system to bring scholars practitioners and diverse communities together in a dialogue about pressing environmental issues This book is a valuable resource for researchers and students in communication and media studies environmental communication cultural studies and environmental sciences as well as practitioners policy makers and environmental activists

Old Ways for New Days Melissa Nursey-Bray, Robert Palmer, Ann Marie Chischilly, Phil Rist, Lun Yin, 2022-09-01 This Open Access book provides a critical reflection into how indigenous cultures are attempting to adapt to climate change Through detailed first hand accounts the book describes the unique challenges facing indigenous peoples in the context of climate change adaptation governance communication strategies and institutional pressures The book shows how current climate change terminologies and communication strategies often perpetuate the marginalisation of indigenous peoples and suggests that new approaches that prioritise Indigenous voices agency and survival are required The book first introduces readers to Indigenous peoples and their struggles related to climate change describing the impacts of climate change on their everyday lives and the adaptation strategies currently undertaken to address them These strategies are then detailed through case studies which focus on how Indigenous knowledge and practices have been used to respond to and cope with climate change in a variety of environments including urban settings The book discusses specific governance challenges facing Indigenous peoples and presents new methods for engagement that will bridge existing communication gaps to ensure Indigenous peoples are central to the implementation of climate change adaptation measures This book is intended for an audience of Indigenous peoples adaptation practitioners academics students policy makers and government workers
