## **Social Comprehension And Judgment The Role Of Situation Models:**

*Social Comprehension and Judgment* Robert S. Wyer, Jr., 2003-09-12 Written by one of the foremost authorities in social cognition *Social Comprehension and Judgment* examines how people process information encountered in their everyday lives In the book Dr Wyer proposes a new theory about the way in which information acquired in everyday life is comprehended and represented in memory and how it is later used as a basis for judgments and decisions A major emphasis throughout is on the construction and use of narrative representations of knowledge and the way that visual images influence the comprehension of these narratives and the judgments based on them The role of affective reactions in this cognitive activity is also discussed *Social Comprehension and Judgment* is divided into three sections Part I provides a conceptual overview by outlining the general theoretical framework focusing on assumptions about the storage and retrieval of information and reviews recent research on the impact of knowledge accessibility on judgments and decisions Part II deals with the comprehension of information and examines the role of these processes in impression formation persuasion and responses to humor Part III describes the inferences that are based on information conveyed in social situations This book is ideal for advanced students and researchers interested in the areas of social cognition or social information processing *Social Comprehension and Judgment* Robert Selden Wyer, 2004 *Social comprehension and judgment : the role of situation models, narratives, and implicit theories* [Anonymus AC07881937], 2004 *Social Psychology, Second Edition* Arie W. **Social Perception from Individuals to Groups** Steven J. Stroessner, Jeffrey W. Sherman, 2015-02-11 This volume focuses on social perception the processing of information about people This issue has always been central to social psychology but this book brings together literatures that in large part have been separated by the nature of the social target that is involved Historically research on person perception developed quite independently from research involving perceptions of groups Whereas the former research generally focused on the cognitive processes involved in forming impressions of individuals research on group perception examined the content of stereotypes and the conditions under which they are used in social judgment There was been little overlap in the theories and methods of these subfields and different researchers were central in each The chapters in this book highlight research and theorizing about social perception exploring the processes involved in social perception from persons to groups Some chapters describe work that was originally developed in person perception but is being extended to understanding groups Other chapters illustrate how some

processes studied in the domain of stereotyping also affect perceptions of individual persons Finally other chapters focus on variables that affect perceptions and judgments of both individuals and groups providing opportunities for greater recognition of the common set of factors that are central to all types of social perception This groundbreaking book highlights the research contributions of David L Hamilton whose research has played a central role in uniting these previously independent areas of research It provides essential reading for upper level courses on social cognition or social perception and could also serve as an auxiliary text in courses on interpersonal perception relations and courses on stereotyping intergroup relations
