web linear feedback shift registers lfsrs have nice statistical properties and a well developed theory they are also cheap and fast on the other hand it is clear that every periodic sequence can be generated by a linear feedback shift register simply take an lfsr of the same size as the period it is therefore natural to use the length

web oct 28 2019 the algorithm couldn't be entirely linear because it would get stuck it would produce nothing but zeros forevermore once it encountered an input sequence of all zeros so technically a lfsr is an nearly always linear feedback shift register it's linear for  $2^n - 2$  inputs and nonlinear for 2 special inputs a lfsr is more general
